

Opasraportti

Minor Subjects (2015 - 2016)

MINOR STUDIES 2015-2016

- The minor subjects offered by the Faculty vary year by year.
- As a rule, one group by minor subject is arranged.
- The size of a group is about 20 but no fewer than 10 students.
- An effort is made to guarantee a student's first choice within five years for all primary and kindergarten teacher students.
- A student can only be granted a single minor subject in the first round of applications.
- A student can be granted a maximum of two minor subjects in the minor subject selections of the same spring.
- All students studying for a basic degree are offered the possibility to complete two minor subjects within five years.
- No application is necessary for the minor subjects of sociology, women's studies and psychology.
- If the Faculty is offering minor subjects organised by the Open University, the course shall be a first or second minor subject that complies with the structure of the degree (multiculturalism, general theology, health education).
- Only minor subjects previously completed/started in the Faculty and Open University minor subjects financed by the Faculty are taken into account in the selection of minor subjects.
- Apply/register for study modules in other faculties as instructed by the faculties in question.

Criteria for minor subject selection

* Primary and early childhood education teacher students are given preference in the following minor subjects: pre-school and primary education (not for kindergarten teacher students), art, physical education, music, technical work, textile work, Finnish language and literature, and the cultural environments of early childhood.

Application for minor subjects takes place in the order of preference indicated by the students. If there are more than 20 applicants for a minor subject, the selection of students to the group is determined on the basis of the following criteria:

1. Student's rank of the choice
2. Minor subjects started/completed before
3. Progress in studies, starting year

Teaching in minor subjects

So far as contact teaching is concerned, all of the studies in a minor subject are arranged in the course of a single academic year.

Please note that the courses in Education in Transition, Multiculturalism and Educational Technology are in English, while the other subjects are mainly in Finnish.

- A257301 Drama education 25 credits
- A250507 Education for Intercultural Competencies 25 credits
- A250511 Education in Transition 25 credits
- A255102 Special education 25 credits
- A255202 Pre-school and primary education 25 credits
- A250504 Basic studies in education 25 credits

A250505 Intermediate studies in education 35 credits
 A255301 Basic studies in educational technology 25 credits
 A255402 Art 25 credits
 A255902 Handicrafts/technical work/technology 25 credits
 A256002 Handicrafts/textile work/technology 25 credits
 A255501 Physical education 25 credits
 A255601 Multiculturalism 25 credits
 A255702 Music 25 credits
 A212901 Basic studies in women's studies 25 credits
 A212902 Intermediate studies in women's studies 35 credits
 A250603 Basic studies in psychology 25 credits
 A250604 Intermediate studies in psychology 35 credits
 A211401 Basic studies in sociology 25 credits
 A211402 Intermediate studies in sociology 35 credits
 A791404 Basic studies in health education 25 credits
 A791407 Intermediate studies in health education 35 credits
 A257401 Cultural environments of early childhood 25 credits

Tutkintorakenteisiin kuulumattomat opintokokonaisuudet ja -jaksot

A255402: Art Education, 25 op

Compulsory

402713P: Pedagogy of Art, 5 op
 402714P: Visual Cultures, 5 op

 402109P: Challenges of Behaviour, 5 op
 402110P: Special Education and the Course of Life, 5 op

402128A: Teaching Practice II, 5 op

A255902: Technical Work (Oulu), 25 op

Compulsory

402258P: Material and Manufacturing Technology, 8 op
 402259P: Robotics and Automation, 7 op
 402260P: Technological Design, 2 op
 402261P: Technology and pedagogics, 5 op
 402262P: Educational Dimensions of Technology, 3 op

A256002: Textile work / Technology, 25 op

Compulsory

402320P: Product Design, 5 op
 402321P: Crafts and Technology Education, 5 op
 402322P: Textile Plane Structures: Weaving, 5 op
 402323P: Textile Plane Structures: Yarn Technics, 5 op
 402324P: Clothing, 5 op

A212901: Women's and Gender Studies, Basic Studies, 25 op

Compulsory

417113P: Basic course in women's and gender studies, 5 op

Student chooses 4 of the following courses

417114P: Power, normalization and social relations, 5 op

417116P: Sexuality and corporality, 5 op

417118P: Power, norm and resistance from perspectives of gender studies, 5 op

417121P: Popular culture and media, 5 op

417133P: Violence and the premises for compassion, 5 op

A212902: Women's and Gender Studies, Intermediate Studies, 35 op

These courses are mandatory. In addition to mandatory courses, student chooses 1 & 2 of the following specialisation areas.

417209A: Methodological approaches, 5 op

417214A: Gender Equality, Diversity, Non-Discrimination, 5 op

417211A: Practical Work in a Gender Responsible Development or Research Project, 5 - 10 op

Theoretical Orientation to Gender Studies

417207A: Feminist classics, 5 op

417208A: Advanced theoretical studies, 5 - 10 op

Violence and the Frames for Compassion and Non-Violence

417215A: Violence - Concepts, Practices and (Everyday) Interventions, 5 - 10 op

417216A: Sexual exploitation, trafficking and prostitution, 5 op

417217A: Practices for preventing and intervening in violence and constructing compassionate environments, 5 op

417218A: Equality and Compassion as Foundation for the Theory and Culture of Non-violence, 5 op

Gender in History and Culture Studies

417219A: Gender History, 5 op

417220A: Literature and Media Studies, 5 op

417221A: Cultural anthropology, 5 op

Globalisation and a Socially Sustainable Future

417222A: Sukupuoli ja globalisaatio pohjoisen perspektiivistä, 5 op

417223A: Finnish Family and Parenthood in Transition from the Local and International Points of View, 5 op

Opintojaksojen kuvaukset

Tutkintorakenteisiin kuulumattomien opintokokonaisuuksien ja -jaksojen kuvaukset

A255402: Art Education, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

25 cr

Language of instruction:

Finnish / English

Timing:

3rd or 4th year

Learning outcomes:

The aim of this study module is that the student knows how to

- design and implement art education and develop the school curriculum in grades 0 - 6
- apply working, data acquisition, interpretation and evaluation skills typical of visual arts

- develop curricula and experiment with and assess didactic and pedagogical applications and solutions for art education

Contents:

In this study module the student studies the theory of art education and visual arts, strengthening her/his individual artistic expression. Art is examined from the viewpoints of art education and aesthetics, and the manifestations of visual arts are considered as part of culture.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

The minor subject consists of five study modules:

402713P Pedagogy of Art, 5 credits

402714P Visual Cultures, 5 credits

402715P Visual Expression and Visual Thinking, 5 credits

402716P Form, Space and Environmental Education, 5 credits

402717P Media Education and Visual Communication, 5 credits

For more details, see the "courses" tab in the minor subjects guide

Target group:

Students selected to pursue studies in the minor of art in the Faculty of Education

Prerequisites and co-requisites:

Visual arts studies in the primary teacher students' multidisciplinary studies (6 credits) or visual arts studies in the early childhood education professional studies (5 credits)

Recommended optional programme components:

None

Recommended or required reading:

To be agreed on at the beginning of the courses

Assessment methods and criteria:

Active participation in face-to-face teaching, assignments

Read more about [assessment criteria](#) at the University of Oulu webpage.

Grading:

0 - 5

Person responsible:

Minna Myllykangas, Tapio Tenhu, Matti Lukkari

Working life cooperation:

None

Compulsory

402713P: Pedagogy of Art, 5 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

During the courses, students construct their individual conception of art and art education.

After the course student is able to

- review art education practices and history and assess the underlying conceptions
- assess the meaning of art education as part of the school's educational mission and examine children's development of visual thinking, perception, imagination and creativity in art education

Contents:

- art museums, exhibitions and art institutions as part of art education
- school curricula and different learning environments
- planning classroom practices
- the use of art pictures in teaching

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and small group sessions 45 h, independent work 90 h

The course consists of three parts:

1. Philosophical and practical approaches in art education (1 credit)
2. Art curriculum and themes (2 credits)
3. Art education project I (2 credits)

Target group:

Students selected for the minor of Art at the Faculty of Education

Prerequisites and co-requisites:

Art studies in the multidisciplinary studies for primary teachers (6 credits) or Art studies in the professional studies in early childhood education (5 credits)

Recommended optional programme components:

Art 25 cr

Recommended or required reading:

To be agreed on at the beginning of the course.

Assessment methods and criteria:

Active participation in contact teaching, completion of assignments

402714P: Visual Cultures, 5 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Student learns the basics of art history, styles, artists and chronology in art and architecture.

After the course student is able

- to identify the key features of art and architecture from prehistoric times to the present day.
- to analyze the meanings of images, language and structure and to consider the possibilities of visual communication and visual analysis in teaching

- to consider the individual, social and cultural meanings of art

Contents:

- art museums, exhibitions and art institutions as part of art education
- school curricula and different learning environments
- planning of teaching
- the use of art pictures in teaching

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and small group sessions 40 h, independent work 95 h includes an excursion

Target group:

Students selected for the minor of Art at the Faculty of Education

Prerequisites and co-requisites:

Studies in art in the multidisciplinary studies for primary teacher students (6 credits) or the Studies in art in the professional studies in early childhood education (5 credits)

Recommended optional programme components:

Art 25 cr

Recommended or required reading:

To be agreed on at the beginning of the course

Assessment methods and criteria:

Active participation in contact teaching, completion of assignments and portfolio. Read more about [assessment criteria](#) at the University of Oulu webpage.

3rd or 4th year

Learning outcomes:

After the course the student knows how to

- use the basic tools of media education

- analyze expressive and narrative means in media and visual communication and apply them to school education

Contents:

During the course the student is familiarised with the characteristics of digital video and different learning environments.

- Basics of photography: black-and-white technology and digital photography
- Basics of movie making; digital video and editing
- Typography and layout
- Digital paint and graphics software and image manipulation
- Programs used: Movie maker, Photoshop

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and small group sessions 50 h, independent work 85 h

The course consists of three parts:

1. Photography (2 cr)
2. Movie (1.5 cr)
3. Visual communication (Photoshop) (1.5 cr)

Target group:

Students selected for the minor of Art at the Faculty of Education

Prerequisites and co-requisites:

Art studies in the multidisciplinary studies for primary teacher students (6 credits) or art studies in professional studies in early childhood education (5 credits)

Recommended optional programme components:

Art 25 credits

Recommended or required reading:

To be agreed on at the beginning of the course

Assessment methods and criteria:

Active participation in contact teaching, exercises

411010A: Bachelor's thesis and seminar, 10 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

10 credits

Language of instruction:

Finnish

Timing:

3rd year

Learning outcomes:

After completion of the course, the student knows how to compose a research plan in the field of educational research and implement it using methodologies relevant to the research problem. S/he is able to take a part in academic debate and report on research work according to academic standards and principles.

Contents:

The course consists of two parts, a) and b):

- a) 411010A-01 Proseminar, during which the student prepares a research paper in a chosen area of education. In addition the seminar will focus on critical academic writing and functioning as an academic opponent.
- b) 411010A-02 Bachelor's Seminar, during which the students finish and finalises their Proseminar research papers in the form of the Bachelor's theses, and present them at a seminar meeting. Finally, the student completes a maturity test in the subject field of the research paper.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Seminar work 16 + 16 h

Target group:

Students majoring in Education (parts a and b)

Students minoring in Education (part a)

Recommended or required reading:

Literature related to seminar work

Assessment methods and criteria:

Seminar paper, presenting the paper, acting as an opponent

Leikkaavuudet:

ay411010A-01 Proseminar (OPEN UNI) 8.0 op

ECTS Credits:

8 credits

Language of instruction:

Finnish

Timing:

3rd year

Learning outcomes:

After completion, the student knows how to compose a research plan in the field of education and implement it using methodologies relevant to the research problem. The student is able to take a part in academic debate and report on research work according to academic standards and principles.

Contents:

The student prepares a research paper in a chosen area of education. The seminar will focus on issues such as academic thought, academic and theoretical research progress, setting research paradigms and knowing the basics of research methodology. In addition, the seminar will focus on critical academic writing

and acting as an academic opponent. In setting research paradigms, experimentally and developmentally minded attitudes are encouraged.

Mode of delivery:

Face to face teaching

Learning activities and teaching methods:

Seminar work 16 h, proseminar thesis.

Target group:

Students majoring and minoring in Education

Recommended or required reading:

Research literature pertinent to research topic

Assessment methods and criteria:

Active participation in seminars and the proseminar thesis.

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

10 credits

Language of instruction:

Finnish

Timing:

3rd year

Learning outcomes:

- the student is capable of critical and scientific writing and discussion
- the student is capable of constructive collaborative work, developing both his/her own and other students' scientific thinking

- the student knows how to apply one of the following thematic areas related to educational psychological research

1) counselling, consultation, psychotherapy in support of growth and development, 2) learning and learning difficulties, issues related to school and educational psychology, 3) questions of growth, development and interaction at different ages, and developmental disorders and their rehabilitation, 4) theoretical and methodological issues in educational psychology

Contents:

This course consists of 2 sections:

1. 412068A-01 Proseminar, during which the student prepares an independent study based on current literature on a topic of her/his own choice, or on a topic related to the research themes of the Developmental Psychology Research Unit. In the seminar sessions the student is advised on critical academic discussion and writing.
2. 412068A-02 Bachelor's Seminar, during which the student finalizes the proseminar research paper in the form of a Bachelor's thesis, presents it in a seminar, and writes a maturity test on the thematic area of the study.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Seminar work, acting as an opponent, presentation of one's own paper

Prerequisites and co-requisites:

Basic Studies in Psychology

Recommended optional programme components:

The course is a final part of the intermediate studies

Recommended or required reading:

Literature on the seminar topic

Assessment methods and criteria:

Seminar paper, presentation of one's own thesis

A255301: Digital Technologies in Teaching and Learning, 25 op**Opiskelumuoto:** Basic Studies**Laji:** Study module**Vastuuyksikkö:** Faculty of Education**Arvostelu:** 1 - 5, pass, fail**Opintokohteen kielet:** Finnish**ECTS Credits:**

25 cr

Language of instruction:

Finnish, partly English

Timing:

1st to 5th years

Learning outcomes:

After completion of the Introductory Studies in Educational Technology, the student knows how to

- Identify the core concepts and theoretical frameworks in learning and educational technology
- Use technology to support learning and evaluate its pedagogical usability
- Design technology-enhanced learning
- Plan, implement and evaluate educational projects
- Work and study efficiently in teams
- Reflect on and present his/her own expertise in a digital portfolio

Contents:

Minor Studies in Educational Technology are an essential part of LET Master's Degree Programme. It is also a valuable minor subject for any other students who aim to work with learning, education and technology. The minor studies produce knowledge and skills that are essential in working life today. In these studies the students learn to know the basics of Learning Sciences and the field of educational technology. The goal of the studies is to learn to understand the processes of learning, supporting it with various instructional and technological tools. The studies are based on recent learning research and theoretical knowledge of learning. In these studies the students apply this knowledge to design technology-enhanced learning and implement an educational project. The studies are implemented with various methods, and working and studying in different groups has a major role in the studies. Learning is reflected throughout the studies in each student's personal digital portfolio.

The study module consists of the following courses:

- 418019P Introduction to learning and educational technology 5 credits
- 418020P Learning theory and educational use of technology 7 credits
- 418021P Designing technology-enhanced learning 7 credits
- 418022P Educational projects 6 credits

Mode of delivery:

Face-to-face + online teaching

Learning activities and teaching methods:

The studies in educational technology focus on self-direction, collaborative knowledge construction and approaches surpassing science boundaries. Both face-to-face and online working methods are used, including small group sessions, self-study, lectures, expert sessions, discussions and workshops.

Target group:

Minor subject students in Educational Technology

Prerequisites and co-requisites:

-

Recommended optional programme components:

-

Recommended or required reading:

The learning materials to be used in the courses are evaluated and selected annually. The materials represent both the most central theoretical background in the field and its most recent scientific research. The students choose some of the materials themselves depending on the content of the learning assignments.

