

# Opasraportti

## FHum - History of Science and Ideas (2017 - 2018)

### History of Science and Ideas

Address: History of Science and Ideas, P.O. Box 1000, FI-90014 University of Oulu, Finland

Telephone: Study Counsellor +358 294 48 3305 University Lecturer Erkki Urpilainen, Academic Affairs Secretary [study.humanities@oulu.fi](mailto:study.humanities@oulu.fi)

Website: <http://www.oulu.fi/historyofscienceandideas/>

### Admission requirements

History of Science and Ideas is one of the majors of the Degree Programme in History, Culture and Communication. It may be taken as a major subject by students who have successfully passed the entrance examination. It may also be studied as a subsidiary subject (minor) after passing a separate entrance examination arranged annually in the spring (April–May). Students in the Degree Programme in History, Culture and Communication can study History of Science and Ideas freely as minor subject.

### Study guidance

Study guidance is provided by the University Lecturer Erkki Urpilainen, tel. +358 29 448 3305, [erkki.urpilainen@oulu.fi](mailto:erkki.urpilainen@oulu.fi)

### History of Science and Ideas

History of Science and Ideas refers not only to the history of thought but also to the history of the ways knowledge is created. The subject is rooted in the Swedish traditional discipline *idé- och lärdomshistoria*. In Europe and the USA, corresponding studies usually belong in the spheres of the history of science and intellectual history. As a term, *history of science and ideas* also reminds us that there exists a certain kind of continuum, and even some surprising connections between scientific and non-scientific thinking.

As a discipline, the History of Science investigates how ideas about science have changed during the course of history. Often, the focus is on natural sciences and medicine, but equally relevant is mapping out the history of the various fields of the humanities. The History of Science does not restrict itself simply to the history of theories; the field also studies the methodology of acquiring scientific knowledge and how it has changed as well as the nature of and criteria for scientific knowledge in different eras.

The different branches of the History of Science usually group around certain methodological aspects or research problems, or on the history of a specific era, discipline or technology. The subject can also cover matters such as studying the scientific instruments of past eras, or the interaction between the institutional structures of science and scientific knowledge in different time periods. Just as it is impossible to study ideas removed from the world in which they are generated and have an influence on, it is impossible to regard science as something unconnected to the society which exists outside of academies and laboratories. Science always reflects and affects its time.

The History of Ideas is related to the History of Philosophy. Both disciplines are often interested in the same historical thinkers. However, there are distinct differences between the disciplines. In Philosophy, the emphasis is placed on

how well a line of thought is reasoned; the History of Ideas, however, puts more stress on what an idea *reveals* about the world in which it has emerged. The History of Science and Ideas is not focused solely on the great geniuses but also on the so-called “mediocre” thinkers. In the history of scholarship, the latter form the majority.

The primary goal of the History of Science and Ideas is to interpret what people from different eras *thought* about the events and things which occurred in their lives. In this sense, the History of Science and Ideas studies the beliefs, hopes, and fears of people in eras past; how they viewed society, nature, and human nature. Other fields of study in the History of Ideas are various ideologies, concepts, and “-isms” of the past. In addition to scientific thinking, such phenomena may be the subject of analysis in terms of their effects on economy, politics and religion.

### **Subject-specific practical guidelines**

Students of History of Science and Ideas and students of History share the same Basic Studies package. In the Basic Studies, students are given an overview of the course of history and its central turning points from the perspective of both subjects. Students are introduced to historical thinking and made familiar with scientific writing. Methodology studies in particular create a foundation for understanding the science of history and help students acquire a command of the methods of research.

### **Studies and learning objectives**

After completing the Basic Studies package, students will have the knowledge, skills, and conceptual abilities to critically analyse the history of human thought as well as information acquisition and studies related to it. Students will understand the nature of thought from the perspective of the History of Science and Ideas, and can explain the unique scientific features and different approaches of the field.

After completing the Intermediate Studies package, students will be able to perform a multifaceted analysis of historical phenomena from the perspective of the History of Science and Ideas and utilise study methods—both those unique to the discipline as well as those used more widely in historical research—in their study and in utilising source materials. In addition, students will be familiar with the most central traditions of study and methodological trends in the field. With reference to Advanced Studies, after completing the Intermediate Studies package, students will have the skills needed to academically present and solve problems, use existing information and source materials, document information, propose arguments, and the skills needed for critique and scholarly dialogue. Students will be able to plan and realise independent projects related to the study and application of scientific knowledge. Students will also be able to produce treatises and other written or oral works related to their area of expertise.

After completing the Advanced Studies package, students will be able to plan and carry out complex projects requiring the search and application of information, and produce academic knowledge. Students will be capable of handling demanding independent work requiring analysis, creativity, and ethical evaluation, and they can also act as experts for various groups or organisations. Students will be able to critically analyse source materials and arguments and present logically the results of studies in written form. Students will be able to critically analyse and apply the central study methods of the field. Students will be able to make use of concepts typical to the History of Science and Ideas and also have the capability to apply methodological and theoretical tools from other fields. Students will be able to conceive the diversity of the field and see the subject of their study as part of a broader study context. Students can independently comment on the academic discourse in their field.

## **COURSES**

### **Basic Studies of History (25 ECTS credits):**

700103Y Personal Study Plan 1 (Candidate's degree), 0 ECTS cr

700123P From Ancient Civilisations to the Early Modern Period (5 ECTS credits)

700124P Late Modern and Contemporary History (5 ECTS credits)

700125P The History of Sciences and Ideas (5 ECTS credits)

700126P Introduction to the Study of History (5 ECTS credits)

700127P Methodology: From Basics to Application (5 ECTS credits)

**Intermediate studies (45 ECTS cr):**

700104Y Personal Study Plan 2 (Candidate's degree), 0 ECTS cr

700129A Introduction to the History of Science and Ideas and Archival Research, 5 ECTS cr

700150A Antiquity and the Middle Ages, 5 ECTS cr

700151A The Renaissance and the Enlightenment, 5 ECTS cr

700152A The Modern Era, 5 ECTS

700153A Global History of Ideas, 5 ECTS cr

700154A The Development of the Western Idea of Humans , 5 ECTS

700155A History of Science and Ideas in Finland, 5 ECTS cr

700157A History of Religious Ideas, 5 ECTS cr

700158A History of Academic Institutions and Scientific Societies, 5 ECTS

700160A Foundation of the history of science and ideas, 5 ECTS cr

700167A Valinnaiset aate- ja oppihistorian lähialat, 5 ECTS cr

700226A Bachelor's (Candidate's) Seminar and Thesis, 10 ECTS

700224A Maturity Test for Candidate's Degree /History of Science and Ideas, 0 ECTS cr

700214A Pro Seminar and Thesis (Minor Studies), 10 ECTS cr

**Advanced Studies (80 ECTS cr):**

700227Y Personal Study Plan 3 (Master's degree), 0 ECTS cr

700159S Advanced studies on Methodology, 5 ECTS cr

700161S Theory and Philosophy of History and the Philosophy of Science, 5 ECTS cr

700162S The Study of Science, 5 ECTS cr

700163S History of Philosophy, 5 ECTS cr

700164S Science and Politics , 5 ECTS cr

700165S The History of Academic Field, 5 ECTS cr

700166S The History of a Political Idea, 5 ECTS cr

700221S History of Science and Ideas Seminar, 10 ECTS cr

700222S Master's Thesis (Pro Gradu Thesis), 40 ECTS cr

700225S Maturity Test (Master's Degree), 0 ECTS cr

### ***Specialisation option in Archival Studies***

Students majoring in History of Science and Ideas can choose the option of specialising in Archival Studies for their Master's degree. The studies are comprised of 80 ECTS credits in the Advanced Studies of Archival Studies as well as 40 ECTS credits of subsidiary (minor) studies. The specialisation option in Archival Studies will lead to a Master's Degree in Philosophy (120 ECTS credits). Students completing their Master's Degree in the specialisation option will graduate as Philosophy Masters in their major fields. The studies are comparable to the earlier higher Archival Studies degree of The National Archives Service. The studies are organised in cooperation with The National Archives Service.

