ayA549501: Rehabilitation Science (OPEN UNI), 25 op

Compulsory

ay040600P: Basic studies in rehabilitation (OPEN UNI), 5 op

ay040610P: Rehabilitation client groups, clientship and collaboration (OPEN UNI), 5 op

ay040618P: Usebility I (OPEN UNI), 5 op

ay040617P: Development and evaluation of rehabilitation science I (OPEN UNI), 5 op

ay040616P: The services of rehabilitation I (OPEN UNI), 5 op

ay402965A: The Well-being of Children and Adolescents (OPEN UNI), 5 op

Opintojaksojen kuvaaukset

Tutkintorakenteisiin kuulumattomien opintokokonaisuuksien ja -jaksojen kuvaaukset

ayA791404: Health Education, Basic Studies (OPEN UNI), 25 op

Voimassaolo: 01.08.2012 -

Opiskelumuoto: Basic Studies

Laji: Study module

Vastuuuksikkö: Open University, Oulu

Arvostelu: 1 - 5, pass, fail

Opetus suunnattu: Open University, Oulu

Opintokohteen kielet: Finnish

Leikkaavuudet:

A791404 Health Education, Basic Studies 25.0 op

Voidaan suorittaa useasti: Kyllä

ECTS Credits:

25 ECTS

Language of instruction:

Finnish

Timing:

1.-5. year

Learning outcomes:

Having completed the Basic Studies, the student identifies the individual, social and environmental factors connected with health, health behavior, health challenges and most common illnesses among all population groups, especially children and adolescents. The student also knows how to describe the meaning for health of the biological processes in the organs and of mental and social factors. S/he also knows how to apply the principles of subject didactics to promote the health of people in different ages, especially children and adolescents, and to reinforce their knowledge of health. S/he knows how to solve ethical issues connected with promotion of health and with health education, and knows how to explain both the individual and the community's responsibility for healthy life.

Contents:

The module consists of the following courses:

Basics of Health Education (5 credits) – 402960P

Challenges of Mental Development among Children and Adolescents (5 credits) – 402103P

Nutrition in Promotion of Health (4 credits) – 402956P

Basics of Anatomy and Physiology (6 credits) – 402961P

Basics of the Didactics of Health Education (5 credits) – 402951P

Mode of delivery:

Face-to-face teaching

Learning activities and teaching methods:

Lectures, group work sessions

Target group:

Health Education minor subject students

Prerequisites and co-requisites:

no

Recommended optional programme components:

no

Recommended or required reading:

To be announced for each course specifically

Assessment methods and criteria:

participating in teaching, literal work, exams

Grading:

pass/fail

Person responsible:

Eila Jeronen

Working life cooperation:

No

Other information:

The teaching is arranged by the Open University

Compulsory

ay402103P: Challenges to the Psychological Development of Children and Adolescents (OPEN UNI), 5 op

Voimassaolo: 01.08.2012 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuysikkö: Open University, Oulu

Arvostelu: 1 - 5, pass, fail

Opetus suunnattu: Open University, Oulu

Opintokohteen kielet: Finnish

Leikkaavuudet:

402103P Psychological Development of Children and Adolescents 5.0 op

ECTS Credits:

5 credits

Language of instruction:

Finnish

Timing:

1st to 5th years

Learning outcomes:

The student knows how to

- identify the psychological way to think and apply it to consider the course of children's and adolescents' life
- distinguish between different viewpoints on the challenges of mental development and distinguish between the challenges of growth, learning and socialisation
- identify the main challenges to children' and adolescents' growth in different phases of their lives and understand the meaning of childhood and adolescence growth for later life and wellbeing
- explain mental disorders as disorders of growth, and identify the basic categories of mental disorders

Contents:

- mental growth and development, special features of growth in adolescence
- challenges of growth at different ages
- mental problems and disorders, mental health
- self-knowledge, mental balance, development of emotional life

Learning activities and teaching methods:

Online studies

Target group:

Minor subject students in all faculties

Prerequisites and co-requisites:

none

Recommended optional programme components:

none

Recommended or required reading:

Aalberg, V. & Siimes, M.A. (1999 or newer edition). Lapsesta aikuiseksi: Nuoren kypsyminen naiseksi tai mieheksi. Kustannusosakeyhtiö Nemo.