Assessment methods and criteria:

Active participation in the courses

Language of instruction:

English/Finnish

Timing:

autumn 2013

Learning outcomes:

After completion of this course, the student knows how to

- describe the basic concepts of learning sciences and educational technology
- name some of the major research topics in the field of learning sciences and technology enhanced learning
- identify and discuss contemporary issues in educational technology in global and local educational contexts
- use contemporary educational software and hardware, and also evaluate those pedagogical usability
- create a digital portfolio in the form of a personal journal in a weblog

Contents:

- Basic concepts of instruction, learning and technology enhanced learning
- Introduction to the field of learning sciences and technology enhanced learning: objectives, research subjects and theoretical framework
- Reflection on one's own learning and expertise
- Pedagogical use of contemporary educational software and hardware

Mode of delivery:

Face-to-face and online

Learning activities and teaching methods:

Face-to Face 50h

Collaborative and individual learning 80 h

In this course the students familiarise themselves with the theoretical background, core concepts, and contemporary tools of educational technology. The course introduces the students to the field of learning sciences and examines the role of learning and educational technology in a globalised world. One central goal of this course is to learn to use and evaluate technologies in a pedagogically meaningful way. In this course students start to reflect on their own learning and expertise in a digital portfolio.

Target group:

1st year students on the LET Master's Programme

Educational Technology minor students

Other students (as a part of their optional studies)

Prerequisites and co-requisites:

no

Recommended or required reading:

- How People Learn: Brain, Mind, Experience, and School: Expanded Edition. (2000). Washington, DC: The National Academies Press.
- and/or other contemporary readings in the field of learning and educational technology, to be announced at the beginning of the course.

Assessment methods and criteria:

Active participation in face-to-face teaching and collaborative and independent work. Successful completion of all the learning assignments and exercises.

Essi Vuopala

418020P: Learning Theory and Pedagogical use of ICT, 7 op

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

7 ECTS

Language of instruction:

English/Finnish

Timing:

Autumn term, 1st year studies in the LET Master's Programme

Learning outcomes:

After completion of this course, the student knows how to

- identify the theoretical principles underlying technology-enhanced learning
- define the concepts of self-regulated learning, collaborative learning and learning of expertise
- describe the use of technology to support such learning
- justify pedagogical use of technology by using current theoretical knowledge of learning

Contents:

- Self-Regulated Learning
- Collaborative Learning and Computer-Supported Collaborative Learning (CSCL)
- Learning of Expertise
- Supporting learning with technology

Mode of delivery:

face-to-face and online

Learning activities and teaching methods:

Face-to-face 30 h

Collaborative and individual learning 157 h

The course includes three theoretical viewpoints on learning: self-regulated learning, collaborative learning, and learning of expertise. The goal of the course is to understand these theoretical principles of learning and comprehend the possibilities to support such learning with technology. Students reflect on their theoretical knowledge and their own learning process in their digital portfolio

Target group:

1st year students on the LET Master's Programme

Educational Technology minor students

Other students (as a part of their optional studies)

Prerequisites and co-requisites:

no

Recommended optional programme components:

no

Recommended or required reading:

- How People Learn: Brain, Mind, Experience, and School: Expanded Edition. (2000). Washington, DC: The National Academies Press.
- Boekaerts, M. Pintrich, P.R. & M. Zeidner, M. (Eds.), (2000). Handbook of Self-Regulation. San Diego, CA: Academic Press.
- Spada E. & Reiman, P. (Eds) (1996). Learning in Humans and Machine: Towards an interdisciplinary learning science. Oxford: Elsevier.
- Bereiter, C. & Scardamalia, M. (1993). Surpassing ourselves: An Inquiry Into the Nature and Implications of Expertise. Open Court Publishing Company.
- and/or other contemporary readings in the field of learning and educational technology, to be announced at the beginning of the course.

Assessment methods and criteria:

Active participation and collaborative and independent work. Successful completion of all the learning assignments and exercises.

418021P: Designing Technology-Enhanced Learning, 7 op

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5/7 ECTS

Language of instruction:

English/Finnish

Timing:

Spring term, 1st year studies in the LET Master's Degree Programme; 1st year studies in the EdGlo Master's Degree Programme

Learning outcomes:

After completion of this course, the student knows how to

- describe the theoretical background and main stages of designing technology-enhanced learning (TEL)
- design a TEL course
- justify and evaluate instructional and technological design

Contents:

- Technology-Enhanced Learning (TEL) as a concept
- Designing TEL: instructional and technological design
- Structuring individual and collaborative learning activities
- Implementing and evaluating TEL

Mode of delivery:

Face-to-face and online

Learning activities and teaching methods:

Face-to-face / online 32h

Collaborative and individual learning 150h

Students become familiar with the key concepts, theories and approaches of technology-enhanced learning (TEL) and implement this knowledge by designing their own course in small groups. Students reflect and report on the different stages of the design process in a digital portfolio.

Target group:

1st year students on the LET Master's Programme
1st year studies in the EdGlo Master's Degree Programme
Educational Technology minor students
Other students

Prerequisites and co-requisites:

No

Recommended optional programme components:

No

Recommended or required reading:

Contemporary readings in the field of technology-enhanced learning, to be announced at the beginning of the course

Assessment methods and criteria:

Active participation in face-to-face teaching and collaborative and independent work. Successful completion of all the learning assignments and exercises.

Grading:

0-5

Person responsible:

Essi Vuopala

Working life cooperation:

No

Other information:

The students in the Master's Degree Programme in Education and Globalization (EdGlo) join the same face-to-face sessions in their own 5-credit course "Designing Technology-Enhanced Learning".

EdGlo students will be informed about their specific tasks in the beginning of the course.

418022P: Educational Projects, 6 op

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

6 ECTS

Language of instruction:

English/Finnish

Timing:

Spring term, 1st year studies in the LET Master's Programme

Learning outcomes:

After completion of this course, the student knows how to

- plan and implement an educational project
- work responsibly as a member of a project team in collaboration with a client
- apply theoretical knowledge of learning to solve practical challenges in educational working contexts
- report and inform different target groups on the project

Contents:

- Basics of project work
- Planning, implementation and administration of projects
- Educational projects
- Technology in support of project work

Mode of delivery:

Face-to-face and online

Learning activities and teaching methods:

Face-to-face 40h

Collaborative and individual learning 120h

In this course the students implement an educational project for a local company, school or other organization. The students design, implement and report on the project in a project group under the teacher's guidance. In this course the students learn about project work in theory and practice. Students reflect and report on different phases of their project work in their digital portfolio.

Target group:

1st year students on the LET Master's Programme

Educational Technology minor students

Other students (see the prerequisites below)

Prerequisites and co-requisites:

Before joining this course, the student should have completed the following courses:

418019P *Introduction to Learning and Educational Technology*

418020P *Learning Theory and Pedagogical Use of Technology*

Recommended optional programme components:

no

Recommended or required reading:

Contemporary readings in the field of learning, educational technology and educational projects, to be announced at the beginning of the course

Assessment methods and criteria:

Active participation in face-to-face and collaborative and individual learning. Successful completion of all the learning assignments and exercises.

A257301: Drama Education, 25 op**Voimassaolo:** 01.08.2011 -**Opiskelumuoto:** Basic Studies**Laji:** Study module**Vastuuyksikkö:** Faculty of Education**Arvostelu:** 1 - 5, pass, fail**Opintokohteen kielet:** Finnish**Leikkaavuudet:**

ayA257301 Drama education (OPEN UNI) 25.0 op

ECTS Credits:

25 credits

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Having completed the study module, the student

- is familiar with the theoretical foundations of drama education
- knows how to teach theatre and applied drama in different learning environments and contexts
- knows how to work as a drama teacher
- is able to justify his/her activities as a drama teacher
- understands the field of research in drama education

Contents:

Drama Education is an experiential subject with elements of art education. The students learn and study the means of drama and theatre in teaching and education. The studies do not focus on traditional theatrical expression, as drama as a subject is built on sociocultural and collaborative learning, emphasizing the participatory, integrative and investigative role of dramatic action.

The periods of action in the studies are linked to theory through learning assignments. In this way there is an alternation between group work and individual learning in the learning process. Through the development of a student's own skills, a practical-theoretical orientation to teaching drama is built, a general picture of the various working methods and genres in drama education is created, and the basics of doing and directing expressive, participatory and applied drama are studied. Teachership is approached from viewpoints combining different professional images: teacher-dramaturge, teacher-director, teacher-actor.

After the basic studies (25 credits), the student can submit an application for the intermediate studies (35 credits) in drama education.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures, exercises/drama and theatre projects, artistic and written learning assignments, seminar, visits /excursion, literature circle and/or exam

Target group:

Students selected for the minor in Drama Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

The minor in Drama Education (25 credits) consists of the following courses

- 402525P Introduction to Drama Education 5 credits
- 402526P Dramaturgy 5 credits
- 402527P Theatre and Drama Education 5 credits
- 402521P Process and Applied Drama 5 credits
- 402528P Drama Teacher as a Researcher 5 credits

Recommended or required reading:

Course-specific literature, handouts and supplementary literature to be agreed on later.

Assessment methods and criteria:

Description provided course by course.

402525P: Introduction to Drama Education, 5 op

Voimassaolo: 01.08.2014 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5 credits

Language of instruction:

Finnish

Timing:

Autumn term (1st period)

Learning outcomes:

- knows how to define drama education as part of education and teaching
- outlines the history of drama education and its connections with the history of theatre and to the development of drama pedagogy mainly from the 20th century to the present day
- knows the main concepts of the dramatic learning process and the meaning of improvisation
- understands the principle of genre thinking
- understands the meaning of theatre language, roles and group processes in drama work

Contents:

Introduction to the studies and basic concepts: serious playfulness, aesthetic doubling, aesthetics of incompleteness, drama contract, improvisation, the genres of expressive, participatory and applied drama in education

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

28h

- Basics of Drama Education 1 credit
- Improvisation 1 credit
- Learning assignment: on the map of drama education 3 credits

Lectures, exercises, work in a reading circle, independent work: reading literature, exam/literature circle, learning assignment

Target group:

Students selected to pursue studies in the minor of drama education

Prerequisites and co-requisites:

None

Recommended optional programme components:

- 402526P Dramaturgy 5 credits
- 402527P Theatre and Drama Education 5 credits
- 402521P Process and Applied Drama 5 credits
- 402528P Drama Teacher as a Researcher 5 credits

Recommended or required reading:

Assignment-specific literature and instructions for using source materials are discussed with the students at the start of the course

- HEIKKINEN, H. 2005. Draamakasvatus - opetusta, taidetta, tutkimista! Jyväskylä: Minerva.

Yes. Drama workshop for children or young people

402528P: Drama Teacher as a Researcher, 5 op

Voimassaolo: 01.08.2014 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5 credits

Language of instruction:

Finnish

Timing:

- A whole academic year – an integrative reflection / learning assignment for the entire academic year
- At the end of the 2nd period, reflection on learning diary from the autumn term, 1 credit (instructions given at the start of the course)
- At the end of the 4th period, an integrative final project in connection with a seminar, 4 credits

Learning outcomes:

Having completed the course, the student

- knows how to describe and analyse his/her own theory-in-use as a drama teacher
- knows how to reflect on his/her own and the student group's activities
- identifies drama education as an independent phenomenon and way of thinking in education and art education
- understands the research methods of drama education
- is knowledgeable about current studies in drama education and knows the position of his/or her study in the field of research

Contents:

Basics of the theory of drama education and educational philosophy, differences and similarities of drama and theatre education; drama education as a playful learning world, the theory-in-use in drama teaching, and viewing the principles of research to drama education through the writing of a theory-in-use. The course starts first thing in the autumn with a learning diary, and continues throughout the year, with a focus on perceiving the student's own drama teachership.

Mode of delivery:

Face-to-face teaching and independent work

Learning activities and teaching methods:

Period 2: 4 h

Period 3: 4 h

Period 4: 8h (visits will be arranged)

Lectures and independent work: learning diary and reading literature (literature circle); visits and/or excursion and seminar; written and/or theatrico-artistic final project

Target group:

Students selected to pursue studies in the minor of drama education

Prerequisites and co-requisites:

- 402525P Introduction to Drama Education 5 credits
- 402526P Dramaturgy 5 credits
- 402527P Theatre and Drama Education 5 credits
- 402521P Process and Applied Drama 5 credits

A250507: Education for Intercultural Competencies, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

Min 25 credits

Language of instruction:

English or other, depending on the study context

Timing:

Free: Minor in Bachelor's degree or in Master's degree

Learning outcomes:

407508A Comparative Education (10 cr)

- Demonstrate deepened knowledge and broadened perspectives of comparative education on the basis of earlier Special level studies for Bachelor's degree.

407530P Internship (5 cr)

- The student gains experience and knowledge about working in an intercultural context and develops his /her professional skills and cultural competencies, which is demonstrated in a carefully drafted practice plan and a reflective report on the internship, attached to the student's pedagogical portfolio

407531P Selected literature (5 cr)

- The student deepens his/ her expertise by studying advanced academic literature, reflecting upon the studied texts and making concise comments on them in the reading journal.

407532P Optional (5 cr)

- The student deepens his/her knowledge of the issues that are relevant to the student's professional development and/or research interests.

Contents:

The Comparative education component consists of lectures on Nordic countries, Baltic states, Russia, and some European countries. Comparative education for the Minor includes studies above the 7 credits which are part of Intermediate studies for Bachelor's degree.

The Internship should focus on global education and/or intercultural issues in the field of education. The Internship must be planned in advance and the plan must be accepted by the supervisor. After the internship period the student hands in the practice report to the supervisor.

For the Selected literature module, student chooses the materials for reading out of a list provided by the responsible teacher and writes a report on the studied texts.

Optional studies may include planning and implementing a project or a practice in Finland or abroad that would develop the student's intercultural competences.

Mode of delivery:

Face-to-face teaching and independent work

Learning activities and teaching methods:

Lectures, seminars, essays, practice, individual studies in Finland and/or abroad, study reports

Target group:

ITE students

Prerequisites and co-requisites:

No

Recommended optional programme components:

Comparative education courses (7 cr) are also part of the Special level studies. Credits above 7 can be used to complete the Minor Studies.

Recommended or required reading:

To be negotiated and confirmed with the responsible teachers

Assessment methods and criteria:

See course descriptions

Grading:

Pass/fail except Selected literature 0-5

Person responsible:

Maria-Liisa Järvelä

Working life cooperation:

Yes, Internship; Optional depending on student's choice of activities

*Electives***407508A: Comparative Education, 10 op**

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

7 credits

Language of instruction:

English and Finnish

Timing:

1st year spring; 2nd year autumn; 2nd year spring

Learning outcomes:

- Discuss educational systems, policies and practices in different countries
- Examine the relationship between culture, society and education
- Identify the main ideas of comparative research tradition

Theme 1: Nordic countries (including the Sami and the Roma)

- Discuss educational systems, policies and practices in the Nordic countries in relation to different historical, geographic and demographic circumstances
- Examine the relationship between culture, society and education with a special focus on the northern dimension
- Identify trends in Nordic societies affecting planning, implementing and evaluating education

Theme 2: Russia and the Baltic states

- Discuss educational systems, policies and practices in the Nordic countries in relation to different historical, geographic and demographic circumstances
- Examine the relationship between culture, society and education with a special focus on post-Soviet transition societies
- Identify trends in transition societies affecting planning, implementing and evaluating education

Theme 3: Europe

- Discuss educational systems, policies and practices in Europe in relation to different historical, geographic and demographic circumstances

- Examine the relationship between culture, society and education with a special focus on the impact of the EU
- Identify trends in European societies affecting planning, implementing and evaluating education with special reference to minorities and stateless nations

Contents:

The module consists of three content areas:

- Theme 1: Nordic countries (2 – 5 credits)
- Theme 2: Russia and the Baltic states (2 – 5 credits)
- Theme 3: Europe (History of Europe; the EU and its educational policy) (3 – 7 credits)

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

- Theme 1: 16 h lectures and seminars
- Theme 2: 32 h lectures and seminars
- Theme 3: 60 h lectures and seminars

Target group:

Intercultural Teacher Education students

Prerequisites and co-requisites:

No

Recommended optional programme components:

The credits above 7 can be used to complete the minor subject Education for Intercultural Competencies A250507 (Comparative Education 407508A)

Recommended or required reading:

Theme 1: One of the following:

- Darnell, F. & Höem, A. (1996) Taken to Extremes. Education in the Far North.
- Ahonen, S. & Rantala, J. (eds.) (2001) Nordic Lights. Education for Nation and Civic Society in the Nordic Countries, 1850-2000
- Arter, D. (2008) Scandinavian politics today

Theme 2: Articles and documentary films.