Every other year, six students are chosen to commence studies in the specialisation option; four students of History and two students of the History of Science and Ideas. Criteria for acceptance are:

- a) Completion of the Basic and Intermediate Studies packages of the major subject so that the students have at least begun writing their Bachelor's Thesis,
- b) Study success
- c) Motivation letter

Recommended subsidiary subjects are, for example, Information Studies and Management Sciences. Information Processing Science is also an excellent subsidiary subject as archives are increasingly digitised.

The specialisation option in Archival Studies combines a theoretical university education with a rapidly developing expert education. The study of History is an excellent prerequisite for the Archival Studies. Archival Studies require knowledge of the government, knowledge of documents, and the knowledge of the management of evaluating documents. The specialisation option in Archival Studies is comprised of a significant part of supervised practice in The National Archives Service and other archives.

Students graduating from the Archival Studies are employed into leadership and expert positions in the National Archives Service, the government, city and municipal archives, healthcare and social welfare and healthcare organisations, National Land Survey of Finland or the private sector.

### **COURSES**

700140Y Personal Study Plan 3 (Candidate's degree), 0 ECTS cr

700130S Basics of Document Management, 2 ECTS cr

700131S Basics of Archive Laws and the Field of Archives, 2 ECTS cr

700133S Evaluation and Screening of Documents, 3 ECTS cr

700134S Electronic Document Management, 4 ECTS cr

700135S Basics of Document Management and Creating Archives, 2 ECTS cr

700136S Work Practice in Archives, 12 ECTS cr

700137S Document Preservation and Demand, 2 ECTS cr

700430S Master's Seminar, 10 ECTS cr

700431S Pro Gradu Thesis, 40 ECTS cr

700432S Maturity Examination (History), 0 ECTS c

## Opintojaksojen kuvaukset

## Tutkintorakenteisiin kuuluvien opintokohteiden kuvaukset

### A110903: History of Science and Ideas, advanced studies, 60 - 80 op

**Opiskelumuoto:** Advanced Studies

**Laji:** Study module

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opintokohteen kielet:** Finnish

Ei opintojaksokuvauksia.

*E1*

### 700159S: Advanced Studies on Methodology, 5 op

**Voimassaolo:** 01.08.2015 -

**Opiskelumuoto:** Advanced Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Pietikäinen, Petteri Olli

**Opintokohteen kielet:** Finnish

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish / English

**Timing:**

3<sup>rd</sup> – 4<sup>th</sup> year

**Learning outcomes:**

Students will be able to identify the theoretical and methodological premises of the History of Science and Ideas, and apply them in their own theses. Students will also be able to select and apply special methods needed to research history.

**Contents:**

Study of the methodology of research in the History of Science and Ideas.

**Mode of delivery:**

Lectures about the methodology of the History of Science and Ideas, Methodology seminar, book exam

**Learning activities and teaching methods:**

Lectures, exercises, seminar, analysing old styles of handwriting, book exam

**Target group:**

Students majoring or minoring in the History of Science and Ideas

**Prerequisites and co-requisites:**

It is recommended that the students have completed the methodology courses offered in Basic and Intermediate Studies

**Recommended or required reading:**

Helge Kragh: Introduction to the Historiography of Science; Markku Hyrkkänen: Aatehistorian mieli, and other literature to be agreed upon separately

**Assessment methods and criteria:**

Lecture exam, assignment, book exam

**Grading:**

0–5

**Person responsible:**

Petteri Pietikäinen

**Working life cooperation:**

None

**700161S: Theory and Philosophy of History and the Philosophy of Science, 5 op****Voimassaolo:** 01.08.2015 -**Opiskelumuoto:** Advanced Studies**Laji:** Course**Vastuuyksikkö:** Faculty of Humanities**Arvostelu:** 1 - 5, pass, fail**Opettajat:** Pietikäinen, Petteri Olli**Opintokohteen kielet:** Finnish**Voidaan suorittaa useasti:** Kyllä**ECTS Credits:**

5

**Language of instruction:**

Finnish / English

**Timing:**3<sup>rd</sup> – 4<sup>th</sup> year**Learning outcomes:**

Students will have gained an in-depth understanding of the following areas: 1) various theories on history as a discipline and related criticism and discourse; 2) theory propositions explaining and arguing the processes, proposed laws, and the meaning of history; 3) and the theoretical discourse regarding the nature of the field, its changes, and the particular questions of scientific research (causality, paradigms, verification, objectivity, etc.).

**Contents:**

The theories of history, the philosophical theories describing the substance of history, and philosophical theories and ideas describing the aspects and development of science

**Mode of delivery:**

Contact teaching and/or independent study

**Learning activities and teaching methods:**

Participation to lectures and/or book exam, or some other written assignment

**Target group:**

Students majoring or minoring in the History of Science and Ideas

**Prerequisites and co-requisites:**

It is recommended that the students have completed the methodology courses offered in Basic and Intermediate Studies as well as the intermediate course *Introduction to the History of Science and Ideas*.

**Recommended or required reading:**

Marja-Liisa Kakkuri-Knuuttila & Kaisa Heinlahti, *Mitä on tutkimus? Argumentaatio ja tieteenfilosofia*; Allan Megill, *Historical Knowledge, Historical Error – A Contemporary Guide to Practice*, p. 1-14, 63-156; Kari Väyrynen and Jarmo Pulkkinen (toim.), *Historianfilosofia*

**Assessment methods and criteria:**

Lecture exam and/or book exam

**Grading:**

0–5

**Person responsible:**

Petteri Pietikäinen

**Working life cooperation:**

None

**700162S: The Study of Science, 5 op****Voimassaolo:** 01.08.2015 -**Opiskelumuoto:** Advanced Studies**Laji:** Course**Vastuuyksikkö:** Faculty of Humanities**Arvostelu:** 1 - 5, pass, fail**Opettajat:** Pietikäinen, Petteri Olli**Opintokohteen kielet:** Finnish**Voidaan suorittaa useasti:** Kyllä**ECTS Credits:**

5

**Language of instruction:**

Finnish / English

**Timing:**3<sup>rd</sup> – 4<sup>th</sup> year**Learning outcomes:**

Students will be able to define the central views in the Study of Science and its basic concepts enabling the students to independently follow the discussion related to the field. The students will be able to apply the terminology of the Study of Science to analyse phenomena in the history of science.

**Contents:**

Familiarisation with questions in the Study of Science

**Mode of delivery:**

Contact teaching and/or independent study

**Learning activities and teaching methods:**

Participation to lectures and/or book exam, or some other written assignment

**Target group:**

Students majoring or minoring in the History of Science and Ideas

**Recommended or required reading:**

Mika Kiikeri & Petri Ylikoski, *Tiede tutkimuskohteena*; Mario Biagoli & Jessica Riskin (eds): *Nature Engaged: Science in Practice from the Renaissance to the Present*, AND Harry Collins & Trevor Pinch, *The golem – what everyone should know about science*

**Assessment methods and criteria:**

Lecture exam and/or book exam

**Grading:**

0–5

**Person responsible:**

Petteri Pietikäinen

**Working life cooperation:**

None

**700163S: History of Philosophy, 5 op****Voimassaolo:** 01.08.2015 -

**Opiskelumuoto:** Advanced Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Pietikäinen, Petteri Olli

**Opintokohteen kielet:** Finnish

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish / English

**Timing:**

3<sup>rd</sup> – 4<sup>th</sup> year

**Learning outcomes:**

Students will be able to describe the developments in the history of philosophical thought and explain the central questions of the history of Western philosophy.