Dunderfelt, T. (1991 or newer edition). Elämänkaaripsykologia. WSOY.

ay402951P: Basics of the Didactics of Health Education and Health Studies (OPEN UNI), 5 op

Voimassaolo: 01.08.2012 -

Opiskelumuoto: Basic Studies

Laji: Course

Vastuuysikkö: Open University, Oulu

Arvostelu: 1 - 5, pass, fail

Opetus suunnattu: Open University, Oulu

Opintokohteen kielet: Finnish

Leikkaavuudet:

402951P Basics of the Didactics of Health Education 5.0 op

ECTS Credits:

5 ECTS

Language of instruction:

Finnish

Timing:

1.-5. year

Learning outcomes:

- to take a comprehensive look at the individual and collective starting-points for health promotion and health education
- to choose contents and didactic teaching methods of health education from the perspective of reinforcing the community's knowledge of health
- plan different learning environment, tools and learning materials and compare their applicability from the viewpoint of the achievement of goals for learning
- choose and plan forms, methods and ways of teaching that support the learner's purposeful work and achievement of goals
- choose and plan various assessment methods and plan and implement the assessment
- explain the ethical responsibility associated with teaching

Contents:

Premises of health education

- the features of health-promoting individuals and communities
- health literacy

Planning as a pedagogical activity

- health education curriculum
- principles of planning, implementing, evaluating health education

Learning environments, tools and learning materials in support of the learner's growth and development

- choice and significance of learning environments, tools and learning materials
- ICT in support of health education

Forms, methods and ways of teaching and their development

- the role and tasks of the teacher and learner
- different working methods

Assessment of teaching and learning

- principles, forms and development of assessment

Mode of delivery:

Online studies

Target group:

Minor subject students in all faculties

Prerequisites and co-requisites:

No

Leikkaavuudet:

402961P Basics of Anatomy and Physiology 5.0 op

ECTS Credits:

6 credits

Language of instruction:

Finnish

Timing:

1st to 5th years

Learning outcomes:

Having completed the course, the student knows how to

- explain the structure and operation of eukaryotic cells
- explain the construction of tissue from different types of cell and matrix
- explain the structure and cooperation of different organ systems

Contents:

- structure of cells and tissue
- liquid states and electrolytes of the organism
- nervous system and sense organs
- hormones
- sensor and motor activity
- respiration
- blood circulation
- nutrition
- metabolism

Mode of delivery:

Online studies

Target group:

Minor subject student in all faculties

Prerequisites and co-requisites:

none

Recommended optional programme components:

Other courses in Health Education

Recommended or required reading:

Bjälje, J. G. et al. (1999). Ihminen. Fysiologia ja anatomia. Porvoo, WSOY.

OR

Leppäläluoto, J. et al. (2008) Anatomia ja fysiologia – Rakenteesta toimintaan. Porvoo, WSOY.

ayA791407: Health Education, Intermediate Studies (OPEN UNI), 35 op

Voimassaolo: 01.08.2012 -

Opiskelumuoto: Intermediate Studies

Laji: Study module

Vastuuuyksikkö: Open University, Oulu

Arvostelu: 1 - 5, pass, fail

Opetus suunnattu: Open University, Oulu

Opintokohteen kielet: Finnish

Leikkaavuudet:

A791407 Health Education, Intermediate Studies 35.0 op

ECTS Credits:

35 credits

Language of instruction:

Finnish

Timing:

2.-5. year

Learning outcomes:

Having completed the subject studies, the student is able to explain factors related to the health and welfare, health behavior, health challenges and health promotion of different population groups, especially children and adolescents. The student also knows how to evaluate his/her ability to reinforce the health knowledge of children and adolescents and how to build the contents of health education teaching and learning in a goal-oriented way. S/he also knows how to evaluate their relationship to the promotion of health at school and to develop their own activities in promoting health.