Theme 3: For reference purposes:

- Davies, N (1997) Europe: a history
- Minahan, J. (2000) One Europe, many nations

The availability of the literature can be checked from [this link](#).

Assessment methods and criteria:

Active participation in the seminars, study journals, essays, exams.

Grading:

0 - 5

Person responsible:

Theme 1: Maria-Liisa Järvelä

Theme 2: Maria-Liisa Järvelä

Theme 3: Maria-Liisa Järvelä

407530P: Internship, 5 op

Voimassaolo: 01.08.2006 -

Opiskelumuoto: Basic Studies

Laji: Practical training

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

5 credits

Language of instruction:

English

Timing:

Free; negotiated with the teacher tutor

Learning outcomes:

The aim is to learn about the work in an intercultural context and to develop the professional skills increasing the student's cultural competences

Contents:

The Internship should focus on global education and/or intercultural issues in the field of education. The Internship must be planned in advance and the plan must be accepted by the supervisor. After the internship period the student hands in the practice report to the supervisor.

- Demonstrate competence in organizing a practice placement independently
- Analyze adequately the learning outcomes, challenges and successes of the internship period
- Design a practice report included in Pedagogical portfolio

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

The student finds the place for the internship independently. The student negotiates the agreement with the representatives of the practice place and hands in the plan to the supervisor at the university before the internship , and the report after the internship

Target group:

ITE students

Prerequisites and co-requisites:

Knowledge of the contents of the separate courses of the Minor, and of the overall aim of the Minor

Recommended optional programme components:

Other courses in Intercultural competences:

- 407508A Comparative Education (10 cr)
- 407531P Selected literature (5 cr)
- 407532P Optional (5 cr)

Recommended or required reading:

To be negotiated and confirmed with the supervisor

Assessment methods and criteria:

Accepted plan, practice report and the internship itself

Grading:

Pass/fail

Person responsible:

Maria-Liisa Järvelä and Gordon Roberts

Working life cooperation:

Yes

407531P: Selected Literature, 5 op

Voimassaolo: 01.08.2006 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

5 credits

Language of instruction:

English

Timing:

Free

Learning outcomes:

The aim is to provide the student with an opportunity to develop his/ her expertise by studying advanced academic literature, reflecting upon the read material and making concise comments on it in the reading journal.

Contents:

For the Selected literature module, student chooses the materials for reading out of a list provided by the responsible teacher and writes a report on the studied texts.

- Apply critical literacy to analyze the selected literature
- Demonstrate competence in discussing conceptual issues based on the individually selected literary sources
- Summarize the discussion on the studied texts in an academically valid written report

Mode of delivery:

Independended studies only

Learning activities and teaching methods:

Student's independent work. Advanced reading is selected from the list of set books, one book from each of the four topical areas. The reading journal should consist of comments on each 4 books (2 – 3 pages /book), altogether 8 – 10 pages.

Target group:

ITE students

Prerequisites and co-requisites:

No

Recommended optional programme components:

Other courses in Intercultural competences:

- 407508A Comparative Education (10 cr)
- 407530P Internship (5 cr)
- 407532P Optional (5 cr)

Recommended or required reading:

A selection of suggested reading

Assessment methods and criteria:

The reading journal

Grading:

0 - 5

Person responsible:

Maria-Liisa Järvelä and Gordon Roberts

Working life cooperation:

No

407532P: Optional, 5 op**Voimassaolo:** 01.08.2006 -**Opiskelumuoto:** Basic Studies**Laji:** Course**Vastuuyksikkö:** Faculty of Education**Arvostelu:** 1 - 5, pass, fail**Opintokohteen kielet:** English

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

5 credits

Language of instruction:

English or other, depending on the study context

Timing:

Free

Learning outcomes:

The aim is to provide the student with an opportunity to deepen the knowledge of the issues that are relevant for the student's professional development and/or research interests.

Contents:

Optional studies may include planning and implementing a project in Finland or abroad that would develop the student's intercultural competences. Studies carried out abroad can also be accepted as Optional studies.

- Recognize the need for additional training in any of the competence areas
- Plan and carry out individually designed study module in Finland or abroad

Mode of delivery:

The student takes part in a project or organizes a practice placement independently, or takes part in courses offered by educational institutions at home or abroad

Learning activities and teaching methods:

Prior agreement with the tutor concerning the content and method of the planned activities. Course work negotiated individually by the student and the co-ordinator.

Target group:

ITE students

Prerequisites and co-requisites:

No

Recommended optional programme components:

Other courses in Intercultural competences:

- 407508A Comparative Education (10 cr)
- 407530P Internship (5 cr)
- 407531P Selected literature (5 cr)

Recommended or required reading:

Depending on the student's option, relevant literature suggested by the student and/or the course convener.

Assessment methods and criteria:

Depending on the student's option. Pre-hand planning before and reporting after the project or practice. Course work as required.

Grading:

Pass/fail

Person responsible:

Maria-Liisa Järvelä or another staff member depending on the student's field of interest.

Working life cooperation:

Yes, if the student's option is doing a practice or taking part in projects related to working life.

A250511: Education in Transition, 25 op

Voimassaolo: 01.08.2006 -

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

25 credits

Language of instruction:

English

Timing:

Minor - Education in Transition, 25 ECTS credits

407530A Defining Education, Educational Sciences and their Tasks 5 ECTS credits, autumn semester

407531A Technology-Enhanced Learning 5 ECTS credits, spring semester

408502S Development and Education 5 ECTS credits, spring semester

407532A Economics of Education 5 ECTS credits, autumn semester

407519A Societies and Education in Transition 5 ECTS credits, autumn semester

Learning outcomes:

- Identify the main issues and sub-areas of educational sciences: history of education, psychology of education, philosophy of education, didactics, sociology of education, special education, and comparative education.
- Discuss the impact of globalisation on educational contexts at local and global levels.
- Summarise current debates related to education in the globalised world.
- Critically analyse the production of knowledge in relations of power in North-South dialogue.

Contents:

Minor subject: A250511 Education in Transition (25 ECTS credits) consists of the following compulsory courses:

- 407530A Defining Education, Educational Sciences and their Tasks 5 ECTS credits
- 407531A Technology-Enhanced Learning 5 ECTS credits
- 408502S Development and Education 5 ECTS credits
- 407532A Economics of Education 5 ECTS credits
- 407519A Societies and Education in Transition 5 ECTS credits

Please see individual course descriptions.

Mode of delivery:

Contact teaching, blended learning, online learning

Learning activities and teaching methods:

Learning activities include exams, portfolio assignments, study reports and journals etc. (details provided in the individual course descriptions). Teaching activities include contact teaching and online tutoring.

Target group:

Priority is given to students in Master's Degree Programme in Education and Globalisation (EdGlo).

Prerequisites and co-requisites:

Please see individual course descriptions.

Recommended optional programme components:

Please see individual course descriptions.

Recommended or required reading:

Please see individual course descriptions.

Assessment methods and criteria:

Assessment is based on various learning activities and the grades of final exams. These learning activities may include portfolio assignments, study reports and journals etc. (details provided in each course description).

Read more about [assessment criteria](#) at the University of Oulu webpage.

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

5 credits

Language of instruction:

English

Timing:

1st year, autumn semester

Learning outcomes:

After completion of the course, students are able to

- Discuss the focuses, the role and the tasks of educational sciences in the globalised world
- Analyse learning theories
- Examine the relation between the development of educational sciences, critical changes and educational contexts

Contents:

- The main concepts and phenomena of education
- The sub-disciplines of educational sciences: psychology of education, philosophy of education, didactics, sociology of education, special education and comparative education
- Learning theories

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

30h lectures/seminars, 105h independent study

Target group:

1st year students in the Master's Degree Programme in Education and Globalisation

Prerequisites and co-requisites:

None

Recommended optional programme components:

Other courses in Education in Transition:

407531A Technology-Enhanced Learning, 5 credits

407532A Economics of Education, 5 credits

407519A Societies and Education in Transition, 5 credits

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

5 credits

Language of instruction:

English

Timing:

1st year, spring semester

Learning outcomes:

After completion of the course, students are able to

- Describe the theoretical background, ethical considerations and main stages of designing technology-enhanced learning (TEL)
- Design a globally and culturally relevant TEL course
- Justify and evaluate instructional and technological design

Contents:

- Technology-Enhanced Learning (TEL) as a concept
- Designing TEL: instructional and technological design
- Structuring culturally relevant individual and collaborative learning activities
- Implementing relevant technology and evaluating learning from individual, cultural and societal perspectives

Mode of delivery:

Face-to-face and online teaching

Learning activities and teaching methods:

Face-to-face and on-line teaching 32h, collaborative and independent study 103h

Students become familiar with the key concepts, theories and approaches of Technology-Enhanced Learning (TEL) and implement this knowledge by designing a course of their own in small groups. Students reflect and report different stages of the designing process in their digital portfolios.

Target group:

1st year students in the Master's Degree Programme in Education and Globalisation

Other students pursuing minor subject studies in "Education in Transition"

Prerequisites and co-requisites:

Completion of 1st year, autumn semester courses

Recommended optional programme components:

Other courses in Education in Transition:

5 credits

Language of instruction:

English

Timing:

1st year, spring

Learning outcomes:

After completion of the course, students are able to

- Distinguish between different ideological frameworks for development and education, development education, and discuss Finnish and international policies and debates in the field of development and education
- Discuss possibilities for sustainable education sector development co-operation Identify the current trends of the UNESCO Education for All (EFA) initiative
- Discuss the challenges of implementation of EFA, and the Millennium Development Goals (MDGs)
- Critically examine approaches to partnerships and education that promote problematic ethnocentric, depoliticised, ahistorical and paternalistic patterns Summarise emerging educational theories that promote an ethical relationship to individuals and communities who have historically been marginalised and use educational theory to create informed pedagogical practices
- Identify challenges and opportunities for partnerships in working in countries labelled 'less economically developed'

Contents:

- Development approaches and education
- Sustainable development as political, social, cultural, ecological, ethical, and economical concept
- The United Nations Millennium Development Goals
- UNESCO Education for All initiative
- Ethnocentrism, depoliticisation, ahistoricism and paternalism in development approaches and education
- Current debates and new approaches in 'development education'
- Practicing education for sustainable development and development education
- Finnish and International policies of development and development education
- Working in countries labelled 'less economically developed'

Mode of delivery:

Blended learning and face-to-face teaching

Learning activities and teaching methods:

Lectures and seminars 20 h, 14 h seminars, reading and assignment preparation 81 h

Target group:

- Students enrolled in the Master's Degree Programme in Education and Globalisation pursuing minor studies "Education in Transition"
- Other students pursuing minor studies "Education in Transition"

Prerequisites and co-requisites:

No

A250505: Education, Intermediate Studies, 35 - 50 op

Opiskelumuoto: Intermediate Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ayA250505 Education, Intermediate Studies (OPEN UNI) 35.0 op

ECTS Credits:

35-45 credits

Language of instruction:

Finnish

Timing:

2nd to 3rd year

Learning outcomes:

At the end of the module, the student knows how to apply the approaches and theoretical foundations of educational and human sciences to research pedagogical phenomena. S/he is capable of independent scientific argumentation and Bachelor level academic work. S/he is also able to acquire knowledge in a flexible way and capable of analytical written work.

Contents:

The module consists of the following courses:

411004A Educational and Cultural Theory I, 4 credits

411005A Theoretical Foundations of Education, 5 credits

407040A Basic course in quantitative research 5 credits

407040A-01 Basis of research, lecture 2

407040A-02 Statistical analysis, lecture 2

407040A-03 Exercises 1

407041A Basic course in qualitative research 5 credits

407041A-01 Lectures 2

407041A-02 Exercises 3

411007A Educational Systems I, 4 credits

411008A Educational Planning and Economics of Education I, 4 credits

411010A Bachelor's Thesis, 10 credits. The course consists of two parts (a and b):

a) 411010A-01 Proseminar, 8 credits

b) 411010A-02 Bachelor's Seminar, 2 credits

411014A Paths to working life, 4 credits

411015A Project training, 4 credits

The Bachelor's seminar, Paths to working life and Project training are part of the major subject studies.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and other face-to-face teaching

Target group:

Students of Ed. Sci

Prerequisites and co-requisites:

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

2nd to 3rd years

Learning outcomes:

Having completed the course, the student knows how to elucidate and compare the philosophical arguments of the main theoretical trends of education as well as their problems and strengths. The student understands the meaning of fundamental theoretical assumptions and commitments in educational research. The student is capable of scientific argumentation and discussion.

Contents:

- historical turning points in educational theory
- basic philosophical and theoretical foundations of main areas of education (empirico-analytical, hermeneutic, critical, pragmatic)
- recent trends and their epistemologies

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 24 h, exercises 16 h. The lectures and exercises constitute a uniform whole. The exercise groups study in depth the themes of the lectures through discussion, argumentation and reflection.

Target group:

Ed. sciences students

Prerequisites and co-requisites:

ay407040A Basic course in quantitative research (OPEN UNI) 5.0 op

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

2. or 3. year

Learning outcomes:

Having completed the course, the student knows how to

- define the basic ideas in the approaches and methods of research in the human sciences from the viewpoint of different traditions of science
- plan and implement the main stages of a simple quantitative study
- evaluate and interpret quantitative studies conducted by others

Contents:

The course is divided into three parts:

407040A-01 Basis of research (2 cr.)

- basic features of empirico-analytical research
- role of theory in research
- main stages of the research process
- formulating and shaping the research question
- types of research
- data collection
- accountability/reliability analysis

407040A-02 Statistical analysis (2 cr.)

- description of one- and two-dimensional empirical distribution
- foundations of statistical deduction
- estimation
- statistical testing

407040A-03 Exercises (1 cr.)

- enhancing knowledge of content areas in 1 and 2

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

1. Lectures 18 h
2. Lectures 18 h
3. Exercises: Small group sessions 14 h

Target group:

Students in all programmes pursuing Intermediate Studies in Education (/Music Education)

Prerequisites and co-requisites:

None

Recommended optional programme components:

Thesis studies support the writing of a Bachelor's thesis

Recommended or required reading:

Metsämuuronen, J. (2003). Tutkimuksen tekemisen perusteet ihmistieteissä (s. 1-146).

411008A: Introduction to the Economics of Education, 5 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Kimmo Kontio

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay411008A Introduction to the Economics of Education (OPEN UNI) 5.0 op

ECTS Credits:

4 ECTS credits

Language of instruction:

Finnish

Timing:

2nd year

Learning outcomes:

Having completed the course, the student perceives the connection between pedagogical institutions on the one hand, and work, division of work and labour markets on the other. The student identifies the stressed relationship between the thinking represented by modern educational theory and economic thinking. The student knows how to evaluate the fundamental theories and models related to the relationship between pedagogical institutions and labour markets as the basis for educational planning, and gets to know the main research areas in educational economics.