**Contents:**

Familiarisation with the history of Western philosophy

**Mode of delivery:**

Contact teaching and/or independent study

**Learning activities and teaching methods:**

Participation to lectures and/or book exam, or some other written assignment

**Target group:**

Students majoring or minoring in the History of Science and Ideas

**Recommended or required reading:**

Petteri Korkman ja Mikko Yrjönsuuri, *Filosofian historian kehityslinjoja* and Svante Nordin, *Filosofian historia*. If this work has already been used in earlier studies (i.e. Philosophy or Ethics) p. 491-546.

**Assessment methods and criteria:**

Lecture exam and/or book exam

**Grading:**

0–5

**Person responsible:**

Petteri Pietikäinen

**Working life cooperation:**

None

### **700164S: Science and Politics, 5 op**

**Voimassaolo:** 01.08.2015 -

**Opiskelumuoto:** Advanced Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Pietikäinen, Petteri Olli

**Opintokohteen kielet:** Finnish

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish / English

**Timing:**3<sup>rd</sup> – 4<sup>th</sup> year**Learning outcomes:**

Students will have gained an in-depth knowledge of the relationship between science and politics. The students will also be able to describe how politicians, officials, and administrators have co-opted scientific results as well as determined what kind of science has been favoured and supported. The students will also be able to describe how scientists have been influenced by their own political and ideological beliefs in their research and peer-reviewing.

**Contents:**

National science and politics of science; the relationships of science and warfare (e.g. the Manhattan Project); the Cold War and science; the relationship between economics and economic policy; science and racism; science in the market economy, socialist societies, and dictatorships; science and social politics (e.g. eugenics, social engineering, health politics); the relationship between science and religion

**Mode of delivery:**

Contact teaching and/or independent study

**Learning activities and teaching methods:**

Participation to lectures and/or book exam, or some other written assignment

**Target group:**

Students majoring or minoring in the History of Science and Ideas

**Recommended or required reading:**

From the following books, the students choose literature to cover 5 ECTS credits: Markku Mattila, *Kansamme parhaaksi. Rotuhygienia Suomessa vuoden 1935 sterilointilakiin asti* (2 ECTS cr); Paul Crook, *Darwin's Coat-Tails. Essays on Social-Darwinism* (2 ECTS cr); Naomi Oreskes & Erik M. Conway, *Merchants of Doubt. How a Handful of Scientists Obscured the Truth on Issues from Tobacco Smoke to Global Warming* (3 ECTS cr); P.D. Smith, *Doomsday Men. The Real Dr Strangelove and the Dream of the Superweapon* (3 ECTS cr); Elazar Barkan, *Retreat of Scientific Racism. Changing Concepts of Race in Britain and the United States between the World Wars* (3 ECTS cr); Denis R. Alexander and Ronald L. Numbers (eds.), *Biology and Ideology from Descartes to Dawkins* (3 ECTS cr); or other literature as agreed with the course lecturer.

**Assessment methods and criteria:**

Lecture exam and/or book exam

**Grading:**

0–5

**Person responsible:**

Petteri Pietikäinen

**Working life cooperation:**

None

**700165S: The History of Academic Field, 5 op****Voimassaolo:** 01.08.2015 -**Opiskelumuoto:** Advanced Studies**Laji:** Course**Vastuuyksikkö:** Faculty of Humanities**Arvostelu:** 1 - 5, pass, fail**Opettajat:** Pietikäinen, Petteri Olli**Opintokohteen kielet:** Finnish**Voidaan suorittaa useasti:** Kyllä**ECTS Credits:**

5

**Language of instruction:**

Finnish / English

**Timing:**3<sup>rd</sup> – 4<sup>th</sup> year**Learning outcomes:**

Students will have made an in-depth analysis of the history of an academic field of their choosing and can describe the major historical developments of the field.

**Contents:**

An in-depth analysis of the history of an academic field: In biology, for example, theories of human evolution, or, in physics, quantum physics; other possible fields are cosmology, criminology, psychiatry, psychoanalysis, neurosciences, public health sciences, genetics, political economics, history of ideas, etc.

**Mode of delivery:**

Contact teaching and/or independent study

**Learning activities and teaching methods:**

Participation to lectures and/or book exam, or some other written assignment

**Target group:**

Students majoring or minoring in the History of Science and Ideas

**Prerequisites and co-requisites:**

It is recommended that students have completed the following courses before attending: History of Science and Ideas (700125P) and History of Science and Technology (700156A).

**Recommended or required reading:**

From the following books, the students choose literature to cover 5 ECTS credits: Petteri Pietikäinen, *Hulluuden historia* (3 ECTS cr); Oren Harman, *The Price of Altruism. George Price and the Search for the Origins of Kindness* (3 ECTS cr); George Makari, *Revolution in Mind. The Creation of Psychoanalysis* (3 ECTS cr); Kurt Danziger, *Naming the Mind. How Psychology Found Its Language* (2 ECTS cr); Gino Segre, *Faust in Copenhagen. A Struggle for the Soul of Physics* (2 ECTS cr); Jouko Aho, *Sieluun piirretty viiva. Psykologisia perinteitä suomenmielisestä sielutieteestä kokeelliseen kasvatustieteeseen* (2 ECTS cr); or other literature as agreed with the course lecturer.

**Assessment methods and criteria:**

Lecture exam and/or book exam

**Grading:**

0–5

**Person responsible:**

Petteri Pietikäinen

**Working life cooperation:**

None

**700166S: The History of a Political Idea, 5 op**

**Voimassaolo:** 01.08.2015 -

**ECTS Credits:**

10

**Language of instruction:**

Finnish

**Timing:**

4<sup>th</sup> – 5<sup>th</sup> year

**Learning outcomes:**

After active participation in the seminar work, students will have the abilities required for research and scientific discourse. The students will be able to demonstrate these abilities in their Master's Thesis.

**Contents:**

Presenting the various stages of the student's own Master's Thesis, and acting as an opponent for other students (two times), participation in conversations about the theses presented in the seminar.

**Mode of delivery:**

Regularly scheduled seminars, at least for the duration of two terms

**Learning activities and teaching methods:**

Active participation in the seminars until the student's thesis is completed. However, a minimum of two semesters is required. During the seminar, each student must present: 1) A research plan for their work, 2) disposition, introduction, and a chapter from their Master's Thesis, and 3) a completed Master's Thesis. The students must also act twice as an opponent to a fellow student's disposition/introduction/thesis chapter as well as the completed Master's Thesis.

**Target group:**

Students majoring or minoring in the History of Science and Ideas

**Assessment methods and criteria:**

Independent work on a 70–90 page-long thesis.

**Grading:**

0-5

## **700130S: Basics of Document Management, 2 op**

**Voimassaolo:** 01.08.2013 -

**Opiskelumuoto:** Advanced Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opintokohteen kielet:** Finnish

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

2

**Language of instruction:**

Finnish

**Timing:**

4<sup>th</sup> year

**Learning outcomes:**

Upon completion of the course students

- will be able to explain document management and the field of archives as a part of the operational environment and data administration.
- will be able to describe the relationships between different areas of data administration as well as the tasks of data administration with the central terms and definitions of the field.
- will be introduced to the central document management tools and their significances and relationships.

**Contents:**

Students will gain a general idea of the basics of manual and electronic archives management and familiarise themselves with the management tools of documents.

