In line with the recognition of prior learning regulations in place at the university (see: <http://www.oulu.fi/kielikoulutus/ahot>), other language courses completed in a higher educational institution will be accepted provided they cover the relevant field and level of communication (B2 on the CEFR scale). Students who completed their upper secondary or higher education in an English language programme/country, and/or IB-diploma, or passed the English language exemption test (reading comprehension and written / oral production) will be exempted from the course in accordance with the recognition of prior learning process. (See: AHOT <http://www.oulu.fi/kielikoulutus/ahot>)

Students who wish **to be exempted from attendance** can take an **exemption test** in reading field-related academic texts and give an academic presentation. In this way **students can obtain the credits without attendance**. The exemption exam is voluntary and can be taken only once. Students **who wish to do this should inform the contact teacher** ([satu.rusko\(at\)oulu.fi](mailto:satu.rusko(at)oulu.fi)) by the end of January. The exemption test and presentation of oral production will be organised during February-March. Students not exempted in the above ways are required to participate in the course.

Information on the time and place of the classes is provided on the home pages of the Department of Health Sciences.

Sisältö:

Research has shown that business failures abroad have been and are a result of the inability to understand and adapt to foreign ways of thinking and acting, not technical or professional incompetence.

International negotiation comes hand in hand with many challenges which arise from basic cultural differences. Even within one culture successful negotiation is dependent on many interconnected variables. In cross-cultural negotiation, this variety of variables broadens and values disperse. In this course we will examine some of the many concepts related to culture and variables of negotiation in the context of culture among other things. We will review culture from different perspectives and some of the "ways of doing business" and dimensions of business in Eastern and Western culture.

The course will have a short study group segment in which students will search for information about doing business and negotiating within a culture of their choice or they will present one of the applied topics presented at the end of this course outline. The study group results will be presented to the class.
