

Opasraportti

TaTK - Kansainvälinen liiketoiminta 2011-2012 (2011 - 2012)

International Business is part of the Degree programme in International business and management. International Business as a subject focuses on the practices of international business among internationalizing and growth-oriented companies within high technology, high context, or service oriented businesses. The three core learning themes of International Business include Approaches to international business, The practice of international business, and Building up international businesses. Within these learning themes the objective of the studies in International Business is to provide the students with concepts, theories, frameworks and practical tools to describe, analyse and understand and thereby to work in, lead, manage, and build up businesses that have an international or crosscultural orientation.

International Business as a subject consists of basic, intermediate and advanced courses. At bachelor's level the studies consist of basic and intermediate courses. Basic courses provide the students with competences to describe and analyse international business settings and situations and capture the core elements of international business. At the intermediate level the course contents are broadened to cover issues of both theoretical and managerial relevance and help the students to analytically approach different phenomena within international business and apply the content in different contextual and managerial settings. Also the first scientific articles are tied to the course requirements. At master's level the course contents deepen to focus on scientific content of the managerial and theoretical issues relevant in the practice and development of international business. Throughout the studies in International Business, the students learn different working and learning methods, collaboration, as well as analysis, argumentation and reporting.