Contents:

The module consists of the following courses:

Life Control and Drugs (4 credits) – 402957A

Physical Exercise in Promoting Health (3 credits) – 402958A

Mental Welfare and Interaction among Children and Adolescents (4 credits) – 402954A

Social Welfare of Children and Adolescents (4 credits) – 409252A

Supporting Sexual Growth And Development (3 credits) – 402959A

Oral Health (3 credits) – 402963A

Advanced Course in the Didactics of Health Education (6 credits) – 402953A

Thesis (6 credits) – 402964A

Mode of delivery:

Face-to-face and web-based teaching

Learning activities and teaching methods:

Lectures, group sessions, online studies, independent work

Target group:

Students pursuing studies in the minor of Health Education

Prerequisites and co-requisites:

Health education basic studies

Recommended optional programme components:

no

Recommended or required reading:

To be announced for each specific course

Assessment methods and criteria:

ay402962A: Oral Health (OPEN UNI), 5 op

Voimassaolo: 01.08.2012 -

Opiskelumuoto: Intermediate Studies

Laji: Course

Vastuuysikkö: Open University, Oulu

Arvostelu: 1 - 5, pass, fail

Opintokohteen kielet: Finnish

Leikkaavuudet:

402962A Oral Health 5.0 op

ECTS Credits:

3 credits

Language of instruction:

Finnish

Timing:

2nd to 5th year

Learning outcomes:

Having completed the course, the student knows how to

- explain the main features of the development of the teeth and occlusion and the main deviations in them
- identifies the most common illnesses that may endanger the health of the mouth
- name ways to prevent illnesses of and accidents to the mouth
- give examples of the main features of the treatment of deviations in occlusion and oral diseases

Contents:

- development of occlusion and the teeth, their deviations and treatment
- accidents of the mouth and teeth, their prevention and care
- main causes of oral diseases
- prevention and care of oral and dental diseases at different stages of life

Mode of delivery:

Online studies

Target group:

Minor subject students in all faculties

Prerequisites and co-requisites:

Basic Studies

Recommended optional programme components:

Other courses in Health Education

Recommended or required reading:

Jormanainen, T. & Järvinen, S. (2008) Suunhoito-opas yläkouluille. Hammaslääkäriliiton kustannus.

ECTS Credits:

6 ECTS

Language of instruction:

Finnish / English

Timing:

1st year spring term

Learning outcomes:

Learning outcomes:

The student gets familiar with methodological issues and the process of scientific research.

Upon completion the student:

- is able to formulate a research problem and research purpose and design a research
- is able to review and evaluate scientific research
- is able to design qualitative and quantitative research methods
- knows the requirements of a good scientific writing
- is able to evaluate ethical considerations
- is able to evaluate the basic criteria to assess the quality of quantitative and qualitative studies

Contents:

The overview of research process, literature reviews, data collection, analysis of research data, reliability, addressing ethical issues, writing a research proposal.

Mode of delivery:

Contact teaching

Learning activities and teaching methods:

Lectures and practice 30 hours, independent studying and exam 130 hours.

Target group:

Students in Degree program in nursing science, Teacher training program in health science, Degree program in health administration science, Degree program in radiography and Degree program in clinical laboratory science.

Prerequisites and co-requisites:

Please see the recommended optional programme components.

Recommended optional programme components:

Research methods (basic).

Recommended or required reading:

Polit DF & Beck CT. 2011. Nursing Research. Generating and assessing evidence for nursing practice. Lippincott Williams & Wilkins, Philadelphia.

Topical scientific articles.

Leikkaavuudet:

350005Y Statistics 6.0 op

ECTS Credits:

6 ECTS

Language of instruction:

Finnish

Timing:

First year autumn term

Learning outcomes:

Learning outcomes: Student is able to get numeric observational data and plan quantitative research process. Student is able to describe things which are examined by tables, figures and parameters. Student is able to use the principles of distributions and test theories and statistic reasoning methods and models in quantitative data.