Contents:

During the course the students are introduced to the basics of educational planning and the economics of education. In addition, the interdependent relationship between decision-making on educational systems and economic decision-making is investigated.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Contact teaching 20 h.

Target group:

Students of Education subject studies

Prerequisites and co-requisites:

Basic studies

Recommended optional programme components:

Course is part of subject studies in education

Recommended or required reading:

To be agreed on at the beginning of the course.

Assessment methods and criteria:

Participation in seminar work and preparing a seminar work.

411014A: Paths to Working Life, 5 op

Voimassaolo: 01.08.2013 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay411014A Paths to working life (OPEN UNI) 4.0 op

ECTS Credits:

4 ECTS cr

Language of instruction:

Finnish

Timing:

2.- 3. year

Learning outcomes:

The student

- identifies her/his own interests by studying education, thereby also piecing together her/his major and minor subject choices and professional identity
- is capable of adding to her/his self-knowledge
- knows how to acquire knowledge in a flexible way
- perceives the opportunities offered by education and working life (minor subjects, practice periods, Masters thesis, exchange programmes, worklife requirements, jobs, etc.)
- knows how to describe and evaluate the field of educational work and working life in general
- knows how to evaluate elements of working life such as worklife competences, general skills and coping
- is able to consider her/his placement in working life

Contents:

This course provides the students with a readiness to begin to reflect on their own professional identity. During the course the students add depth to their personal study plans from the viewpoint of working life.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Seminar work 32 h: brainstorming, discussion, exercises, and independent work.

Alternatively, the course can be completed in some other way, e.g. an assignment based on literature as agreed with the course coordinator.

Target group:

Students majoring education and educational psychology

Prerequisites and co-requisites:

Basic and subject studies of the major subject

Recommended optional programme components:

Preceeds the course 411015A Project training

Recommended or required reading:

As applicable:

Lampikoski, T. (1998). Urasuunnittelun opas. Tulevaisuus mahdollisuutena.

Yes. One-week-practice period in one working place.

Other information:

This course is completed within the major subject studies.

A250504: Education, Basic Studies, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ayA250504 Education, Basic Studies (OPEN UNI) 25.0 op

ECTS Credits:

25 ECTS credits

Language of instruction:

Finnish or English

Timing:

At the start of studies in education (in most programmes, 1st year, in secondary teacher education, 3rd and 4th years)

Learning outcomes:

At the end of the module, the student is expected to be able to analytically understand and describe pedagogical phenomena connected with the various stages and situations in a human being's growth as well as pedagogical interaction in different areas of the educational field. To understand and describe these phenomena, s/he knows how to use the basic concepts and theories in the classic fields of education and knowledge on the historical

development of educational activity and thinking The student also knows how to use various academic study and working methods and is able to conduct independent literary work and is getting oriented to educational expertise and research.

Contents:

Consists of the following courses:

[410067P](#) Basic Course in Education: Phenomenon, Theories and Practices of Education, 4 credits

[410068P](#) Didactics: Basics of Learning and Teaching, 4 credits

[410069P](#) Educational Psychology: Growth, Development and Learning, 4 credits

[410070P](#) Sociology of Education: Society, Educational Institutions and Social Interaction, 4 credits

[410071P](#) Educational Philosophy: Education as a Philosophical and Ethical Issue, 4 credits

[410072P](#) Pedagogical Research Seminar, 5 credits

The courses are divided into the following areas:

1. The study module is started with an orientation in "Basic Course in Education: Phenomenon, Theories and Practices of Education".
2. The next four courses comprise the content areas of the module, and the student can freely choose the order in which s/he studies them.
3. The applied course entitled "Pedagogical Research Seminar" is delivered differently in the various degree programmes. The student applies what s/he has learnt in the content courses, assuming a particular orientation depending on her/his educational and personal interests.

Mode of delivery:

Face-to-face and mixed teaching

Learning activities and teaching methods:

Lectures and seminar sessions

Target group:

Students pursuing major or minor studies in education

Prerequisites and co-requisites:

None

Recommended optional programme components:

None

Recommended or required reading:

To be announced in connection with the courses

Assessment methods and criteria:

Exams, written assignments (a variety of individual or group assignments can be used depending on the situation)

ECTS Credits:

4 credits

Language of instruction:

Finnish or English

Learning outcomes:

The students are familiar with the main areas of educational philosophy and how they give rise to educational problematisation and question formulation as well as research and results. The students know how to analyse and solve ethical and philosophical problems in education and teaching and are able to critically assess previously suggested solutions.

Contents:

- Educational philosophy as an area of educational sciences
- the nature of philosophy as a science, philosophical questions and the most important sub-areas.
- Objectives in education
- Historically important trends in academic study of educational philosophy
- Ethical nature of education, training and teaching, and ethical issues in pedagogical activity

Mode of delivery:

Lectures and other face-to-face teaching 18 h, independent work 89 h

Learning activities and teaching methods:

Lectures and other teaching 18 h and independent studies.

Target group:

Students in all programmes pursuing Basic Studies in Education (25 credits).

410072P: Pedagogical Research Seminar, 5 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay410072P Pedagogical Research Seminar (OPEN UNI) 5.0 op

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

5 ECTS

Language of instruction:

Finnish

Timing:

Varies depending on the programme: during or at the end of the basic studies in education

Learning outcomes:

After the course, the student

- perceives the various areas of education and the relations between them
- is familiar with educational research and the basics of scientific writing
- has an understanding of the relationship between pedagogical theory and practice

In addition, students in the primary teacher education programmes in particular

- know how to gather observation data on social interaction in the classroom
- identify issues underlying changes in teachership
- know how to apply knowledge of the pupils in pedagogical activity as a teacher
- know how to present their pedagogical theories-in-use
- know how to compose a report based on observation data to discuss classroom observations from theoretical and practical viewpoints
- see the goals for the course Orientation to Practice 410072P-2 (formerly 410075P), 2 credits

In addition, students in the early childhood education programme in particular know how to

- explain the nature of the area of early childhood education research in the field of different sciences
- specify and evaluate different theoretical trends in early childhood education
- identify and assess the ethical basis of early childhood education research
- face different children and identify and assess the need for three-tier support in early childhood education
- summarise scientific text and discuss current research themes in early childhood education

Contents:

Research being carried out in the Faculty, expertise based on it, contents of a seminar paper based on the student's own interests, feedback and discussions related to it.

Mode of delivery:

Face-to-face and blended teaching, seminar sessions

Learning activities and teaching methods:

Varies by the degree programme. See the subcodes.

Target group:

Students in all programmes pursuing the Basic Studies in Education (25 credits).

Prerequisites and co-requisites:

Basic course in education

Recommended optional programme components:

The course is the final course in the Basic Studies in Education (25 credits), and in the primary teacher education programmes it is closely linked to Orientation to School Work and to studies in educational psychology and, in secondary teacher education, in special education.

Recommended or required reading:

E.g. Siljander, P. & Kivelä, A. (Eds) (2008). *Kasvatustieteen tila ja tutkimuskäytännöt: paradigmat katosivat, mitä jäljellä?* (applicable parts).

410072P-03: Orientation to Work at School, 2 op

Voimassaolo: 01.08.2013 -

Opiskelumuoto: Basic Studies

Laji: Partial credit

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

2 ECTS cr

Language of instruction:

Finnish

Timing:

First year, Bachelor level

Learning outcomes:

After completion of the course, the student is able to:

- report on the activities of a class
- critically describe his/her conception of teachership and education
- assess the activity of a class by means of observation
- understand the contents and significance of curricula in school education

Contents:

School experience orientation is a part of the studies in the major subject at the Bachelor level. It is also a part of the pedagogical studies in teacher training. All the student teachers complete this practice period, irrespective of prior work experience.

The principal theme of this practice period is the pupil as a member of the classroom community.

The aim is for the students to build upon the themes and their individual levels of understanding of Pedagogical Seminar I by working in a concrete classroom context. In addition, this practice period introduces the students to the curriculum and its flexible implementation in teaching.

School experience orientation offers the students a guided opportunity to investigate child development and interaction in a classroom environment, as well as relevant socio-cultural phenomena, based on study assignments formulated in Pedagogical Seminar I. In the School experience orientation period, the students are introduced to the teaching profession by participating in the teaching and learning activities of their own student class groups and those of neighbouring classes (cells).

Place: Oulu Teacher Training School, grades 0-6.

Duration of the period: two calendar weeks

Mode of delivery:

School Work

Learning activities and teaching methods:

Description of the activities: During Orientation to School Work, the student works together with the staff of the Teacher Training School and his/her fellow students.

The student observes and monitors the activity in the class based on the learning assignments agreed on in Pedagogical Seminar I. The student gets to know school as a growth and learning environment and is familiarised with the school curriculum, especially its general part.

The period starts with a cell-specific joint planning session, discussing the course and supervision arrangements and agreeing on the working classes where the planning continues. The planning is attended by all the persons taking part in the school work period. During this period, the student gets to know the class and carries out the monitoring tasks given in Pedagogical Seminar I.

There are 40 hours of activities tied to a time and place in this period, consisting of the following:

- In cooperation with Liikenneturva, the students in each class give a traffic education lesson to the pupils. There is a two-hour lecture on the contents of this lesson at a time to be specified later.
- The students also give small-scale simultaneous teaching, small group teaching or a jointly implemented teaching episode or lesson.
- In addition to the above, the students also monitor the activities in their own and neighbouring classes for a total of 36 hours.

Supervision: General supervision in Orientation to School Work is provided by the primary school principal at the Teacher Training School. Tutoring in a student's class or for a group of students is provided by specifically appointed class teachers. Tutoring in the major subject studies focuses on supervision of the practice period in Pedagogical Seminar I.

Information seminar: School experience orientation will begin with an information meeting to be held in the canteen for the grades 0-6 at the Teacher Training School.

Assessment: The class teacher assesses the student's performance on the scale pass/fail based on assessment discussions and the pedagogical portfolio. An entry on a "pass" is made in the practice card. The card is also signed by the staff member who delivered Seminar I. There are specific instructions available on the composition and contents of the pedagogical portfolio. Its composition is also discussed in Pedagogical Seminar I.

A fail may need to be retaken or supplemented. A failed school experience period can be retaken twice. There are specific instructions on supplementation or retakes. If a registration for the period is not cancelled, it is considered a fail.

Evaluation seminar: At the end of the Orientation to School Work, an evaluation seminar is organised at the Teacher Training School to analyse the fulfilment of the goals for the period and to discuss how the experiences can be utilised for future school experience periods. The seminar is attended by all the persons who contributed to the school experience period. A secretary chosen from among the students keeps minutes in the evaluation seminar, and the document is delivered to the members of the school experience team in electronic form within one week of the seminar.

Target group:

Primary teacher education (not ITE-students)
Special Education

Prerequisites and co-requisites:

Participation in Orientation to School Work also requires participation in Pedagogical Seminar I.

Recommended optional programme components:

Pedagogical Seminar I

Recommended or required reading:

None

Assessment methods and criteria:

Work placement

Person responsible:

Vesa-Matti Sarenius, Auli Halme, Erkki Pekkala, Markku Juopperi, Outi Takalo

Working life cooperation:

Yes.

Other information:

Registration: Registration for the autumn period is by the end of September, and for the spring period by the end of previous November. The registration takes place via Weboodi.

University student must show **extract from their criminal record**, if studies involve practice with minor children. **Please take care that you have shown extract from criminal record before the practice begins.**

410072P-04: Pedagogical Seminar I: Knowing the Pupils and Interaction, 3 op

Voimassaolo: 01.08.2013 -

Opiskelumuoto: Basic Studies

Laji: Partial credit

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

3 ECTS cr

Language of instruction:

Finnish

Timing:

1st year

Learning outcomes:

Upon completion of the course, the student

- identifies knowledge of pupils as learners as a dialogical relationship and as a continuous process
- identifies the most important group phenomena in the classroom and knows how to observe interaction between pupils
- knows how to describe his/her pedagogical theory-in-use and how to critically describe and reflect on his/her views on teaching and education
- knows how to apply his/her pedagogical expertise in a diversified, attentive and pupil-centred manner in different interaction situations
- is familiar with research on classroom interaction

Contents:

- changing knowledge in educational and development psychology, especially the traits of the growth and development of children at school age, but also the theories in which these traits are seen as socially produced
- familiarisation with classical sociological studies that apply or develop theories by observing classroom situations
- pedagogical portfolio as a tool for reflection on the development of your own teachership: aims of the portfolio and starting to compile one

Taika-students: The seminar focuses on the arts and crafts education perspective in learner growth and development and the study of interactive and socio-cultural phenomena in the classroom. We learn how to identify the opportunities provided by the arts in deepening the teacher-student relationship.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Small group teaching 24 h/ self-study 56 h

The student works on her/his portfolio also in a blog environment between the face-to-face meetings

Target group:

Primary Teacher Ed and Special Ed Students

Prerequisites and co-requisites:

Basic Course in Education, Didactics

Recommended optional programme components:

Pedagogical Seminar I is part of a module formed by "Educational Psychology", "Sociology of Education" and "Orientation to School Work". Integrating the themes of these courses, students focus on studying the pupils' growth and development as well as interaction and sociocultural phenomena in the classroom. The pedagogical seminars I-III form a continuum in which the essential viewpoint is the student's comprehensive professional growth into a critical, reflective and inquiring teacher.

Recommended or required reading:

Sovitaan opintojakson alussa

Assessment methods and criteria:

Active participation in contact teaching, completion of assignments and pedagogical portfolio

410072P-05: Pedagogical Seminar in Technology Education I, 3 op

Voimassaolo: 01.08.2013 -

Opiskelumuoto: Basic Studies

Laji: Partial credit

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

3 ECTS cr

Language of instruction:

Finnish

Timing:

1st year

Learning outcomes:

After the course the student knows how to plan and carry out teaching episodes based on research on technology education. The students knows hwo to analyse and evaluate teaching situations and reflect on the phenomena and issues taking place in them from the viewpoint of technology education.

Contents:

Familiarisation with technology learning with a focus on educational psychology. The inquiring teacher and significance of awareness of pupil needs in primary school.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Small group sessions 20 h, individual teaching 16 h, work placement 2 h.

The seminar focuses on the technology learning process when the pupils are supposed to learn some technological entity. Making use of a self-made assembly kit, a teaching episode is planned and carried out, with literature produced on technology education research providing the theoretical basis. The teaching episode is analysed based on this, and the results of the analysis are presented in the form of a learning diary.

Target group:

Technology oriented primary teacher education

Prerequisites and co-requisites:

None

Recommended optional programme components:

405024Y Introduction to Theoretical Foundations and Practics in Technology Education, 407034A Pedagogical Seminar in Technology Education II, 408023S Pedagogical Seminar in Technology Education III, 406040A Crafts / Technical Work and Technology

Recommended or required reading:

Technology Education literature, self-produced educational materials

Assessment methods and criteria:

Literature, production and testing of learning materials at school, preparation of a pedagogical portfolio.

Read more about [assessment criteria](#) at the University of Oulu webpage.

Grading:

Pass/ fail

Person responsible:

Matti Lindh

Working life cooperation:

Yes. The course includes giving a teaching session at school (2 h).

410072P-06: Research Seminar, Education, 5 op

Voimassaolo: 01.08.2013 -

Opiskelumuoto: Basic Studies

Laji: Partial credit

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5 ECTS cr

Language of instruction:

Finnish

Learning outcomes:

Having completed the course, the student

- has an understanding of the contents of and mutual relations between the courses in the Basic Studies in Education.
- has familiarised him/herself with current educational research especially in his/her own faculty.
- knows how to design, produce and evaluate scientific texts.

Contents:

Current educational research

Mode of delivery:

In the Education Programme, face-to-face teaching scheduled to last an entire study year. E.g. lectures on current research themes by researchers in the research group *Theory and Philosophy of Education* followed by discussion based on the lectures and production of a learning portfolio. *In the Open University*, lectures and seminar.