**Mode of delivery:**

Contact teaching and online course

**Learning activities and teaching methods:**

Contact teaching days and online assignments

**Target group:**

Students specialising in Archival Studies

**Recommended optional programme components:**

Upon successful completion, students can apply to complete the basic archives management degree in the National Archives Service.

**Recommended or required reading:**

Material assigned during contact lectures

**Assessment methods and criteria:**

Successful completion of the course and related assignments

**Grading:**

Pass/Fail

**Person responsible:**

University Lecturer Matti Enbuske

**Working life cooperation:**

Familiarisation with the practical environment of the field of archives

**700131S: Basics of Archive Laws and the Field of Archives, 2 op**

**Voimassaolo:** 01.08.2013 -

Regularly scheduled seminars, at least for the duration of two terms

**Learning activities and teaching methods:**

Active participation in the seminars until the student's thesis is completed. However, a minimum of two semesters is required. During the seminar, each student must present: 1) A research plan for their work, 2)

disposition, introduction, and a chapter from their Master's Thesis, and 3) a completed Master's Thesis. The students must also act twice as an opponent to a fellow student's disposition/introduction/thesis chapter as well as the completed Master's Thesis.

**Target group:**

Students majoring or minoring in the History of Science and Ideas

**Assessment methods and criteria:**

Independent work on a 70–90 page-long thesis.

**Grading:**

0-5

**Person responsible:**

Petteri Pietikäinen

**Working life cooperation:**

None

**700222S: Master's Thesis, 40 op**

**Voimassaolo:** 01.08.2005 -

**Opiskelumuoto:** Advanced Studies

**Laji:** Diploma thesis

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Pietikäinen, Petteri Olli

**Opintokohteen kielet:** Finnish

**ECTS Credits:**

40

**Language of instruction:**

Finnish, English or Swedish

**Timing:**

4<sup>th</sup> – 5<sup>th</sup> year

**Learning outcomes:**

In a successfully completed Master's Thesis, the students will have shown the ability to do research work and take part in scientific dialogue. These abilities include the proper usage of the central research methods of history, an understanding of theories and ways of acquiring knowledge, and skills to present in a scholarly manner. Also, a critical approach to source materials, research literature, and scientific discourse will be evident.

**Target group:**

Students majoring or minoring in the History of Science and Ideas

**Assessment methods and criteria:**

Independent work on a 70–90 page-long thesis

**Grading:**

0-5

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Pietikäinen, Petteri Olli

**Opintokohteen kielet:** Finnish

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish / English

**Timing:**

3<sup>rd</sup> – 4<sup>th</sup> year

**Learning outcomes:**

Students will be able to identify the theoretical and methodological premises of the History of Science and Ideas, and apply them in their own theses. Students will also be able to select and apply special methods needed to research history.

**Contents:**

Study of the methodology of research in the History of Science and Ideas.

**Mode of delivery:**

Lectures about the methodology of the History of Science and Ideas, Methodology seminar, book exam

**Learning activities and teaching methods:**

Lectures, exercises, seminar, analysing old styles of handwriting, book exam

**Target group:**

Students majoring or minoring in the History of Science and Ideas

**Prerequisites and co-requisites:**

It is recommended that the students have completed the methodology courses offered in Basic and Intermediate Studies

**Recommended or required reading:**

Helge Kragh: Introduction to the Historiography of Science; Markku Hyrkkänen: Aatehistorian mieli, and other literature to be agreed upon separately

**Assessment methods and criteria:**

Lecture exam, assignment, book exam

**Grading:**

0–5

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish / English

**Timing:**3<sup>rd</sup> – 4<sup>th</sup> year**Learning outcomes:**

Students will have gained an in-depth understanding of the following areas: 1) various theories on history as a discipline and related criticism and discourse; 2) theory propositions explaining and arguing the processes, proposed laws, and the meaning of history; 3) and the theoretical discourse regarding the nature of the field, its changes, and the particular questions of scientific research (causality, paradigms, verification, objectivity, etc.).

**Contents:**

The theories of history, the philosophical theories describing the substance of history, and philosophical theories and ideas describing the aspects and development of science

**Mode of delivery:**

Contact teaching and/or independent study

**Learning activities and teaching methods:**

Participation to lectures and/or book exam, or some other written assignment

**Target group:**

Students majoring or minoring in the History of Science and Ideas

**Prerequisites and co-requisites:**

It is recommended that the students have completed the methodology courses offered in Basic and Intermediate Studies as well as the intermediate course *Introduction to the History of Science and Ideas*.

**Recommended or required reading:**

Marja-Liisa Kakkuri-Knuuttila & Kaisa Heinlahti, *Mitä on tutkimus? Argumentaatio ja tieteenfilosofia*; Allan Megill, *Historical Knowledge, Historical Error – A Contemporary Guide to Practice*, p. 1-14, 63-156; Kari Väyrynen and Jarmo Pulkkinen (toim.), *Historianfilosofia*

**Assessment methods and criteria:**

Lecture exam and/or book exam

**Grading:**

0–5

**Person responsible:**

Petteri Pietikäinen

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish / English

**Timing:**

3<sup>rd</sup> – 4<sup>th</sup> year

**Learning outcomes:**

Students will have gained an in-depth knowledge of the relationship between science and politics. The students will also be able to describe how politicians, officials, and administrators have co-opted scientific results as well as determined what kind of science has been favoured and supported. The students will also be able to describe how scientists have been influenced by their own political and ideological beliefs in their research and peer-reviewing.

**Contents:**

National science and politics of science; the relationships of science and warfare (e.g. the Manhattan Project); the Cold War and science; the relationship between economics and economic policy; science and racism; science in the market economy, socialist societies, and dictatorships; science and social politics (e.g. eugenics, social engineering, health politics); the relationship between science and religion

**Mode of delivery:**

Contact teaching and/or independent study

**Learning activities and teaching methods:**

Participation to lectures and/or book exam, or some other written assignment

**Target group:**

Students majoring or minoring in the History of Science and Ideas

**Recommended or required reading:**

From the following books, the students choose literature to cover 5 ECTS credits: Markku Mattila, *Kansamme parhaaksi. Rotuhygienia Suomessa vuoden 1935 sterilointilakiin asti* (2 ECTS cr); Paul Crook, *Darwin's Coat-Tails. Essays on Social-Darwinism* (2 ECTS cr); Naomi Oreskes & Erik M. Conway, *Merchants of Doubt. How a Handful of Scientists Obscured the Truth on Issues from Tobacco Smoke to Global Warming* (3 ECTS cr); P.D. Smith, *Doomsday Men. The Real Dr Strangelove and the Dream of the Superweapon* (3 ECTS cr); Elazar Barkan, *Retreat of Scientific Racism. Changing Concepts of Race in Britain and the United States between the World Wars* (3 ECTS cr); Denis R. Alexander and Ronald L. Numbers (eds.), *Biology and Ideology from Descartes to Dawkins* (3 ECTS cr); or other literature as agreed with the course lecturer.

**Assessment methods and criteria:**

Lecture exam and/or book exam

**Grading:**

0–5

**Person responsible:**

Petteri Pietikäinen

**Working life cooperation:**

**Opintokohteen kielet:** Finnish

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish / English

**Timing:**

3<sup>rd</sup> – 4<sup>th</sup> year

**Learning outcomes:**

Students will have made an in-depth analysis of the history of an academic field of their choosing and can describe the major historical developments of the field.

**Contents:**

An in-depth analysis of the history of an academic field: In biology, for example, theories of human evolution, or, in physics, quantum physics; other possible fields are cosmology, criminology, psychiatry, psychoanalysis, neurosciences, public health sciences, genetics, political economics, history of ideas, etc.