Contents:

The basic concept of statistic. Sampling methods. Observation matrix and scale. one-dimensional distribution and its parameters. Two-dimensional distribution and its interdependence numbers. Random variable and its distribution. Discrete variable and continuous probably variable. Statistical reasoning. Estimating, significant testing.

Mode of delivery:

The course will be devided in two parts: I= Descriptive statics which will be teached on autumn term and II= Reasoning statics which will be teached on spring term.

Learning activities and teaching methods:

Lectures 40 hours. Indvidual and group work 50 hours.

Target group:

Students in Degree program in nursing science, Teacher training program in health science, Degree program in health administration science, Degree program in radiography and Degree program in clinical laboratory science.

Prerequisites and co-requisites:

Basics of mathics, sum,- subtraction,- multiplication- and division. Power, square root.

Recommended optional programme components:

This course need to be completed before attending to the course 350007Y Applied statistics and ADP.

Recommended or required reading:

Karjalainen, A. & Laukkala, H. Luentomoniste 2008. Tilastollisen tutkimuksen perusteista.

ECTS Credits:

2 ECTS

Language of instruction:

Finnish

Timing:

1st year autumn term

Learning outcomes:

Learning outcomes: After completing the course the student is familiar with aims and principles of scientific research and she/he is able to describe the phases of research process.

Contents:

The aims and principles of scientific research, and research process.

Mode of delivery:

Distance teaching

Learning activities and teaching methods:

Independent studying

Target group:

Students in Degree program in nursing science, Teacher training program in health science, Degree program in health administration science, Degree program in radiography and Degree program in clinical laboratory science.

Prerequisites and co-requisites:

No

Recommended optional programme components:

Part of the research studies

Recommended or required reading:

Hirsväri, S., Remes, P. & Sajavaara, P. 2009. Tutki ja kirjoita. 15th edition. Tammi, Helsinki. Main chapters I and II.

Paunonen, M., & Vehviläinen-Julkunen, K. 1997. (edit.) Hoitotieteen tutkimusmetodiikka. WSOY, Juva. Chapters 1 and 2.

Leikkaavuudet:

350005Y Statistics 6.0 op

ECTS Credits:

6 ECTS

Language of instruction:

Finnish

Timing:

First year autumn term

Learning outcomes:

Learning outcomes: Student is able to get numeric observational data and plan quantitative research process. Student is able to describe things which are examined by tables, figures and parameters. Student is able to use the principles of distributions and test theories and statistic reasoning methods and models in quantitative data.

Contents:

The basic concept of statistic. Sampling methods. Observation matrix and scale. one-dimensional distribution and its parameters. Two-dimensional distribution and its interdependence numbers. Random variable and its distribution. Discrete variable and continuous probably variable. Statistical reasoning. Estimating, significant testing.

Mode of delivery:

The course will be devided in two parts: I= Descriptive statics which will be teached on autumn term and II= Reasoning statics which will be teached on spring term.

Learning activities and teaching methods:

Lectures 40 hours. Indvidual and group work 50 hours.

Target group:

Students in Degree program in nursing science, Teacher training program in health science, Degree program in health administration science, Degree program in radiography and Degree program in clinical laboratory science.

Prerequisites and co-requisites:

Basics of mathics, sum,- subtraction,- multiplication- and division. Power, square root.

Recommended optional programme components:

This course need to be completed before attending to the course 350007Y Applied statistics and ADP.

Recommended or required reading:

Karjalainen, A. & Laukkala, H. Luentomoniste 2008. Tilastollisen tutkimuksen perusteista.

Heikkilä, T. 1998. Tilastollinen tutkimus. Edita.

Helenius, H. 1989. Tilastollisten menetelmien perustiedot. Statcon Oy.