Learning activities and teaching methods:

Lectures and seminar sessions, 20 h. In the Education Programme, to be implemented as a 2-hour lecture session at the end of each basic studies course, with 10 hours of seminar sessions at the end of the course in which the students present their learning portfolios.

Target group:

Students pursuing the Basic Studies in Education

Prerequisites and co-requisites:

no

Recommended optional programme components:

The course links together the various courses in the Basic Studies in Education (25 credits).

Recommended or required reading:

As applicable Siljander, P & Kivelä, A. (toim.) (2008). Kasvatustieteen tila ja tutkimuskäytännöt. Paradigmat katosivat, mitä jäljellä?

You can check for the availability of the course books [here](#).

Assessment methods and criteria:

Active attendance in lectures is recommended, while a 80% class attendance is required in the seminars. The student composes a learning portfolio to study the core contents of the courses in the basic studies based on the 2-hour lectures arranged at the end of each basic studies course. In the portfolio written on the basis of these lectures given by researchers, the student shows that s/he has understood the main contents of the basic studies course, and also outlines his/her own research interests and specific educational viewpoints. The student is expected to discover for him/herself a meaningful and topical theme for further educational research. The portfolios are presented, discussed and assessed in the seminar groups. The portfolios are based on the researchers' lectures, the course materials in the basic studies, and supplementary literature as agreed individually based on the focus of each student's portfolio. There is more information on the [grading of studies](#) in the university's website.

In the Open University, the course is implemented as a lecture providing an introduction to seminar work, in which the student composes a report for a research plan, on the basis of which the course grade is given.

402956P: Improving Health Through Nutrition, 5 op

Voimassaolo: 01.08.2010 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay402956P Improving Health Through Nutrition (OPEN UNI) 5.0 op

ECTS Credits:

5 credits

Language of instruction:

Finnish

Timing:

The course is held in the spring semester

Learning outcomes:

Objectives of the course:

- identify health eating habits and individual and social factors influencing ways to use food

- evaluate factors related to the promotion of healthy eating habits and weight control among differently aged people
- name national health problems caused by nutrition
- give examples of special diets

Contents:

- possibilities and means of schools to promote good nutrition among school aged children and adolescents
- nutritional guidelines
- nutrition and weight management
- special diets

Mode of delivery:

web-based teaching

Learning activities and teaching methods:

Web-based teaching/independent study.

Target group:

Open university students, school teachers and subject teachers, health care professionals, minor subject students in all faculties

Prerequisites and co-requisites:

none

Recommended optional programme components:

The course is an independent entity and does not require additional studies carried out at the same time.

Recommended or required reading:

Aro, A., Mutanen, M. & Uusitupa M. (eds.) (2005). Ravitsemustiede. Helsinki, Duodecim.

Borg, P., Fogelholm, M. & Hiilloskorpi, H. (2004). Liikkujan ravitseminen. Helsinki, Edita.

Valtion ravitsemusneuvottelukunta (2014). Terveyttä ruoasta! Suomalaiset ravitsemussuosituksset 2014.

Other contemporary readings announced at the beginning of the course.

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ayA791407 Health Education, Intermediate Studies (OPEN UNI) 35.0 op

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

35 credits

Language of instruction:

Finnish

Timing:

2.-5. year

Learning outcomes:

Having completed the subject studies, the student is able to explain factors related to the health and welfare, health behavior, health challenges and health promotion of different population groups, especially children and adolescents. The student also knows how to evaluate his/her ability to reinforce the health knowledge of children and adolescents and how to build the contents of health education teaching and learning in a goal-oriented way. S/he also knows how to evaluate their relationship to the promotion of health at school and to develop their own activities in promoting health.

Contents:

The module consists of the following courses:

- Drugs and Health (5 ECTS cr)
- Physical Exercise in Promoting Health
- School as a promoter of inclusion and life management of children and adolescents 402952A (5 ECTS cr)
- Supporting Sexual Growth And Development (5 ECTS cr)
- Oral Health (5 ECTS cr)
- Advanced Course in the Didactics of Health Education (5 ECTS cr)
- Thesis (5 ECTS cr)

Mode of delivery:

web-based teaching

Learning activities and teaching methods:

online studies, independent work

Target group:

Students pursuing studies in the minor of Health Education

Prerequisites and co-requisites:

none

Recommended optional programme components:

no

Recommended or required reading:

To be announced for each specific course

Assessment methods and criteria:

Participation in teaching, written work, participation in online discussions, learning assignments, exams

A255601: Multiculturalism, Basic Studies, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

Leikkaavuudet:

ayA255601 Multiculturalism, Basic Studies (OPEN UNI) 25.0 op

ECTS Credits:

25 ECTS

Language of instruction:

The teaching language is English. Written work may be submitted in English or Finnish.

Timing:

September 2014 – May 2015, University lecture times
1600-2000 (starting 4:30PM)

Learning outcomes:

The aim of multicultural education and research is

- to understand the interplay between culture and identity
- to increase information about the significance of culture to the individual's development, construction of identity, lifestyle, and values.
- to increase knowledge of different cultures
- to increase understanding of difference
- to provide competencies for working in a multicultural environment

Contents:

The multiculturalism studies are based on a multidisciplinary research and approach. An intercultural approach is constructed on the perception of the significance of one's own cultures and an attempt to understand the cultures of others.

Students are encouraged to self-direct their learning and personally engage in it.

The courses include:

- 417010P Introduction to Multiculturalism (5 ECTS) Autumn 2014
- 417013P Multicultural Finland (5 ECTS) Autumn 2014
- 417014P Multicultural and International Oulu: Visits and Working Life (5 ECTS) Autumn 2014– Spring 2015
- 417012P Cultural Anthropology and Cultural Geography (5 ECTS) Spring 2015
- 417017P Seminar (5 ECTS) Spring 2015

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures, group work, seminars, visits, internship

Target group:

University of Oulu Students, Open University Students

Prerequisites and co-requisites:

None

Recommended optional programme components:

None

Recommended or required reading:

Available from Optima workspace. The link and the password will be provided in the start of the course.

Assessment methods and criteria:

Essays, learning journals, films, presentations

Voimassaolo: 01.08.2006 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

Leikkaavuudet:

ay417014P Multicultural and International Oulu: Visits and Working life(OPEN UNI) 5.0 op

ECTS Credits:

5 ECTS credits / 135 hours of work

Language of instruction:

Lectures are in English, coursework may be submitted in English or Finnish.

Timing:

The course starts with an introductory lecture in the fall semester (October) and ends in the spring (April/May) to give the students enough time to organise the visits and the working practice. However, if required, it is possible to complete the course during one semester.

Lectures are at 1630-2000

Learning outcomes:

Upon completion of the course, the student will be able to:

- Identify a variety of multicultural activities taking place in Oulu
- Discuss issues related to multicultural and international Oulu
- Identify and explain strategies for successfully working in a multicultural environment
- Discuss multicultural theories in relation to practices/activities in a chosen field
- Effectively participate as a team member
- Write a report

Contents:

- Familiarisation with a wide variety of multicultural activities, depending on students' own interests
- Attending events organised in Oulu and visit places students find interesting from a multicultural perspective.
- Familiarisation with multicultural aspects of working life through a working practice approximately 35-60 hours (two options).

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

10 h lectures / 50 h visits / total 85 h working practice and report writing.

Target group:

This course is available through the Open University and Faculty of Education, as a standalone module or 5

ECTS towards Multiculturalism (25 ECTS) minor ayA255601.

Studies completed at the Open University prepare participants for academic studies and count towards a degree for students at the university.

Prerequisites and co-requisites:

The Open University provides the chance to study regardless of age or prior education. The instruction at the Open University is equivalent to the basic instruction given at the University of Oulu.

Recommended optional programme components:

The course can be an independent entity and does not require additional studies carried out at the same time.

LINKS TO RELATED COURSES:

Introduction to Multiculturalism (5 ects)

Cultural Anthropology and Cultural Geography (5 ECTS)

Multicultural Finland (5 ECTS)

Seminar (5 ECTS)

Completion of the five courses is required for students to be awarded the minor subject Multiculturalism (25 ECTS) ayA255601

Recommended or required reading:

Study materials are confirmed at the beginning of the module

Assessment methods and criteria:

The course is assessed based on active participation in lectures (minimum 80% attendance), planning visits, visits (minimum 10), and a written report based on visits.

A255702: Music, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

25 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Having completed the course, the student is able to

- analyse the possibilities of music as a tool to reinforce the identity, integrate the emotional life and construct the community.

The student knows

- how to use music in a varied way to support learning and the child's development in general education.

The student is capable

- to evaluate her/his pedagogical competence as a broadly based music educator especially in the grades 0-6.
- of developing and applying various functional working methods to music education in its constantly changing scope of work.
- knows how to play music in the field of different musical styles, genres and practices. These include studies in instruments and singing, music technology, musicology and integrative project studies.

Contents:

The music minor consists of pedagogically inclined studies, which cover, comprehensively, different work methods in music education and pedagogy in the grades 0-6.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

This course consists of five units, each of 5 credits:

- Introduction to music (5 credits)
- Development of musicianship (5 credits)
- Pedagogy of music (5 credits)
- Development as a music educator (5 credits)
- Recent musical phenomena (5 credits)

Target group:

Students selected for the minor of Music Education (25 ECTS cr) at the Faculty of Education

Prerequisites and co-requisites:

Music education studies in the primary teacher students' multidisciplinary studies (7 credits) or in early childhood education professional studies (5 credits)

Recommended optional programme components:

Music minor studies 25 ECTS credits

Recommended or required reading:

Recent literature to be agreed on at the beginning of the courses

Assessment methods and criteria:

Active participation in face-to-face teaching, completion of individual assignments. Participation in exams and matinees.

Mode of delivery:

Intensive course, face-to-face teaching

Learning activities and teaching methods:

Lessons 2h, small group sessions 22 h, examination 2h and independent work 50h.

Target group:

Students selected for the minor of Physical Education at the Faculty of Education

Prerequisites and co-requisites:

No

Recommended optional programme components:

Other courses in the Physical Education study module

Multidisciplinary studies in the subjects and crosscurricular themes taught in basic education

Recommended or required reading:

Material dealt out in the course

Assessment methods and criteria:

Active participation

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay402365P-05 Teaching Sports I and II: Water Sports (OPEN UNI) 2.0 op

ECTS Credits:

2 ECTS cr

Language of instruction:

Finnish

Timing:

Spring semester

Learning outcomes:

The student

- knows how to describe the basic skills and knowledge in swimming required by teaching in grades 0-6 of basic education
- is able to swim crawl, backcrawl and breast stroke
- is able to dive 4m depth
- is able to rescue someone from water
- is able to jump from 1 m spring board and 3 meter platform
- is able to plan and execute a swimming lesson with primary school children

Contents:

During course the basic techniques of swimming are practiced. Water rescue, elementary diving and depth diving are also trained. It is possible to do the swimming instructor course by SUH.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

4h lectures and demonstrations 24h. Exam 2h. Individual work 30h including training of techniques and planning of teaching exercise. Analyzing ones' own swimming techniques on video.

Target group:

Students selected for the minor of Physical Education at the Faculty of Education

Prerequisites and co-requisites:

No

Language of instruction:

Finnish

Timing:

Spring semester/ 2. period

Learning outcomes:

The student

- knows how to describe the basic skills and knowledge in skating required by teaching in grades 0-6 of basic education
- knows the meaning use of the blade of the skate
- knows different ways to slide on skates
- is able to skate forward, backward and stop
- is able to waltz jump when assisted
- knows the basic rules of rinkbandy and ringette

Contents:

During the course skating skills are developed starting from elementary skills and proceeding to forward and backward circle skating. In the game part of the course small and normal game forms with pug, ball and ringette are played. Skill test is the figure 8 skating.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

2h lecture and demonstrations 16 h. Individual work 20 h including home exam and analyzing ones' own skating on video

Target group:

Students selected for the minor of Physical Education at the Faculty of Education

A255202: Preschool and Primary Education, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ayA255202 Preschool and Primary Education (OPEN UNI) 25.0 op

ECTS Credits:

25 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

On completion of the package students are able to observe and recognize the world of pre-school and primary (grades 1 and 2) children as well as their individual and developmental characters, and is able to pay attention to them when they guide the preschool and primary (grades 1 and 2) children's learning process in different content areas.

Students are able, using the national core curriculum, to create an integrated research-based curriculum, which leads to the development of the children's problem solving and collaboration processes.

Students are able apply a diversity of the theoretical, didactic and ethical principles involved in pre-school and primary education (grades 1 and 2) in order to support the children`s growth, development, and learning

Students are able meet and interact with children and their parents in a pedagogically sensitized way.

Contents:

These studies cover a wide range of theoretical and practical issues in preschool and primary level education which relate to teaching, learning, growth and development. When applicable, teaching methods which bind together the different content areas presented in the courses, are used.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Courses

- 402155P Child's Growth and Development (3cr)
- 402156P Arts and Crafts Education/Stories in Opening Experience and Understanding (7cr)

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay402156P Arts and Crafts Education/Stories in Opening Experience and Understanding (OPEN
UNI) 7.0 op

ECTS Credits:

7 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Student:

- can design and take into the practice the suitable methods in handcraft teaching for primary grades 0-2
- is able to design, implement and develop art education in grades 0-2
- can explicate the meaning of physical education for development of a child in grades 0-2
- is able to create motor coordinationaly stimulating physical education environments taking into consideration facilities, seasons and different skill levels of children in grades 0-2
- understands the significance of experience in facilitating learner comprehension in children
- has an advanced outlook of comprehensive and expressive music education, in which play, stories and art interaction are emphasized
- has the capacity to understand and implement music education, especially for students aged 6-8
- learns methods to implement arts and crafts education in an integrated manner

Contents:

The core of the course lies in stories, through which studies in arts and crafts education (visual arts, handicraft, music and physical education) are combined in a project as an experiential, creative entity. The studies focus on deepening the different perspectives of different subjects when teaching small children. The students also work on a pedagogical portfolio on aspects of children's culture.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

The course consists of several parts. The integrative project combines these parts together.

The course includes the following parts:

Handicrafts: Technical/Textile 9 h + 9 h

Arts 20 h

Music Education and Guitar Playing 15 h

Physical Education 14 h

Children's Dance 8 h

Project 10 h

In addition to these contact teaching lessons, there about 100 h of independent work

Active participation in teaching and the portfolio together form an entity that earns a pass.

Target group:

Students selected for studies in the minor of Preschool and Primary Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

The course is part of the minor of Preschool and Primary Education (25 credits)

402156P-05: Music Education, 1,5 op

Voimassaolo: 01.08.2005 -

Opiskelumuoto: Basic Studies

Laji: Partial credit

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

1.5 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

The goal is to deepen the student's comprehensive view of music education, with a focus on play, fairytales and interartisticity. The course aims at giving abilities to understand and implement music education with special attention on the speciality of children aged 6-8.

Contents:

The most essential thing in this course is to concentrate on making different musical journeys rich in experience and to consider their meanings from the student's own and (pre)primary children's point of view.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Teaching 14 h, children's dance 4 h

Target group:

Minor subject students in Preschool and Primary Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

Minor subject of Preschool and Primary Education (25 cr)

Recommended or required reading:

Hongisto-Åberg - Lindeberg-Piironen - Mäkinen. (1993) *Hip hoi musioi. Käsikirja* Fazer-musiikki.
Other literature as agreed.

ay402156P-06 Physical Education (OPEN UNI) 1.5 op

ECTS Credits:

1.5 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

The goal is to achieve a basic competence to teach physical education in different exercise environments in grades 0-2 of basic education. The student also needs to understand the special characteristics of physical education in preschool and primary education.