**Mode of delivery:**

Contact teaching and/or independent study

**Learning activities and teaching methods:**

Participation to lectures and/or book exam, or some other written assignment

**Target group:**

Students majoring or minoring in the History of Science and Ideas

**Prerequisites and co-requisites:**

It is recommended that students have completed the following courses before attending: History of Science and Ideas (700125P) and History of Science and Technology (700156A).

**Recommended or required reading:**

From the following books, the students choose literature to cover 5 ECTS credits: Petteri Pietikäinen, *Hulluuden historia* (3 ECTS cr); Oren Harman, *The Price of Altruism. George Price and the Search for the Origins of Kindness* (3 ECTS cr); George Makari, *Revolution in Mind. The Creation of Psychoanalysis* (3 ECTS cr); Kurt Danziger, *Naming the Mind. How Psychology Found Its Language* (2 ECTS cr); Gino Segre, *Faust in Copenhagen. A Struggle for the Soul of Physics* (2 ECTS cr); Jouko Aho, *Sieluun piirretty viiva. Psykologisia perinteitä suomenmielisestä sielutieteestä kokeelliseen kasvatustoppiin* (2 ECTS cr); or other literature as agreed with the course lecturer.

**Assessment methods and criteria:**

**Language of instruction:**

Finnish

**Timing:**1<sup>st</sup> year**Learning outcomes:**

Upon completion of the course, students will be able to identify and compare the political, economic, and cultural aspects of different cultures, as well as to perceive the main development trends of the pre-modern era. Students will be able to view Finland's integration to the Western European cultural circle.

**Contents:**

The course will present the main developments from the High Cultures to the French Revolution. Finnish history will be introduced as a part of the development of Western Europe

**Mode of delivery:**

Contact teaching and/or independent study

**Learning activities and teaching methods:**

Lectures and independent study of the course material or a book exam as a secondary option

**Target group:**

Students at the early stages of Basic Studies of History

**Recommended or required reading:**

It is also possible to complete the course as a book exam. Students can choose one of the following literature compilations:

1. Study of Antiquity (choose two of the books):

Simon Price & Peter Thoneman, *The Birth of Classical Europe: A History from Troy to Augustine* (2011), pp. 11–334.

Andrew Erskine (Ed.), *A Companion to Ancient History* (2009), chapters 2–4, 6–16, 27–36, 43–45.

Lukas de Blois, *An introduction to the ancient world*, London : Routledge, 1997.

2. Study of the Middle Ages, (choose both books):

Jacques Le Goff, *Medieval Civilization 400–1500* (1988 or newer).

Kari Tarkiainen, *Ruotsin Itämaa: Esihistoriasta Kustaa Vaasaan* (2010).

3. Study of the Early Modern Time (choose both books):

Merry E. Wiesner-Hanks, *Early Modern Europe, 1450–1789*, 2<sup>nd</sup> edition (2013).

Nils Erik Villstrand, *Valtakunnanosa: suurvalta ja valtakunnan hajoaminen 1560–1812* (2012).

ay700124P Late Modern and Contemporary History (OPEN UNI) 5.0 op

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish and/or English

**Timing:**1<sup>st</sup> year**Learning outcomes:**

Upon completion of the course, students will be able to name, describe, and explain the significant events and stages of Late Modern and Contemporary History. Students will be able to connect and compare events, and see the Finnish historical events as a part of world history.

**Contents:**

The course will present the central developments from the French Revolution to the present.

**Mode of delivery:**

Contact teaching and/or independent study

**Learning activities and teaching methods:**

Lectures and independent study of the course material or a book exam as a secondary option

**Target group:**

Students at the early stages of Basic Studies of History

**Recommended or required reading:**

*World Civilizations: The Global Experience, Volume 2: 1450 to the Present*, Seventh Edition (2014), Part V & VI

AND

Jouko Vahtola, *Suomen historia jääkaudesta Euroopan unioniin* (2012), chapters "Nousun aika (1721-1860)", "Uusi aika" (1860–1944) and "Uusin aika" (1944–2002).

**Assessment methods and criteria:**

Examination and book exam; or book exam

**Grading:**

0–5

**Person responsible:**

University Lecturer Henry Oinas-Kukkonen

**Working life cooperation:**

None

**Other information:**

The literature must be completed as a unit, and students must give a satisfactory answer to each question formulated from the books chosen for the exam.

**700125P: The History of Sciences and Ideas, 5 op**

**700126P: Introduction to the Study of History, 5 op**

**Voimassaolo:** 01.08.2015 -

**Opiskelumuoto:** Basic Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Tiina Kinnunen

**Opintokohteen kielet:** Finnish

**Leikkaavuudet:**

ay700126P Introduction to the Study of History (AVOIN YO) 5.0 op

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish

**Timing:**

1<sup>st</sup> year, Autumn semester

**Learning outcomes:**

After the completion of the course, students will be able to understand the multifaceted use of history in society and its nature as an academic field. Students will be familiar with the developments of historiography, the current characteristics of research, different trends and key concepts as well as the use of sources and theories in research. Students will also be familiar with study and conducts of History as well as the aims and the structure of the programme. Students will be able to recognise their competence and relate it to the employment prospects of the field.

**Contents:**

The key characteristics of the use and research of History: History as a societal phenomenon, the basic concepts, research fields and theories of the research of history.

PSP1: A plan for completing the Bachelor's degree. The general study guidance is used to advance students' learning abilities, understanding of the studies, and the development of career planning. Does not apply to students minoring in History.

**Mode of delivery:**

Contact teaching and personal guidance

**Learning activities and teaching methods:**

Lecture course and study of the literature given at the lectures; meetings with the teacher tutor and PSP1 info sessions. Students minoring in History will complete a 1 ECTS credit assignment to replace the PSP1 during the lecture course.

**Target group:**

Students of Basic Studies of History

**Assessment methods and criteria:**

Lecture examination, written personal study plan, and filling out the OodiPSP OR assignment

**Grading:**

0–5

**Person responsible:**

Professor Tiina Kinnunen

**Working life cooperation:**

None

**Other information:**

Mandatory attendance (85%) and mandatory participation to the PSP guidance

**700127P: Introduction to Research Methods, 5 op**

**Voimassaolo:** 01.08.2015 -

**Opiskelumuoto:** Basic Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Oinas-Kukkonen, Henry Tapio

**Opintokohteen kielet:** Finnish

**Leikkaavuudet:**

ay700127P Introduction to Research Methods (OPEN UNI) 5.0 op

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish

**Timing:**1<sup>st</sup> year**Learning outcomes:**

Upon completion of the course, students will be able to read, analyse, and assess historical research by utilising the basic approaches and principles of the field; based on that, students will be able to formulate a summarised oral presentation and take part in discourse in the field of science of history. Students will be able to outline how the research of history is conducted in practice. Students will also be familiar with the research process and the practices of the field. Students will develop their independent and group work skills, practice scientific writing and critical reading of scientific texts.

**Contents:**

The basics of research methods; familiarisation with the latest research

**Mode of delivery:**

Contact teaching

**Learning activities and teaching methods:**

Lectures; literature; group sessions; assignment; oral presentation. Learning activities and teaching methods may vary.

**Target group:**

Students of Basic Studies of History

**Prerequisites and co-requisites:**

700126P Introduction to the Study of History recommended.

**Recommended optional programme components:**

Familiarisation with the latest research has been integrated into the compulsory Finnish course *Written and Oral Communication*.

**Recommended or required reading:**

Course material and reading assigned by the lecturer

**Assessment methods and criteria:**

The section *the basics of research methods* can include an exam.