Läärä, E. & Lammi. 1989. Tilastotieteen perusteet lääketiedettä ja lähioloja varten. Luentomoniste. Kuopion yliopiston ylioppilaskunta.

Timing:

Orientation to Optima: September 17 - 23, 2012

September 24 - October 28, 2012

Learning outcomes:

Upon completion of the course the student should be able to view rehabilitation as an inter-professional whole, a multi- and interdisciplinary field of study, a social activity system, and a process of change concerning the individual and his/her environment. The student should have a general understanding of how the process of rehabilitation has changed and developed as society has progressed. The student should be able to use essential basic terminology of the field and understand the theoretical viewpoints behind the concepts.

Contents:

The concept of rehabilitation and its different definitions. The current state of rehabilitation based on historical development and central trends. Rehabilitation and values. Rehabilitation as a social activity system in the welfare state. Rehabilitation as a learning process and as a process of change for the individual and his/her environment. Ability to function, empowerment, and social participation. The basics of the ecological and disability-oriented models of rehabilitation.

040618P Usability I 5.0 op

ECTS Credits:

5 ECTS

Language of instruction:

Finnish

Timing:

April 22 - May 26, 2013

Learning outcomes:

Upon completion of the course the student should have a broad understanding of what is necessary to create and maintain an accessible physical, mental, and social environment for the rehabilitee. The student should also be able to evaluate these environments. The student should be able to grasp how significant a requirement accessibility is to the maximal function and work ability of the rehabilitee.

Contents:

Central topics discussed include: dimensions of functionality in different age groups, problem of discrimination, community planning, accessibility solutions in the workplace, and the challenges modern communication and the information society pose to rehabilitation. Additionally, the ICF model is used to evaluate the rehabilitee's environment and ability to function.

Opetus suunnattu: Open University, Oulu

Opintokohteen kielet: Finnish

Leikkaavuudet:

040617P Development and evaluation of rehabilitation science I 5.0 op

ECTS Credits:

5 ECTS

Language of instruction:

Finnish

Timing:

March 11 - April 14, 2013

Learning outcomes:

Upon completion of the course:

- 1) The student should have an overall understanding of the purposes of rehabilitation science and the essential research questions in the field. The student should be familiar with the common evaluation and research methods used in the field and be able to evaluate the applicability of these methods to different research questions. The student familiarises himself/herself with several example studies concerning sound practices and the quality and effectiveness of rehabilitation conducted using various different research methods. The student also familiarises himself/herself with several on-going EU programmes and examples of development programmes and projects initiated by different ministries and the Social Insurance Institution of Finland.
- 2) The student should be familiar with the basic structure of a research article or publication (introduction, theoretical background, aims and research questions, methods, ethical questions, results, and conclusions and reflection) and its different applications. The student should be able to critically analyse scientific publications and make improvement suggestions.

Contents:

- 1) Different fields of rehabilitation research and relevant research strategies. Effectiveness evaluations and the evaluation of rehabilitation processes and sound rehabilitation practices.
- 2) Online material: research and review publications (available on Optima).
- 3) On-going European Social Fund programme and various national projects initiated by different ministries.
- 4) Analysis of one research article from the field of rehabilitation science. Students are divided into small groups to answer questions concerning the goals, results, and conclusions of the article.

Mode of delivery:

Online studies

ECTS Credits:

5 ECTS

Language of instruction:

Finnish

Timing:

Orientation to Moodle: January 7 - 13, 2013

January 16 - February 19, 2013

Learning outcomes:

Upon completion of the course the student should be able to view the different service systems and networks of rehabilitation from the perspectives of society, community, and rehabilitees of different types and ages. The student should be able to critically analyse the problematic areas of rehabilitation and questions of responsibility between service systems. The student should also have grasped the basics of client-specific rehabilitation planning.

Contents:

The course familiarises the student with the service systems of medical, professional, social, and educational rehabilitation and the relevant legislation. The regional applications of service systems are also discussed, as is the distribution of work and responsibility. Additionally, rehabilitation and service plans are discussed in terms of significance and operational requirements.