Contents:

- Taking exercise in a playful manner; by means of play, fairytales and imagery, children are taught the basic motor skills that provide the basis for later skills in different sports.
- Supporting the child's overall development; promoting cognitive, socio-emotional and psychomotor learning.
- Training in group exercise and action methods and concepts related to physical exercise.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

10 h of exercises, 4 h of familiarisation with field work and 4 h of children's dance (4 h of children's dance is also included in Music Education).

Target group:

Students selected for the minor of Preschool and Primary Education.

Prerequisites and co-requisites:

None

Recommended optional programme components:

Other parts of 402156P Arts and Crafts Education and the integrative project.

Recommended or required reading:

Numminen, Pirkko (1999) *Kuperkeikka varhaiskasvatuksen liikunnan didaktiikkaan*

ECTS Credits:

12 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

The course consists of areas in mother tongue (especially learning to read and write), environmental and nature studies, religion and maths. Each area is approached from the perspective of the child's exploring mind and behaviour, in which the aspects of solving problems important to the child and learning to learn are central.

Contents:

The course consists of the following parts:

- Mother Tongue (Finnish) / Riitta-Liisa Korkeamäki
- Religion and World Views/ Markku Salakka
- Mathematics and science education/ Vesa-Matti Sarenius, Anne Pellikka

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures, small group teaching, independent work. Details on the number of hours under the subcodes.

Target group:

Students selected for studies in the minor of Preschool and Primary Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

Course is a part of the minor of Preschool and Primary Education (25 cr)

Recommended or required reading:

To be agreed on for each course.

ay402157P-01 Domestic Language (OPEN UNI) 5.0 op

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

The student

- knows the main features of the child's process of learning written language.
- knows how to link the learning process with relevant teaching practices.
- has a basic knowledge of the methods of teaching to read
- knows how to choose suitable children's literature for his/her teaching and how to select a suitable method for processing each book
- can utilise digital learning environments in teaching children to read and write

Contents:

- Central concepts and theories in learning to read and write

- Models of learning guidance
- Different types of text
- Mother tongue integration with other subjects, and project work
- Participation in a research project in the field

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and exercises 48 h, independent work 85 h

Target group:

Students selected for studies in the minor of Preschool and Primary Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

Other courses in the minor of Preschool and Primary Education (25 credits)

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

After the practice period the student will be able to:

- can explain learning theories concerning mathematics and science education
- can describe what is child centered mathematics and science education and can apply this knowledge in pre- and early primary education.
- can explain the following mathematics contents:
 - sorting, patterning and classifying,
 - concept of number,
 - geometry, measurement and spatial thinking and
 - can apply this knowledge when in pre- and early primary education.
- can explain the concepts of science education through experimenting, conceiving, conception emphasizing, thoughtful and dialogical approaches
- can explain most common natural phenomena and apply what is learned when working in pre- and early primary education.
- Is able to analyse mathematics and science in pre- and early primary education with inquiry based manner

Contents:

The course contains science and mathematics education contents in pre- and early education and child as an inquirer. In this course the students are also familiarized to the teaching and use manipulatives and other learning aids in early childhood context.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

40h small group work, 4h making the science day for children, 90h self study

Target group:

Pre- and early primary education minor students

Prerequisites and co-requisites:

None

Recommended optional programme components:

None

Learning outcomes:

Underpinning the course is a comprehensive and contextual view of children and their growth, learning and development. The course explores the principles related to K (0-2) level teaching and learning as well as curricular design, implementation and assessment. The course links the different subareas of preschool and primary education.

Learning outcomes:

- The student is able to identify the theoretical foundations of curricular design for K-2 children, their applications and principles of development.
- The student has proficiency in curricular design, implementation and assessment in the continuum of the K-2 period.
- The student understands the role of play in K-2-education.
- The student recognizes the special nature of K-2 education and the principles and means of collaboration.

Contents:

The following topics are covered:

- comprehensive child growth and learning
- concept formation at the age level
- basics in curricular design and applications
- special nature of K-2 educational cultures
- collaboration and interaction between preschool and primary education and the home

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and small-group sessions 28 h, independent study, curricular development, observation task.

A255110: Professional Studies in Special Education, 60 - 70 op

Opiskelumuoto: Intermediate Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Proficiency level:

The goal of the studies in special education is to give the students professional capabilities and formal qualifications for work as special education teachers in basic education. The aim is to educate well-versed experts with good interaction skills who understand the essence of special education in a broad context. The development of a professional identity is supported during the studies. Reconciliation of theory and practice, the development of theoretical thinking in support of teachership and networking with experts in the field are some of the main goals during the one-year programme. During their studies the students develop into inquiry-based teachers who are given a good idea of the breadth of the field of special education and the importance of continuous learning.

Status:

A student selected to this programme needs to have completed the module of basic studies in special education (25 ECTS credits) at a university. If the studies were completed more than ten years ago, a student admitted to the programme can be required to update his or her studies at the start of the programme.

For a 25-credit set of studies in special education completed previously at a university, a student will be awarded 20 credits towards the special education teacher's studies. To qualify as a special education teacher, the student will need to complete another 40 credits of studies consisting of eight (8) course components.

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Language of instruction:

finnish

Learning outcomes:

The student knows how to describe and use different contents and working methods typical of the special education profession. S/he learns how to function in various tasks in special education. For work as a special education teacher, she learns how to compose various documents (e.g. early education plans, pedagogical evaluations, statements and plans for individual instruction arrangements), multi-professional cooperation and functioning in different work communities. The student gets a deeper knowledge of the requirements for and implementation of support offered to children at different phases from pre-school to vocational education. The student learns about different situations of interaction in the work community and gets support for his or her own professional development. As required by a specific situation, the student knows how to apply the Child Daycare Act to practice in special daycare / the Basic Education Act in practice with a view to special education / social legislation.

Contents:

The role of the special education teacher in the school community and in the professional team, legislation, the requirements and contents of three-tier support and student welfare services. Tasks of the special education expert, the prerequisites of his/her tasks.

Mode of delivery:

Lectures and small group teaching, a visit if possible.

Learning activities and teaching methods:

Lectures 16 h and small group sessions 14 h in flexible alternation, totalling 28 h, independent work 10 h. Half of the course is arranged in period I and the other half in period II.

Target group:

Students qualifying as special education teachers.

Prerequisites and co-requisites:

Basic Studies in Special Education

Recommended optional programme components:

The course is part of the Intermediate Studies in Special Education.

402121A: Learning Difficulties in Reading and Writing, 5 op**Voimassaolo:** 01.08.2012 -**Opiskelumoto:** Intermediate Studies**Laji:** Course**Vastuuyksikkö:** Faculty of Education**Arvostelu:** 1 - 5, pass, fail**Opintokohteen kielet:** Finnish**Learning outcomes:**

The student is familiar with the basic methods of teaching to read and write, and understands how the various methods are bound to a language. The student is familiar with the typical development of learning to read and write during a person's course of life, and is able to identify aberrant development in terms of both technical reading, spelling, and productive reading and reading comprehension. In addition to theoretical mastery, the student also knows how to use the tools to evaluate reading and writing difficulties, and how to interpret individual results from the viewpoint of intervention. The student is familiar with various research-based methods of intervention in reading and writing, and knows how to apply them effectively to the individual needs of pupils in different ages.

Contents:

Skills of teaching to read and write, background and causal factors of reading and writing difficulties, identification, evaluation and support in reading and writing difficulties.

Mode of delivery:

Lectures 16 h and exercises 14 h.

Learning activities and teaching methods:

Lectures and small group teaching, with differentiated instruction for the early childhood education groups. In early childhood education, the focus is on overall practise of verbal abilities, especially rehabilitation of verbal awareness in preventing reading and writing difficulties and reducing risks of them.

Target group:

Students majoring in special education and students qualifying as special education teachers.

Prerequisites and co-requisites:

Basic Studies in Special Education

3 cr

Language of instruction:

finnish

Timing:

First period

Learning outcomes:

For students aiming at special education at primary level

The student learns about planning, implementing and evaluating special education. Depending on his or her basic education, s/he acquaints him/herself with the work of a special education teacher in either part-time or full-time special education. This introduction to work takes place through the student's own experience and by various means through guidance, introductory visits and discussions in such a way that s/he becomes prepared to start working as a special education teacher. The student designs and implements an intervention following the instructions given by his or her supervising teacher and lecturer, and makes an assessment of learners' skills by applying the theories that s/he has learnt. S/he also acquaints her/himself with practices of pedagogical collaboration and takes part in the activities of multiprofessional working teams and the entire work community.

For students oriented towards special education in early childhood education

The teaching practice is carried out in two periods of four weeks each. The first period is aimed primarily at familiarisation with the job description of early childhood special education teachers in various day care facilities and pre-primary education, while the second period consists of practice in pairs, getting to know the job of full-time special education teachers in elementary school. (In addition to qualification as an early childhood special education teacher, the training can also qualify the student as a full-time special education teacher in basic education).

Contents:

For students aiming at special education at primary level

The teaching practice is carried out in two periods of 4 weeks each. The first period is mainly oriented to special education in the primary school grades 1-6, and the latter one to the lower secondary school grades 7-9. As a main rule, one of the periods is implemented in part-time special education, while the other one is implemented in a special education class.

Teaching Practice I and II is implemented during a period of four weeks. In the first week, the student acquaints her/himself with the work of the school community and special education teacher on a broad scale for at least three full working days, yet for at least 20 hours. In the next few weeks, the student will be practising in the working duties of a special education teacher under the leadership of a supervising teacher for three full working days a week, at least ten hours per week. This includes assessment of children/pupils, implementation of an intervention, individual, group and co-teaching as well as participation in collaboration negotiations. The teaching practice must be divided evenly between the four weeks. The student shall compose a report on the practice period, and when s/he writes it, s/he shall also use other literature to be agreed on with the teacher. The practice is oriented towards part-time and/or full-time education depending on the student's own experiential background. In part-time education, a special focus is on supporting the learning of the mother tongue, mathematics and foreign languages.

For students oriented towards special education in early childhood education

Special education in early childhood education and basic education following the instructions of the supervising teacher.

Mode of delivery:

For students aiming at special education at primary level and for students oriented towards special education in early childhood education
20h introduction + 10h teaching by student per week per practice period, 6h group supervision at the university per practice period.

Learning activities and teaching methods:

The practice is oriented towards blended special education depending on the student's own experiential background.

Assessment methods and criteria:

Read more about [assessment criteria](#) at the University of Oulu webpage.

Person responsible:

Tuomo Vilppola ja Virpi Louhela-Risteelä

Other information:

asic Education Act 40 §. Confidentiality. The members of any authority responsible for teaching arrangements, persons referred to in section 37 of the Act and students carrying out their teaching practice are not allowed to express without a permission to any outside party what they have come to know, when performing their educational duties, about the personal conditions and financial status of the pupils or staff referred to in this act or of their family members. The persons referred to above in subsection 1 and persons in charge of school health care and other pupil welfare affairs are allowed, despite the stipulations in subsection 1 and any specific stipulations on confidentiality, give each other and authorities in charge of education the necessary information required by proper teaching arrangements.

Lisäksi

- The practice period includes planning and preparation for teaching with a focus on the field of duties of an early childhood special education teacher.
 - The practice includes the composition of a curricular theme into a plan (design of a teaching episode/ lesson / day / week / period).
 - During the practice period, the student takes part in and puts into action co-operation between the home and day care facility, taking into account the role of the early childhood special education teacher.
 - The student shall familiarise him/herself with rehabilitation and co-operation carried out in the day care facility, welfare at work and cooperation inside the day care facility and between organisations. As far as possible, the student shall also take part in the meetings of the pupil welfare committee.
- The student shall compose a practice report describing the implementation of the practice period based on his or her personal experiences and the feedback given by the special education teacher who supervised his or her practice. The report shall comprise at least six pages (font 12, line spacing 1.5). The student shall use aliases in the report, if s/he is dealing with sensitive issues. If the report written by a student is not approved, s/he shall compose it again. The report is graded on a pass/fail basis.
- The student also tries to take part in other events in the day care facility, such as staff meetings, employee cooperation events, collaborative planning meetings, club activities and equivalent during the practice period.
 - Observing the work of an early childhood special education teacher during the first week is a prerequisite for the practice period. To teach a group in a responsible manner the student needs to know the children and previous conventions as well as possible.
 - The student shall assess the fulfilment of the goals set for the practice period in his or her practice report.

402140S: Cognitive Performance and Assessment, 5 op

Voimassaolo: 01.08.2014 -

Opiskelumuoto: Advanced Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

Spring term, 3rd period

Learning outcomes:

The student is familiarised with the extremes of development: the special pedagogical needs required by talent and mental disability and assessment of children and adolescents. The student learns to work with persons who are talented in various ways. S/he learns to use the means and interventions of special education when faced by the various challenges posed by talent. The student deepens his/her knowledge of assessment as a scientific and professional activity. The student knows how to construct a screening method and test. S/he knows how to analyse their characteristics and is familiar with and knows how to evaluate diagnostic decision making. The student combines evaluation with decisions and means, and knows how to describe the ethical dimensions of assessment. S/he learns to evaluate the effectiveness of her/his own work. S/he gets to know the ICF system.

Contents:

Mental disability and talent as concepts, differentiation and individualisation, different pedagogical approaches and models of rehabilitation. Construction of a screening and test, scales and their principles. Testing of children and analysis of the results, description of ethical issues. ICF.

Mode of delivery:

Face-to-face teaching and small groups.

Learning activities and teaching methods:

Lectures 12 h and small group sessions 12 h, possibly with a partial online implementation.

Target group:

Lectures 12 h and small group sessions 12 h, possibly with a partial online implementation.

Prerequisites and co-requisites:

Basic and intermediate studies in special education.

Recommended optional programme components:

Students majoring in special education and students qualifying as special education teachers.

Assessment methods and criteria:

A pass requires participation in face-to-face teaching and successful completion of a literature exam based on two books, two articles and the lectures.

Grading:

The course is graded 0-5

ECTS Credits:

25 ECTS credits

Language of instruction:

Finnish

Timing:

1st year

Learning outcomes:

At the end of the module, the student will be expected to be able to perceive and describe psychological phenomena by using the basic concepts and theories of psychology. The student knows how to make use of the various academic learning and working methods and is able to conduct independent literary work.

Contents:

These studies consist of the following courses:

412070P Basics of Psychological Research (5 credits)

412054P Developmental Psychology I (5 credits)

412071P Personality Psychology (5 credits)

412056P Basics of Cognitive and Neuropsychology (5 credits)

412057P Applications of Psychology I: Psychology of Health and Mental Health (5 credits)

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and other teaching. The studies also include participation in psychological research.

Target group:

Students majoring or minoring in Education

Prerequisites and co-requisites:

No

Recommended optional programme components:

No

Recommended or required reading:

To be determined during the courses.

Assessment methods and criteria:

Exams, lecture diaries, essay papers

412072A: Cognitive Psychology II, 5 op

Voimassaolo: 01.08.2008 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Seppo Laukka

Opintokohteen kielet: Finnish

ECTS Credits:

4 credits

Language of instruction:

Finnish

Timing:

2nd year

Learning outcomes:

- the student knows how to expound cognitive processes and brain mechanisms and identifies methods to research them
- the student knows how to examine the human being critically as a recipient, processor and user of knowledge
- the student knows how to evaluate the various different paradigms connected with cognitive psychological research
- the student identifies the relationship between the cognitive and neural sciences
- the student identifies the theories of cognitive psychology
- the student knows how to evaluate the concepts related to basic cognitive processes

Contents:

The following topics will be covered:

- Theories and concepts of cognitive psychology in the area of the research of different basic cognitive processes; attention, perception, memory, cognitive skills such as language and thinking, learning, action control
- Research methods in cognitive psychology, relationship between cognitive psychology and cognitive neuroscience

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and other teaching 24 h.