**Grading:**

0–5

**Person responsible:**

University Lecturer Henry Oinas-Kukkonen

**Working life cooperation:**

None

**A110902: History of Science and Ideas, intermediate studies, 45 op**

**700129A: Introduction to the History of Science and Ideas and Archival Research, 5 op**

**Voimassaolo:** 01.08.2015 -

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Pietikäinen, Petteri Olli

**Opintokohteen kielet:** Finnish

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish

**Timing:**

2<sup>nd</sup> year

**Learning outcomes:**

Students will be able to identify and conceptualise the essentials of the history of science and ideas. In addition, students will become familiar with the methodological and theoretical basics of the field. They will also be able to locate various data sources (private and public, written and electronic, domestic and foreign), data collections, databases and archives. The students will be able to evaluate how to use the found material to solve their research question.

**Contents:**

The basic concepts and methods of the history of science and ideas. Insight into the developments in the history of the field. Location and usage of domestic and foreign sources.

**Mode of delivery:**

Contact teaching

**Learning activities and teaching methods:**

Lectures; exercises; and either working in small groups or studying independently

**Target group:**

Students majoring and minoring in the History of Science and Ideas

**Prerequisites and co-requisites:**

Completion of the Basic Studies courses *Introduction to the Study of History* and *From the Basics of Methodology to Their Application*

**Recommended optional programme components:**

The course includes also Statistical Methods and Archive Skills (course registration in WebOodi, code 700320A).

**Recommended or required reading:**

*Manuale Historiae – Historianopiskelijan käsikirja*; other material handed out by the lecturer

**Assessment methods and criteria:**

Active attendance; exercises; and individual project

**Grading:**

0–5

**Person responsible:**

Petteri Pietikäinen and Marianne Junila

**Working life cooperation:**

None

### 700333P: Research Methods, 5 op

**Voimassaolo:** 01.08.2017 -

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Markku Hokkanen

**Opintokohteen kielet:** Finnish

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5 ECTS credits / 135 hours of work

**Timing:**

1<sup>st</sup> year, autumn, period I and II

**Learning outcomes:**

Upon completion of the course the students will be familiarized with the qualitative methods used in researching history, culture and communication. The course provides students with the skills and capabilities needed for information retrieval, source criticism, planning and implementation of research (question setting, collecting and analyzing data), writing, presenting and critical discussion.

**Contents:**

Topics to examine and discuss include the nature of knowledge, especially scientific knowledge; frontiers between science and non-science; similarities and differences between the human sciences and the natural sciences; scientific argumentation; critical reading of sources; processes related to perception, inference and interpretation; research ethics and norms; publicity of science and open access; scientific communication; and the historical development of scientific thinking.

**Mode of delivery:**

Face-to-face teaching with the support of web-based teaching.

**Learning activities and teaching methods:**

Activating learning methods: Lectures, group work, online work /web-based teaching.

**Target group:**

Students of Degree Programme in History, Culture and Communication

**Prerequisites and co-requisites:**

-

**Recommended optional programme components:**

In History and in History of Science and Ideas: to be completed simultaneously with 700128A Qualitative Methods, Information Seeking, and Library Utilisation

**Recommended or required reading:**

-

**Assessment methods and criteria:**

Participation in the lectures as well as in the major subject section.

**Grading:**

0-5

**Person responsible:**

Markku Hokkanen

**Other information:**

The course is compulsory for students of degree programme in history, culture and communication.

e

**700150A: Antiquity and the Middle Ages, 5 op**

**700226A: Bachelor's Seminar and Thesis, 10 op**

**Voimassaolo:** 01.08.2009 -

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Urpilainen, Erkki Juhani

**Opintokohteen kielet:** Finnish

**ECTS Credits:**

10

**Language of instruction:**

Finnish

**Timing:**

Second and third year. The seminar begins in the spring term (period III) and ends in the autumn term (period I).

**Learning outcomes:**

Upon completion of the course, students can apply the methods of the History of Science and Ideas and complete an independent research project, and are capable of criticizing and discussing historical research. The Candidate's Thesis demonstrates the student's capability to prepare essays, dissertations and seminar presentations that fill the methodological, language, and content requirements of the subject.

**Contents:**

The course will result in a completed, independently designed Bachelor's Thesis from the field of the History of Science and Ideas (approx. 20 pages).

**Mode of delivery:**

Contact teaching and personal guidance

**Learning activities and teaching methods:**

Regularly scheduled seminar meetings

**Target group:**

Students majoring in History of Science and Ideas

**Prerequisites and co-requisites:**

Intermediate study courses: *Qualitative Methods, Information Seeking, and Library Utilisation, Introduction to the History of Science and Ideas* and *Archival Research* either completed or started.

**Assessment methods and criteria:**

Active participation to the seminar meetings (at least 10 meetings); completing and presenting a Bachelor's Thesis; acting as an opponent to a fellow student's work; active participation in seminar meetings; and a learning diary.

**Grading:**

The Thesis and Seminar participation are graded on a scale of 0–5

**Person responsible:**

Erkki Urpilainen

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opintokohteen kielet:** Finnish

**ECTS Credits:**

0

**Language of instruction:**

Finnish/ Swedish (or native language)

**Timing:**

Third year, spring semester

**Learning outcomes:**

Students can write an essay, of high-level in content and language, in which they present the theoretical and methodological background and the central results of their thesis.

**Mode of delivery:**

Self study

**Learning activities and teaching methods:**

The Maturity Test can be written on a faculty exam date

**Target group:**

Students majoring in History of Science and Ideas

**Prerequisites and co-requisites:**

Submission and acceptance of a Candidate's Thesis required

**Assessment methods and criteria:**

An essay written in an exam setting

**700214A: Pro Seminar and Thesis (Minor Studies), 10 op**

**Voimassaolo:** 01.08.2005 -

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Urpilainen, Erkki Juhani

**Opintokohteen kielet:** Finnish

**ECTS Credits:**

10

**Language of instruction:**

Finnish

**Timing:**

2<sup>nd</sup> – 3<sup>rd</sup> year. The seminar starts at the beginning of the Spring semester, and the students will have time to complete it until the end of October.

**Learning outcomes:**

Students will be able to apply methods of the History of Science and Ideas, define a research question, and complete an independent research project. They will also be capable of criticising and discussing historical research. The Pro Seminar Thesis will demonstrate the student's capability to prepare essays, dissertations and seminar presentations that fill the methodological, language, and content requirements of the subject.

**Contents:**

The course will result in a completed, independently designed Pro Seminar Thesis from the field of the History of Science and Ideas (approx. 20 pages).

**Mode of delivery:**

Contact teaching

**Learning activities and teaching methods:**

Regular seminar meetings

**Target group:**

Students minoring in the History of Science and Ideas

**Prerequisites and co-requisites:**

Intermediate study courses: Qualitative Methods, Information Seeking, and Library Utilisation; Introduction to the History of Science and Ideas and Archival Research either completed or started.

**Assessment methods and criteria:**

Active participation to the seminar meetings (at least 10 meetings); completing and presenting a Pro Seminar Thesis; acting as an opponent to a fellow student's work; active participation in seminar meetings; and a learning diary.

**Grading:**

0–5

**Opintokohteen kielet:** Finnish

**ECTS Credits:**

5 ECTS credits / 135 hours work

**Language of instruction:**

Finnish or English

**Timing:**

varies according to major subject

**Learning outcomes:**

Students become acquainted with the basic characteristics of scientific thinking and can describe the differences and similarities between scientific and non-scientific thinking.

**Contents:**

Students familiarize with the basic features of scientific thinking. During the course students discuss the meaning of knowledge, and in particular the scientific knowledge. The boundaries of science and pseudoscience, the differences and similarities between human sciences and natural sciences, the scientific argumentation, the critical source literacy, the processes of observation, inference and interpretation, the ethics and norms in science, the publicity of science and the encryption of knowledge, the scientific communication, and the historical development of scientific thinking are dealt during the course.

**Mode of delivery:**

face-to-face teaching 24 h and independent work 111 h

**Learning activities and teaching methods:**

lectures and supplementary assignment

**Target group:**

students in degree programme in history, culture and communication

**Recommended optional programme components:**

The course is an independent entity and does not require additional studies carried out at the same time.

**Recommended or required reading:**

Leila Haaparanta & Ilkka Niiniluoto: Johdatus tieteelliseen ajatteluun

**Assessment methods and criteria:**

Lectures, **lecture journal** and book exam. Active participation in teaching discussions, knowledge of the topic shown with lecture journal, accepted book exam. Read more about assessment criteria at the University of Oulu webpage.

**Language of instruction:**

Finnish

**Timing:**1<sup>st</sup> year**Learning outcomes:**

Upon completion of the course, students will be able to identify and compare the political, economic, and cultural aspects of different cultures, as well as to perceive the main development trends of the pre-modern era. Students will be able to view Finland's integration to the Western European cultural circle.

**Contents:**

The course will present the main developments from the High Cultures to the French Revolution. Finnish history will be introduced as a part of the development of Western Europe

**Mode of delivery:**

Contact teaching and/or independent study

**Learning activities and teaching methods:**

Lectures and independent study of the course material or a book exam as a secondary option

**Target group:**

Students at the early stages of Basic Studies of History

**Recommended or required reading:**

It is also possible to complete the course as a book exam. Students can choose one of the following literature compilations:

1. Study of Antiquity (choose two of the books):

Simon Price & Peter Thoneman, *The Birth of Classical Europe: A History from Troy to Augustine* (2011), pp. 11–334.

Andrew Erskine (Ed.), *A Companion to Ancient History* (2009), chapters 2–4, 6–16, 27–36, 43–45.

Lukas de Blois, *An introduction to the ancient world*, London : Routledge, 1997.

2. Study of the Middle Ages, (choose both books):

Jacques Le Goff, *Medieval Civilization 400–1500* (1988 or newer).

Kari Tarkiainen, *Ruotsin Itämaa: Esihistoriasta Kustaa Vaasaan* (2010).

3. Study of the Early Modern Time (choose both books):

Merry E. Wiesner-Hanks, *Early Modern Europe, 1450–1789*, 2<sup>nd</sup> edition (2013).

Nils Erik Villstrand, *Valtakunnanosa: suurvalta ja valtakunnan hajoaminen 1560–1812* (2012).

**Timing:**1<sup>st</sup> year, Autumn semester**Learning outcomes:**

After the completion of the course, students will be able to understand the multifaceted use of history in society and its nature as an academic field. Students will be familiar with the developments of historiography, the current characteristics of research, different trends and key concepts as well as the use of sources and theories in research. Students will also be familiar with study and conducts of History as well as the aims and the structure of the programme. Students will be able to recognise their competence and relate it to the employment prospects of the field.

**Contents:**

The key characteristics of the use and research of History: History as a societal phenomenon, the basic concepts, research fields and theories of the research of history.

PSP1: A plan for completing the Bachelor's degree. The general study guidance is used to advance students' learning abilities, understanding of the studies, and the development of career planning. Does not apply to students minoring in History.

**Mode of delivery:**

Contact teaching and personal guidance

**Learning activities and teaching methods:**

Lecture course and study of the literature given at the lectures; meetings with the teacher tutor and PSP1 info sessions. Students minoring in History will complete a 1 ECTS credit assignment to replace the PSP1 during the lecture course.

**Target group:**

Students of Basic Studies of History

**Assessment methods and criteria:**

Lecture examination, written personal study plan, and filling out the OodiPSP OR assignment

**Grading:**

0–5

**Person responsible:**

Professor Tiina Kinnunen

**Working life cooperation:**

**Voidaan suorittaa useasti:** Kyllä**ECTS Credits:**

5

**Language of instruction:**

Finnish

**Timing:**1<sup>st</sup> year**Learning outcomes:**

Upon completion of the course, students will be able to read, analyse, and assess historical research by utilising the basic approaches and principles of the field; based on that, students will be able to formulate a summarised oral presentation and take part in discourse in the field of science of history. Students will be able to outline how the research of history is conducted in practice. Students will also be familiar with the research process and the practices of the field. Students will develop their independent and group work skills, practice scientific writing and critical reading of scientific texts.

**Contents:**

The basics of research methods; familiarisation with the latest research

**Mode of delivery:**

Contact teaching

**Learning activities and teaching methods:**

Lectures; literature; group sessions; assignment; oral presentation. Learning activities and teaching methods may vary.

**Target group:**

Students of Basic Studies of History

**Prerequisites and co-requisites:**

700126P Introduction to the Study of History recommended.

**Recommended optional programme components:**Familiarisation with the latest research has been integrated into the compulsory Finnish course *Written and Oral Communication*.**Recommended or required reading:**

Course material and reading assigned by the lecturer

**Assessment methods and criteria:**

The section *the basics of research methods* can include an exam.

**Grading:**

0–5

**Person responsible:**

University Lecturer Henry Oinas-Kukkonen

**Opintokohteen kielet:** Finnish

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish

**Timing:**

2<sup>nd</sup> year

**Learning outcomes:**

Students will be able to identify and conceptualise the essentials of the history of science and ideas. In addition, students will become familiar with the methodological and theoretical basics of the field. They will also be able to locate various data sources (private and public, written and electronic, domestic and foreign), data collections, databases and archives. The students will be able to evaluate how to use the found material to solve their research question.

**Contents:**

The basic concepts and methods of the history of science and ideas. Insight into the developments in the history of the field. Location and usage of domestic and foreign sources.

**Mode of delivery:**

Contact teaching

**Learning activities and teaching methods:**

Lectures; exercises; and either working in small groups or studying independently

**Target group:**

Students majoring and minoring in the History of Science and Ideas

**Prerequisites and co-requisites:**

Completion of the Basic Studies courses *Introduction to the Study of History* and *From the Basics of Methodology to Their Application*

**Recommended optional programme components:**

The course includes also Statistical Methods and Archive Skills (course registration in WebOodi, code 700320A).

**Recommended or required reading:**

*Manuale Historiae – Historianopiskelijän käsikirja*; other material handed out by the lecturer

**Assessment methods and criteria:**

Active attendance; exercises; and individual project

**Grading:**

**Voimassaolo:** 01.08.2017 -

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Markku Hokkanen

**Opintokohteen kielet:** Finnish

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5 ECTS credits / 135 hours of work

**Timing:**

1<sup>st</sup> year, autumn, period I and II

**Learning outcomes:**

Upon completion of the course the students will be familiarized with the qualitative methods used in researching history, culture and communication. The course provides students with the skills and capabilities needed for information retrieval, source criticism, planning and implementation of research (question setting, collecting and analyzing data), writing, presenting and critical discussion.

**Contents:**

Topics to examine and discuss include the nature of knowledge, especially scientific knowledge; frontiers between science and non-science; similarities and differences between the human sciences and the natural sciences; scientific argumentation; critical reading of sources; processes related to perception, inference and interpretation; research ethics and norms; publicity of science and open access; scientific communication; and the historical development of scientific thinking.

**Mode of delivery:**

Face-to-face teaching with the support of web-based teaching.

**Learning activities and teaching methods:**

Activating learning methods: Lectures, group work, online work /web-based teaching.

**Target group:**

Students of Degree Programme in History, Culture and Communication

**Prerequisites and co-requisites:**

-

**Recommended optional programme components:**

In History and in History of Science and Ideas: to be completed simultaneously with 700128A Qualitative Methods, Information Seeking, and Library Utilisation

**Recommended or required reading:**

-

**Assessment methods and criteria:**

Participation in the lectures as well as in the major subject section.