Prerequisites and co-requisites:

Basic Studies in Psychology

Recommended or required reading:

Eysenck, Keane (2000) Cognitive psychology: A student's handbook, or a newer edition, chapters 8-16.
Saariluoma, Kamppinen & Hautamäki (2001) Moderni kognitiotiede, chapters 1-4 and 6-9.

ay411014A Paths to working life (OPEN UNI) 4.0 op

ECTS Credits:

4 ECTS cr

Language of instruction:

Finnish

Timing:

2.- 3. year

Learning outcomes:

The student

- identifies her/his own interests by studying education, thereby also piecing together her/his major and minor subject choices and professional identity
- is capable of adding to her/his self-knowledge
- knows how to acquire knowledge in a flexible way
- perceives the opportunities offered by education and working life (minor subjects, practice periods, Masters thesis, exchange programmes, worklife requirements, jobs, etc.)
- knows how to describe and evaluate the field of educational work and working life in general
- knows how to evaluate elements of working life such as worklife competences, general skills and coping
- is able to consider her/his placement in working life

Contents:

This course provides the students with a readiness to begin to reflect on their own professional identity. During the course the students add depth to their personal study plans from the viewpoint of working life.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Seminar work 32 h: brainstorming, discussion, exercises, and independent work.

Alternatively, the course can be completed in some other way, e.g. an assignment based on literature as agreed with the course coordinator.

Target group:

Students majoring education and educational psychology

Prerequisites and co-requisites:

Basic and subject studies of the major subject

Recommended optional programme components:

Preceeds the course 411015A Project training

Recommended or required reading:

*Obligatory courses in Sociology intermediate studies***414070A: History of sociology, 5 op****Voimassaolo:** 01.08.2005 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Vesa Puuronen

Opintokohteen kielet: Finnish

ECTS Credits:

5 cr

Language of instruction:

Finnish (English if necessary)

Timing:

Autumn and spring term

Learning outcomes:

The student knows the classic background central to sociology, and can continue personal familiarisation with relevant theory independently, which will benefit the student in advanced studies in sociology as well as other subjects.

Contents:

The course examines sociological theory and research traditions from the beginning of sociology onwards. The main focus of the course is on the history of ideology and sociology of the classic era, but it will also evaluate the role of the classical tradition in modern day research.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Literature, substituted by lectures as far as possible

Target group:

Students who have completed the Basic Studies in Sociology.

Prerequisites and co-requisites:

Basic Studies

Recommended optional programme components:

Completion of Basic Studies in Sociology required, a compulsory module for those aiming to move on the Advanced Studies in Sociology

Recommended or required reading:

Literature by choice:

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Anu Alanko

Opintokohteen kielet: Finnish

ECTS Credits:

5 cr

Language of instruction:

Finnish (replaceable by English literature)

Timing:

Spring term

Learning outcomes:

Based on the set lecture literature, the student receives complementary knowledge on both qualitative and quantitative sociological research methods and on ways to combine them. This can benefit the student in the project studies and in the planning and implementing of her/his other research.

Contents:

Succeeding the Basic Studies methods course, the objective of this course is to lay the groundwork for project studies and later research-based studies. During the course, we focus on central methodological issues and on analytical methods of survey-based and qualitative data. Covered analytical methods for survey-based data include analysis of two-dimensional and multi-dimensional tables, correlation analysis, regression analysis, factor analysis and other relevant testing procedures. We also discuss the principles of other multiple variable analytical methods. In the section on qualitative research, we look at the main features of certain analytical methods.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 20h, literature and exam 2 h.

Target group:

Students having completed the Basic Studies in Sociology

Opettajat: Anu Alanko

Opintokohteen kielet: Finnish

ECTS Credits:

5 cr

Language of instruction:

Finnish or English

Timing:

Autumn and spring term

Learning outcomes:

In this course we aim to synthesize what has been learnt in sociology so far by writing a sociological "miniature thesis" within an agreed theme. The course gives the student abilities for scientific writing and discussion.

Contents:

The project studies focus on research on a certain thematic area, which should be connected with the research projects in sociology whenever possible. The student's abilities for problem-centred work and the

writing of a scientific essay are developed on this basis. The aim is to create a theoretical frame of reference and to formulate a research problem, based on which an empirical survey is constructed based on data that already exists or is to be gathered separately (only required in the 6-credit implementation). In connection with the project studies, the student is also given an opportunity to complete the work in association with one of the research projects in sociology.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Seminar work and a report to be written alone or in a group

Target group:

Students having completed the Basic Studies in Sociology

Prerequisites and co-requisites:

Basic Studies

Recommended optional programme components:

Completion of Basic Studies in Sociology is required, a compulsory course for those aiming to move on to the Advanced Studies

Recommended or required reading:

Selected literature and empirical research data.

Assessment methods and criteria:

Participation in the seminar (24 h) and assignment

414087A: Sociology of sex and gender, 5 op

Voimassaolo: 01.08.2014 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Yliportimo, Pirjo Hannele

Opintokohteen kielet: Finnish

ECTS Credits:

5 ECTS credits

Language of instruction:

Finnish (may be substituted with English literature or an essay)

Timing:

Autumn and spring term

Learning outcomes:

The student has familiarised her/himself with current research the sociology of sex and gender. Having completed the course, the student has a mastery of the main concepts, the theoretical tradition and current research related to this field. The student knows how to use this knowledge in research and working duties and how to take part in societal discussion on relevant topics also informed in terms of theory and research.

Contents:

The course introduces the student to current research on the sociology of sex and gender.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Literature and substitutive lectures as far as possible

Target group:

Students who have completed Basic Studies in Sociology

Prerequisites and co-requisites:

None

Recommended optional programme components:

Presupposes completion of Basic Studies in Sociology

Recommended or required reading:

Literature (three of the following) and substitutive lectures as far as possible:

Gordon, T. et al. (Eds.) 2002. Suomineitonen hei! Kansallisuuden sukupuoli. Tampere: Vastapaino.

Kinnunen, M. 2001. Luokiteltu sukupuoli. Tampere: Vastapaino.

Lempiäinen, K. 2003. Sosiologian sukupuoli. Tampere: Vastapaino.

Löyttyniemi, V. 2004. Kerrottu identiteetti, neuvoteltu sukupuoli. Jyväskylä: Minerva.

Wharton, A. 2005. Sociology of gender: An introduction to Theory and Research. Malden MA: Blackwell.

A211401: Sociology, Basic Studies, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ayA211401 Sociology, Basic Studies (OPEN UNI) 25.0 op

ECTS Credits:

25 credits

Language of instruction:

Finnish

Timing:

1st to 5th years

Learning outcomes:

Having completed the basic studies in sociology, the student knows how to analyse the social conditions and impacts of social activity on her/his studies, work and other areas of life. S/he knows how to use the basic concepts, theories and methods of sociology in communication and research and how to search for sociological knowledge relevant for her/his own competence. S/he also knows how to summarise and evaluate research and write reviews on topics important for her/his learning goals and own work based on current sociological research literature.

Contents:

Sociology, often referred to as general social studies, became an academic subject at the turn of the 20th century. It seeks to find scientific explanations and understandings for how different social structures, cultures and the ties, relationships and networks between humans and groups develop. As a general social science, it also attempts to create a broader picture of societal structures and social action, and its special fields cover a range of extraordinarily complex research areas. In addition, sociology develops methods and general theories on society from globalisation to the smaller ways of social interaction, which can be used in empirical social research as well as other fields of applied research in humanistic studies.

In the Faculty of Education, sociology teaching and research focus on environmental and educational sociology in addition to general sociology. Sociology can be studied at basic level or intermediate level (up to 60 ECTS credits). The University of Lapland is in charge of degree and advanced studies organised at the University of Oulu. These studies are completed according to the requirements of the University of Lapland and the coordinator for the course is lecturer Leena Suopajarvi.

A211401 Basic Studies in Sociology, 25 credits:

- 414067P Basic Course in Sociology, 5 credits
- 414078P Introduction to Methodology and Methodics, 5 credits
- 414079P Current Research, 5 credits

Research Areas in Social Sciences, two of the following:

- 414080P Perhe- ja ikäkausitutkimus 5 op
- 414081P Yhteiskuntatieteellinen ympäristötutkimus 5 op
- 414082P Globalisaatio 5 op
- 414083P Kasvatussosiologia (ei kasvatustiedettä opiskelleille.)5 op
- 414084P Rasismin ja monikulttuurisuuden sosiologia 5 op

Mode of delivery:

Face-to-face teaching, book exams

Learning activities and teaching methods:

Methods vary: lectures, book exams, seminar sessions

Target group:

Undergraduate students

Prerequisites and co-requisites:

None

Arvostelu: 1 - 5, pass, fail

Opettajat: Vesa Puuronen

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay414067P Basic course in sociology (OPEN UNI) 5.0 op

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

Autumn term

Learning outcomes:

Having completed the course, the student knows the connections and differences between the field of sociological research and sociology and other disciplines of science, knows how to distinguish between research trends in sociology and how to use the most important concepts of sociology.

Contents:

During the course we generate an overview of sociology as an original, critical and developing basic social science. Attention is given to the classic, modern, and current traditions and trends in sociological research, their central concepts and theories, along with current applications. Special emphasis is given to discussion on the nature and place of sociology among the sciences in general.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 20 h, optional literature and exam 2 h

Target group:

Students pursuing Basic Studies in Sociology

Prerequisites and co-requisites:

None

Recommended optional programme components:

First course in the Basic Studies, a compulsory course for those moving on to pursue the Intermediate Studies

Recommended or required reading:

Two of the following books:

Aro, J. ja Jokivuori, P. 2010. Klassinen sosiologia ja moderni maailma. Helsinki: WSOYPro
Saaristo, K. & Jokinen, K. (2004) Sosiologia.

Course material availability can be checked [here](#).

Assessment methods and criteria:

Exam on two works of literature in connection with lectures.

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Anu Alanko

Opintokohteen kielet: Finnish

Leikkaavuudet:

ay414079P Introduction to sociological research (OPEN UNI) 5.0 op

ECTS Credits:

5 credits

Language of instruction:

Finnish or English

Timing:

Autumn and spring term

Learning outcomes:

Having completed the course, the student is capable of a) summarising and evaluating various studies and reports by composing a summary of a scientific text chosen on the basis of her/his own interests, and b) scientific writing based on an essay composed by her/him. S/he has also gained exercise in participation in discussion on social and societal issues.

Contents:

This course introduces the student to sociological research a) by writing a summary to be presented in a seminar on a study of current interest and b) writing an essay on the topic of a book presented in a summary seminar. The summary seminar familiarises the student with understanding and evaluating scientific texts, while the writing of an essay gives a preliminary introduction to producing scientific knowledge. The course consists of not only composing a supervised summary and essay, but also individual familiarisation with a current sociological study as agreed with the teacher.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Summary seminar (20 h), writing a summary and essay

Target group:

Students pursuing Basic Studies in Sociology

Prerequisites and co-requisites:

None

Recommended optional programme components:

A compulsory course for students planning to continue with Intermediate Studies

Recommended or required reading:

Literature based on the student's own choice

Assessment methods and criteria:

Writing a summary, seminar sessions and writing an essay,

Leikkaavuudet:

ayA255102 Special Education (Oulu) (OPEN UNI) 25.0 op

ECTS Credits:

25 ECTS cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Having completed the basic studies, the student knows how to

- determine the position of special education as a support of the educational system
- identify and analyse the features of a separate special education service system and, on the other hand, an inclusive educational system
- describe the individual challenges in learning

Contents:

As a field of research and science, special education is an area of education which studies theoretical and practical aspects of special education. Closely related subjects include linguistics, psychology, sociology and medicine, as well as physical education and music, the concepts and theories of which are used in special education. As an area of education, special education supports the development, teaching and learning of children and adolescents in need of special support. The aim is to give educators, teachers and counsellors the necessary mindset, knowledge and skills needed in encountering learners and students who need special assistance, who need individual support in learning, as well as personal and alternative teaching methods and arrangements. Special education supports the child or adolescent through practical pedagogical means to develop socially, functionally, emotionally and intellectually in accordance with individual development resources. Special education in the school supports both general teaching and learning, but can also target individual learning, teaching and learner rehabilitation, in which cases we talk more widely of remedial education. In addition to alternative teaching methods, remedial education also includes the support from social services. Today, special education is a profession in its own right, in which practical goal-oriented methods are emphasized as are the teaching, cooperative and teamwork skills requirements of those who need alternative and personal teaching solutions. Special education teachers work as their school's and/or municipality's field experts, with special qualifications in the wide area of special education pedagogy, in some special sector or in classroom-based teaching. A special education teacher is required to have both theoretical perspective and practical skills, as well as have a capacity for continuous learning in order to be able to support the student's development and learning. A special education class teacher focuses on the teaching of a group of special education students (max. 10 students/class) depending on their characteristics or age group. In order to become a special education teacher, 25 credits of the minor subject are required, which can be completed at the University of Oulu, Faculty of Education. Further studies can be completed at the University of Lapland or the University of Jyväskylä. The minor studies curriculum follows the study programme of the University of Jyväskylä. The core themes include: respecting difference; learning difficulties; challenges in behaviour and communication; and familiarization with the special education service system, prevention of exclusion and integration development. The minor subject is completed by literature study, assignments, participation in lectures and small-group sessions and visits to special education units and venues in the Oulu region. In addition, the minor requires the successful completion of the minor studies practice period. The minor studies are assessed numerically 1-5 or on a pass/fail basis. For more information, contact the coordinator.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Courses in the Basic Studies in Special Education:

- 402106P Basic Course in Special Education (5 cr)
- 402107P Challenges of Communication (5 cr)
- 402108P Challenges of Learning (5 cr)
- 402109P Challenges of Behaviour (5 cr)
- 402110P Special Education and the Course of Life (5 cr)

For more information see the respective course descriptions section in the minor studies handbook

Target group:

Students at the Faculty of Education chosen to study in the minor subject of Special Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

None

Recommended or required reading:

To be announced for each course

Assessment methods and criteria:

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

1st period

Learning outcomes:

Upon completion of the course the student knows how to

- describe activities in special education and their goals
- discuss activities in special education in practice
- examine and analyse key values in special education
- apply the individual and social model of disability
- describe tentatively the developmental lines of special education

Contents:

- Ideologies, value and principles underlying special education
- Views of the essence, dissimilarity and diversity of man
- Special education and close sciences
- Monitoring, observation and early intervention in the child's development
- General, special and reinforced support and care, teaching and rehabilitation
- Collaboration, multiprofessionalism and educational partnership
- Familiarisation with the field, target groups and practices of special education

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

20 h lectures, 6 h small groups, 14 h reports, visits and independent work, literature exam or assignment

Target group:

Students selected for the minor of Special Education at the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

2nd period (autumn term)

Learning outcomes:

After completion, the student knows how to

- define the difficulties in language and communication
- distinguish between the challenges of communication at different ages
- compare different means of diagnosis and evaluation and their uses
- compare individual and collaborative rehabilitation methods and other support measures

Contents:

- Delayed and abnormal development of speech and language
- Language and hearing problems in childhood, adolescence and adulthood
- Manifestation and identification of speech, language and communication problems
- Supporting communication and communication methods to support and replace speech
- Rehabilitation of verbal problems and supporting development

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

14 h lectures, lecture and literature exam

Target group:

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

3rd period (spring semester)

Learning outcomes:

The student knows how to

- analyse factors affecting learning in an individual's course of life and in different learning environments
- identify different difficulties related to learning and manifestations of talent
- identify the need for multiprofessional collaboration to intervene in the challenges of learning
- identify the impact of multiculturalism in learning

Contents:

- Approaches and backgrounds to learning skills and difficulties
- Sensorimotor functions in learning
- Different learners from the gifted to the disabled
- Challenges of learning from early childhood to adulthood
- Challenges of learning: identification, evaluation and support
- Individualisation and communality of teaching

Mode of delivery:

Face-to-face teaching

ay402109P Challenges of Behaviour (OPEN UNI) 5.0 op

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

4th period (spring term)

Learning outcomes:

After the course student knows how to

- define central concepts of challenging behaviour and describe their features based on the pedagogical, psychological, psychiatric, neurological and communal frames of reference
- identify challenges in behaviour in the educational system from both the individual and the communal points of view
- identify the benefits offered by multiprofessionalism as regards intervention in the challenges

Contents:

- Disorders of behaviour and emotional life based on different frames of reference
- Concepts, diagnostics and interpretations of challenging behaviour
- Manifestation of disorders in attention and behaviour among children and adolescents
- Exclusion and need for support in emotional life
- Risk factors of unfavourable development, treatment and rehabilitation
- Factors of protection against behavioural disorders, ways to support favourable development

A255902: Technical Work (Oulu), 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

25 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

Having completed the 25-credit studies in technical work, the student acquires a readiness to teach technical work in the lower grades of basic education. In her/his studies the student learns to apply technology to combine knowledge and skills in technical work. The main learning outcomes for each course are to be found in their descriptions.

Contents:

402258P Material and Manufacturing Technology, 8 cr

The core content of the course is to familiarise the student with the most common materials and working methods in technical work. Having completed the course, the student achieves such a level in knowledge and skills that is needed in work on technological materials, objects and components in the lower grades of basic education

402259P Robotics and Automation, 7 cr

The core content of the course is to familiarise the student with highly developed technology in the context of technical work. The student learns to design, manufacture and evaluate various technological wholes with applications of mechatronics and information technology.

402260P Technological Design, 2 cr

The core content of the course is to familiarise the student with the design techniques and software used in technological production. The student learns to apply these design techniques and software in the lower grades of basic education.

402261P Technology and Pedagogics, 5 cr

The core content of the course is the special pedagogical knowledge related to the teaching of technical work, when the learning environment consists of a technological frame of reference. The student learns to design and produce curricular themes for the lower grades of basic education in such a way that s/he is capable of composing a technical work curriculum.

402262P Educational Dimensions of Technology, 3 cr

The core content of the course is to consider the connections of technical work with society and other basic education. By means of study visits, the student is familiarised with technological application in production life. In occupational safety and health studies, the student learns to combine the functions of technical work and production life as an ethically sustainable whole. In textile work studies, s/he learns to combine the contents of technical work and textile work as a joint activity in crafts in the teaching of the lower grades in basic education.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and small group sessions. For further information see 402258P, 402259P, 402260P, 402261P, 402262P.

Target group:

Students selected for the minor of Technical Work at the Faculty of Education

The availability of the literature can be checked [here](#).

Assessment methods and criteria:

- Examinations in lectures/course books. (Other coursework alternatives must be pre-approved)
- Written and online materials produced during the exercises are assessed, particularly in terms of contents and pedagogical aspects.
- Objects produced in the exercises are assessed numerically (0-5), with particular attention to pedagogical value, functionalism and aesthetics.
- Assessment ratio between objects/written work is 2:1.

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

8 cr

Language of instruction:

Finnish

Timing:

Third year

Learning outcomes:

By accomplishing the course student will be able to

- use the most common machines, equipment and techniques which are needed in machining wood, plastic and metal in primary school technical work.
- choose appropriate materials in different technological themes and take notice of economical and ecological aspects in one's choices.
- teach the safe use of the most common technical work hand tools and equipment to primary school children.
- use typical finishing tools and methods.
- design, implement and evaluate theme works from the viewpoint of technology education and apply them into primary school technical work.

Contents:

Course consist of three sections:

- Exam (2 cr)
- Practical work 1 (4 cr)
- Practical work 2 (2 cr)

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 16 h, Small group teaching 64 h and Self-study 136 h

Target group:

Primary teacher students / All the students in the Faculty of Education

Prerequisites and co-requisites:

None

402260P: Technological Design, 2 op

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

2 cr

Language of instruction:

Finnish

Timing:

Third year

Learning outcomes:

By accomplishing the course student will be able to

- draw a technical drawing of the product one has made.
- take notice of esthetical, ergonomic, ecological, economical and functional factors in design.

Contents:

Course consist of one section:

- Technical Drawing -exercises

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 8 h, Small group teaching 12 h and Self-study 34 h

Target group:

Primary teacher students / All the students in the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

A255902 Craft, technical work, technology:

- 402258P Material and Manufacturing Technology, 8 cr
- 402259P Robotics and Automation, 7 cr
- 402261P Technology and Pedagogics, 5 cr
- 402262P Educational Dimensions of Technology, 3 cr

Recommended or required reading:

Agreement on literature to be made at the start of the course.

Assessment methods and criteria:

Active participation in contact teaching and practical exercises.

402261P: Technology and pedagogics, 5 op

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Nykänen, Jaakko Juhani

Opintokohteen kielet: Finnish

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:

Third year

Learning outcomes:

Having completed the course, the student knows how to

- apply his/her pedagogical skills in planning, implementing and evaluating technical work and technology teaching in primary school.
- evaluate pupils' technological theme projects implemented in primary school technical work context.
- prepare a technical work curriculum for primary school.

Contents:

Course consist of one section: Textual outputs (3 cr)

- teaching practice (2 cr)

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures 12 h, Small group teaching 28 h, teacher training 10 h and Self-study 85 h

Target group:

Primary teacher students / All the students in the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

A255902 Craft, technical work, technology:

- 402258P Materials and Manufacturing Technology, 8 cr
- 402259P Robotics and Automation, 7 cr
- 402260P Technological Design, 2 cr
- 402262P Educational Dimensions of Technology, 3 cr

Recommended or required reading:

Literature to be agreed on at the beginning of the course.

Assessment methods and criteria:

Active participation in contact teaching, practical exercises, textual outputs and teacher training. Read more about [assessment criteria](#) at the University of Oulu webpage.

Grading:

Textual outputs 1 – 5 and teacher training pass/ fail

Yes, teacher training in technical work.

402262P: Educational Dimensions of Technology, 3 op

Voimassaolo: 01.08.2011 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opettajat: Nykänen, Jaakko Juhani

Opintokohteen kielet: Finnish

ECTS Credits:

3 cr

Language of instruction:

Finnish

Timing:

Third year

Learning outcomes:

By accomplishing the course student will be able to

- combine technical and textile work contents as a collaborative craft activity in primary school.
- attach and combine a study visit to a technology company as part of teaching.
- put into practice and apply the key factors of work safety in a primary school.

Contents:

The course consists of three sections:

1. Textile work (1 cr)
2. Study visit (1 cr)
3. Work safety (1 cr)

The main goal of the course is to examine the technical work's connections to society and other subjects in primary school. Students familiarize themselves with applied technologies of industrial life through study visits. The studies of work safety attach the functions of technical work and industrial life into ethically sustainable entirety. The studies of textilework enable combined handicraft activity at the primary school level.

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

The course work is divided as follows:

1. Textile work: small group sessions 10 h
2. Study visit: 10 h
3. Work safety: lectures 5 h, small group sessions 5 h

Target group:

Primary teacher students / All the students in the Faculty of Education

Prerequisites and co-requisites:

None

Recommended optional programme components:

A255902 Craft, technical work, technology:

- 402258P Materials and Manufacturing Technology, 8 cr
- 402259P Robotics and Automation, 7 cr
- 402260P Technological Design, 2 cr
- 402261P Technology and Pedagogics, 5 cr

Recommended or required reading:

- Jaana Inki, Eila Lindfors, Jaakko Sohlo (toim.) 2011. Käsityön työturvallisuusopas perusopetuksen teknisen työn ja tekstiilityön opetukseen. Opetushallitus.
- Other learning materials will be agreed on at the beginning of the course

Assessment methods and criteria:

Active participation in contact teaching, practical exercises, study visit, written outputs and exam. Read more about [assessment criteria](#) at the University of Oulu webpage.

A256002: Textile work / Technology, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

ayA256002 Textile Work (Oulu) (OPEN UNI) 25.0 op

ECTS Credits:

25 cr

Language of instruction:

Finnish

Timing:

3rd or 4th year

Learning outcomes:

The student:

- knows how to apply relevant problem-solving methods related to product manufacturing in the process of making craft works
- knows how to explain the nature of crafts, art and technology education and its basis in learning theory
- knows how to design, produce and evaluate the standard of a whole craft process
- knows how to work collaboratively in a student and school community

Contents:

The scientific foundation for these studies is provided by craft science and crafts, art and technology education. Handicrafts, especially textile work and technology, are examined as a part of culture and the environment in such a way that problems related to products and ways of working are solvable through active and experiential interaction between thinking and action. Both ethical and aesthetic sensitivities are fostered in user-centred design in relation to ecological, social, cultural and economic factors. The pedagogical and didactic aim of the course is for the future teacher to be able to offer guidance in solving problems related to the material world in a contextually appropriate manner. This minor subject gives student teachers the capacity to teach textile work and to develop the handicrafts

These minor studies comprises of the following courses:

- Basics of Product Design 5 ECTS cr
- Textile Plane Structures: Weaving 5 ECTS cr
- Textile Plane Structures: Yarn techniques 5 ECTS cr
- Clothing Technology 5 ECTS cr
- Crafts and Technology Education 5 ECTS cr

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Small-group and class teaching, online and independent study. Both theoretical and practical studies are documented in portfolios, partly in digital form and partly in 3-D form. Part of the pedagogical studies is implemented with the technical work program. Excursions are part of the course.

For more information see the course descriptions section in the minor studies handbook.

Target group:

Students selected for the minor of Textile Work at the Faculty of Education

Prerequisites and co-requisites:

Basic studies must be completed.

Recommended optional programme components:

None

Recommended or required reading:

To be agreed on at the beginning of each course.

Assessment methods and criteria:

Active participation is required.

Read more about [assessment criteria](#) at the University of Oulu webpage.

Grading:

Assessment is carried out collaboratively and through peer, self and teacher assessment. Exercises are registered on a "pass" basis. Final assignments and portfolios are assessed according to set criteria (0-5).

ECTS Credits:

5 cr

Language of instruction:

Finnish

Timing:3rd or 4th year 1st period**Learning outcomes:**

The student knows how to:

apply the basics of problem-based product design

utilize the opportunities offered by different design, brainstorming, visualization and documentation methods

work collaboratively in small-scale projects

Contents:

The course is comprised of the basics of product design and research, project work and testing different textile materials.

Contents:

- Different areas of work safety are studied, e.g. materials, tools, space and work.
- Multimedia is used in planning, production, assessment and documentation.
- A small-scale product design project will be conducted during the course.
- Study visits

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures and small group sessions , independent work

Target group:

Students selected for the minor of Textile Work at the Faculty of Education

Prerequisites and co-requisites:

Basic studies must be completed.

Recommended optional programme components:

This module is linked to all of the courses in the minor of Textile Work.

Recommended or required reading:

Learning outcomes:

The student knows how to:

- classify and describe the formation of textiles from fibre to product: raw materials, structures, processing and characteristics
- familiarize with the problem-solving method arise from crafts and hand made products
- apply pasts and present-days aesthetic and technological culture in product making
- implement the basics of patternmaking and shaping and apply these skills to make clothing

Contents:

During the course students familiarize themselves with costume culture and material testing. The aim of the course is also to make products using clothing and sewing technology.

Contents:

- analyse crafts and textiles as a sociological phenomenon in the past, present and future
- textile testing and surface treatment exercises for fabrics
- produce different structural solutions in sewing technology that can be applied to school crafts

- during the course recycled materials are reclaimed (upcycling)
- excursions enhance the content of the course

Mode of delivery:

A212901: Women's and Gender Studies, Basic Studies, 25 op

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

ECTS Credits:

25 ECTS cr

Language of instruction:

Finnish

Timing:

1st to 5th year

Learning outcomes:

A student who has completed the basic studies module knows how to

- identify and specify different theoretical approaches to women's and gender studies as well as their historical, cultural and methodological background assumptions
- analyse different courses of events, interaction etc. making use of the theories and concepts of women's and gender studies
- also include intersectionality in her/his considerations
- plan practical activities to promote equality between the genders and to

Students study women's and gender research content areas and the subject's multi-disciplinary and interdisciplinary research approach. Research areas include sector-specific as well as recent social, cultural, and interactive phenomena, in the description and critical examination of which gender is a vital factor.

Contents:

The basic studies (25 credits) consists of the following courses:

Compulsory course:

- Basic course in women's and gender studies (5 credits)

Student chooses 4 of the following courses:

- Power, normalisation and social relations (5 credits)
- Sexuality and corporality (5 credits)
- Men's and masculinity studies (5 credits)
- Popular culture and media (5 credits)
- Violence and the premises for compassion (5 credits)

In the basic studies in women's and gender studies, the students are familiarised with the theories and conceptualisations of the field of science and with discussions in this field based on the theories and conceptualisations wmen's studies, men's and masculinity studies and queer studies.

The discussion focuses on social, cultural and interactional phenomena, both current and relevant to the field of science, in the description and critical consideration of which gender has a major role.

Mode of delivery:

Timing:

autumn term

Learning outcomes:

A person who has completed the course has demonstrated a capability to explicate the history and shaping of women's and gender studies, to name and define basic concepts of women's and gender studies, and to identify various theoretical trends in women's and gender studies and basic issues related to them.

Contents:

- From the women's movement to gender studies
- Main concepts and issues in women's and gender studies
- Main theories in women's and gender studies
- Intersectionality

Mode of delivery:

The course includes face-to-face teaching, independent individual and pair work, and seminar sessions

Learning activities and teaching methods:

Lectures 24 h, essay seminar 8 h

Target group:

Students at the University of Oulu

Prerequisites and co-requisites:

None

Recommended optional programme components:

This is a compulsory course in women's and gender studies (WGS), and it is desirable that the student starts her/his studies in this discipline with this course.

Recommended or required reading:

Timing:

Spring term in the case you include contact teaching in the course. Others, no restrictions on timing.

Learning outcomes:

A person who has completed this course has demonstrated a capability to conceptualize and explicate interaction from the points of view of gender, use of power, social hierarchies, normalization, equality, equity, safety and caring.

Contents:

- Power as a concept; theoretical approaches to power and gender
- Normative, institutional and discursive power structures and their maintenance
- Power structures & dynamics marked by gender historically, culturally and socially
- Growing to/educating to power-relations
- Basic concepts of interaction and of caring/compassionate interaction
- Equality & equity from the viewpoint of the quality of social relations including power relations and normalization
- Learning the skills to reflect in/on one's own action from the above points of view

Mode of delivery:

Face-to-face teaching, individual inquiry-based work.

Learning activities and teaching methods:

Varies annually. In the academic year 2014–2015, lectures 12 h, individual group or pair work, seminar sessions 8 h, reflection diary.

Target group:

Students at the University of Oulu

Prerequisites and co-requisites:

417133P: Violence and the premises for compassion, 5 op

Voimassaolo: 01.01.2008 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuyksikkö: Faculty of Education

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: English

ECTS Credits:

5 ECTS credits

Language of instruction:

Finnish/English (varying on an annual basis)

Timing:

Autumn term

Learning outcomes:

A person who has completed the course

- knows how to define the basic concepts of multidisciplinary research on violence and discuss violence with due consideration of gender and other intersectionalities.
- identifies different manifestations of violence in the life-span, and factors exposing a person to violence at different stages.
- knows how to analyse the individual and communal effects of violence on a person's health, welfare and social relations.
- knows how to reflect on her/his own action from the viewpoint of non-violence and compassion.

Contents:

- In a gender sensitive manner and taking into account intersectionality, the course introduces the student to multidisciplinary research on violence done in different disciplines of science.
- The course introduces the student to the basic concepts of violence, the frequency of the phenomenon, its various manifestations and accumulation in a life-span in different walks of life.
- The course also discusses the tools to identify and prevent violence in different environments, and supporting the development of a multiprofessional view on the phenomenon of violence.
- The course also gives the student a readiness to reflect on her/his own action from the viewpoint of non-violence.