**Grading:**

0-5

Students majoring and minoring in the History of Science and Ideas

**Recommended or required reading:**

James E. McCellan III & Harold Dorn: Science and Technology in World History AND one of the following: Heikki Vuorinen: Taudit, parantajat ja parannettavat; George W. Stocking: Race, Culture, and Evolution. Essays in the History of Anthropology; Philip John Tyson, Dai Jones & Jonathan Elcock: Psychology in Social Context; Roger G. Newton: From Clockwork to Crapshoot: A History of Physics; Jonathan Conlin: Evolution and the Victorians: Science, Culture and Politics in Darwin's Britain

**Assessment methods and criteria:**

Examination and/or book exam, or some other way of completion agreed with the person responsible

**Grading:**

0–5

**Person responsible:**

Petteri Pietikäinen

**Working life cooperation:**

None

**700157A: History of Religious Ideas, 5 op**

**Voimassaolo:** 01.08.2015 -

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opintokohteen kielet:** Finnish

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish

**Timing:**

2<sup>nd</sup> – 3<sup>rd</sup> year

**Learning outcomes:**

Students will be able to define and distinguish between the notions of deity, the sacred, and the meaning of life of different religions. The students will also be able to analyse the significance of religion in itself as well as in relation to the scientific world view.

**Contents:**

The histories and ideas of world religions and the methods of conceptualising religiousness

**Mode of delivery:**

Contact teaching and/or independent study

**Learning activities and teaching methods:**

Lectures and/or book exam

**Target group:**

Students majoring and minoring in the History of Science and Ideas

**Recommended or required reading:**

Ilkka Pyysiäinen: Jumalten keinu: kiertoajelu uskontotieteessä AND one of the following: Ninian Smart: Uskontojen maailma or Karen Armstrong: Jumalan historia (A History of God)

**Assessment methods and criteria:**

Examination and/or book exam, or some other way of completion agreed with the person responsible

**Grading:**

0–5

**Person responsible:**

Ari Helo

**Working life cooperation:**

None

**700158A: History of Academic Institutions and Scientific Societies, 5 op**

**Voimassaolo:** 01.08.2015 -

**Opiskelumuoto:** Intermediate Studies

None

**700160A: Foundation of the history of science and ideas, 5 op****Voimassaolo:** 01.08.2017 -**Opiskelumuoto:** Intermediate Studies**Laji:** Course**Vastuuyksikkö:** Faculty of Humanities**Arvostelu:** 1 - 5, pass, fail**Opettajat:** Heini-Eliisa Hakosalo**Opintokohteen kielet:** Finnish**Voidaan suorittaa useasti:** Kyllä**ECTS Credits:**

5 ECTS credits / 135 hours of work

**Language of instruction:**

Finnish / English

**Timing:**

1st year, spring term

**Learning outcomes:**

Students become acquainted with the basic characteristics of research in the history of science and ideas and empirical research in the field of science and can describe the similarities and differences between the history of science and the history ideas.

**Contents:**

Students become acquainted with the basic research of the history of science and ideas and empirical "case studies"

**Mode of delivery:**

Contact teaching and/or independent study

**Learning activities and teaching methods:**

Lectures and/or book exam

**Target group:**

Students majoring and minoring in the History of Science and Ideas

**Prerequisites and co-requisites:**

It is recommended to complete this course after the course 700129A Introduction to the History of Science and Ideas (an archive course belonging to this course can be completed separately)

**Recommended optional programme components:**

700129A Introduction to the History of Science and Ideas and Archival Research

**Recommended or required reading:**

Mikko Myllykangas ja Petteri Pietikäinen (toim.): Ajatusten lähteillä. Aatteiden ja oppien historiaa; Richard Whitmore: What is intellectual history?

**Grading:**

0-5

**Person responsible:**

Heini Hakosalo

**Working life cooperation:**

None

**700167A: Courses in Related Fields of History of Science and Ideas, 5 op**

**Voimassaolo:** 01.08.2015 -

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Urpilainen, Erkki Juhani

**Opintokohteen kielet:** Finnish

**Voidaan suorittaa useasti:** Kyllä

**ECTS Credits:**

5

**Language of instruction:**

Finnish

**Timing:**

1st-3rd year

**Learning outcomes:**

Upon completion of the course, students will have a deeper understanding of the contents and methods of one of the related fields of History of Science and Ideas specified below.

**Contents:**

Studies from the fields of History, The Languages and Culture of the Antiquity, Environmental Studies in the Humanities, Japanese Studies or Art History

**Mode of delivery:**

Independent study or contact teaching

**Learning activities and teaching methods:**

Lectures, literature, and essays as agreed with the teacher responsible

**Target group:**

Students majoring in History of Science and Ideas

**Recommended or required reading:**

See the study guide of your chosen field. Additional material can be agreed upon with the teacher responsible.

**Assessment methods and criteria:**

Lecture exam and/or book exam and/or essays

**Grading:**

0-5

**Person responsible:**

Erkki Urpilainen

**Working life cooperation:**

None

### **700226A: Bachelor's Seminar and Thesis, 10 op**

**Voimassaolo:** 01.08.2009 -

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opettajat:** Urpilainen, Erkki Juhani

**Opintokohteen kielet:** Finnish

**ECTS Credits:**

10

**Language of instruction:**

Finnish

**Timing:**

Second and third year. The seminar begins in the spring term (period III) and ends in the autumn term (period I).

**Learning outcomes:**

Upon completion of the course, students can apply the methods of the History of Science and Ideas and complete an independent research project, and are capable of criticizing and discussing historical research. The Candidate's Thesis demonstrates the student's capability to prepare essays, dissertations and seminar presentations that fill the methodological, language, and content requirements of the subject.

**Contents:**

The course will result in a completed, independently designed Bachelor's Thesis from the field of the History of Science and Ideas (approx. 20 pages).

**Mode of delivery:**

Contact teaching and personal guidance

**Learning activities and teaching methods:**

Regularly scheduled seminar meetings

**Target group:**

Students majoring in History of Science and Ideas

**Prerequisites and co-requisites:**

Intermediate study courses: *Qualitative Methods, Information Seeking, and Library Utilisation, Introduction to the History of Science and Ideas* and *Archival Research* either completed or started.

**Assessment methods and criteria:**

Active participation to the seminar meetings (at least 10 meetings); completing and presenting a Bachelor's Thesis; acting as an opponent to a fellow student's work; active participation in seminar meetings; and a learning diary.

**Grading:**

The Thesis and Seminar participation are graded on a scale of 0–5

**Person responsible:**

Erkki Urpilainen

**Working life cooperation:**

None

**700224A: Maturity Test for Bachelor's Degree /History of Science and Ideas, 0 op**

**Voimassaolo:** 01.08.2005 -

**Opiskelumuoto:** Intermediate Studies

**Laji:** Course

**Vastuuyksikkö:** Faculty of Humanities

**Arvostelu:** 1 - 5, pass, fail

**Opintokohteen kielet:** Finnish

**ECTS Credits:**

0

**Language of instruction:**

Finnish/ Swedish (or native language)

**Timing:**

Third year, spring semester

**Learning outcomes:**

Students can write an essay, of high-level in content and language, in which they present the theoretical and methodological background and the central results of their thesis.

**Mode of delivery:**

Self study

**Learning activities and teaching methods:**

The Maturity Test can be written on a faculty exam date

**Target group:**

Students majoring in History of Science and Ideas

**Prerequisites and co-requisites:**

Submission and acceptance of a Candidate's Thesis required

**Assessment methods and criteria:**

An essay written in an exam setting
